It is invaluable to all who enjoy the outdoors and anyone who seeks insight into the training tactics of the US Air Force.

Bushcraft Illustrated Seven Hills Books

Anyone venturing into the desert, either by crossing on foot, vehicle, or in an aircraft (other than a commercial flight) should be prepared. Desert regions are those least likely to have an easily available source of water. Nevertheless, the survivor must find a water supply or they will die. No matter how abundant the rest of your survival resources are, without water your time is limited. To travel or stay put is one of the great dilemmas any survivor must face. The factors governing any decision should be based on where you are, your chances of survival if you stay put, where you intend moving to and the related hazards in getting there. Without communications it is difficult to assess whether there will be a rescue attempt, and even if there is, it would be presumptive to believe that they will locate you. Additionally, having the physical and mental ability, plus the

resources to travel and reach a given point accurately is also a major factor. The SAS Guide to Desert Survival prepares the traveler for any situation they may find themselves in while venturing across desert and arid areas. It will explain the need for an immediate plan, as time will be against you, as well as how to dress for the ultimate protection from the sun and the cold (yes, deserts get very cold at night). The book will show you how and when to travel, as well as how to navigate a route to safety. The desert has two main advantages: the sun and the general clearness of visibility; a simple heliograph will flash a signal to both ground and air rescue services up to twenty-five miles away.

When All Hell Breaks Loose Adams Media

No one knows what the next disaster will be: earthquake, Coronavirus, flu epidemic, flood, terrorist attack. But everyone should know how to survive a medical emergency if a medical professional isn't available. From Dr. Joe Alton and Amy Alton ARNP comes an updated edition of their bestseller *The Survival Medicine Handbook*. This unique medical book is meant to enable the average person to handle injuries and illness in situations in which modern medical facilities and professionals aren't available due to a disaster. This book is written by America's top medical preparedness experts: Joe Alton, MD, and Amy Alton, ARNP. Their mission: to put a medically prepared person in every family for when medical help is not on the way. Using decades of medical experience, they address, in plain language, dozens of medical issues associated with surviving disasters and epidemics. The Altons also discuss the medical supplies needed to become a medical asset to your family and community as well as alternative and natural strategies for when pharmaceuticals aren't available. Topics include: Appendicitis and Conditions that Mimic It Urinary Tract Infections Mosquito-Borne Illnesses Allergic Reactions and Anaphylaxis Head Injuries Animal Bites Snake Bites Head injuries Kidney Stones Dislocations and Fractures Nosebleeds Pain Medications Natural Pain Relief And much much more! Most medical books will send you to the doctor or hospital when an emergency happens. The Altons assume that the worst might actually happen—that the average person could be left without medical help in a disaster. With their book, you can keep your family healthy in times of trouble.

The Ultimate Guide to Surviving Anywhere Rowman & Littlefield

A survival expert's guide for every family to prepare and educate themselves about the skills and mentality necessary to survive a disaster anywhere. This is not your father's scout manual or a sterile FEMA handout. Entertaining and informative, When All Hell Breaks Loose describes how to maximize a survival mindset necessary for self-reliance. According to the book, living through an emergency scenario is 90 percent psychology, and 10

percent methodology and gear. Relevant quotes and tips are placed throughout the pages to help readers remember important survival strategies while under stress and anxiety. Lundin also addresses basic first aid and hygiene skills and makes recommendations for survival kit items for the home, office, and car. Watch naturalist Cody Lundin in Dual Survival on The Discovery Channel as he uses many of the same skills and techniques taught in his books. When All Hell Breaks Loose provides solutions on how to survive a catastrophe. Lundin addresses topics such as: · Potable drinking water · Storing super-nutritious foods · Heating or cooling without conventional power · How to create alternative lighting options · Building a makeshift toilet & composting the results · Catching rodents for food · Safely disposing of a corpse "The essential survival guide for the twenty-first century."—Jim Mulvaney, Pulitzer Prize-winning journalist

The Portable and Essential Guide to Staying Alive HarperCollins UK

Anyone who has spent even a little time outdoors has come across strange tracks left by animals of people and wondered "what was here?" In this practical guide, former-SAS member Bob Carss shows how to track any moving thing, in any environment, and under nearly any circumstance. He begins by explaining common terms, such as a "top sign", markings left above ankle height; "pointers", signs that tell the general direction of the quarry; and a "conclusive sign," markings that confirm the quarry's presence. The difference between tracks left by quarry and false tracks are described, as well as how a pattern of signs builds into the tracking picture - the overall movement, direction, and motivation of the quarry. Included are tips on: Tracking in desert, forest, jungle, marsh, and grassy areas Interpreting animal, human, and vehicle signs How to preserve night vision Using time frames to eliminate misleading signs Detecting quarry when they backtrack or circle around How time and weather affect signs How to spot intentionally misleading signs The SAS Guide to Tracking is a remarkable guide to developing a new awareness of the outdoors and is the perfect companion for naturalists, outdoorspeople, hunters, wildlife photographers, search-and-rescue teams, and law enforcement.
