Answer Logic Questions on the SAT Math Test - dummies

Since this is a percentage question, SAT prep site Get800 recommends substituting numbers in for b and k and playing out all of the answers to see which one makes sense. Let's say $b = 100$

and $k = 25$. If there are 100 bricks and 25 of them have been stacked, that means 75 bricks have not yet been stacked, or 75% of the bricks.

A gas station sells regular gasoline for \$2.39 per gallon and premium gasoline for \$2.79 per gallon. If the gas station sold a total of 550 gallons of both types of gasoline in one day for a total of \$1,344.50, how many gallons of premium gasoline were sold? *Sat Math Questions With Answers* To answer the tough questions, you need a combination of experience and a willingness to try things out. I always warn new students that the SAT Math is unlike most tests they've done in

school. But when they ask how it's different, I usually have to resort to vague terms like "problem-solving, creative thinking, and word questions."

SAT Practice Questions | The Princeton Review

The SAT occasionally tosses you a logic question, disguised as a simple math question. It gives you a set of statements or conditions, sometimes called the facts. These statements describe the relationship between or among people, items, or events. You may, for example, be given statements

about students at a school and then be asked [...]
