ja@astro.ku.dk The development
of astronomy worldwide begins
at the roots: Already from
childhood, humans of all
nations and civilizations seem
to share an innate fascination
with the sky. Yet, people in
different regions of the world
have vastly different
possibilities for pursuing this
interest. In wealthy,
industrialised societies the
way is open to a school or
higher education in science,
possibly leading to a career in
astronomy or basic or applied
space science for the benefit
of the country as well as the
individual. In other regions,
neither the financial nor the
trained human resources are
sufficient to offer that avenue
to the future of the young
generation, or those
intellectual resources to the
development of their country.
This book addresses ways and
means by which these obstacles
can be, if not fully overcome,
then at least significantly
reduced.

Professional technicians have relied on the
Chilton Labor Guide estimated repair times for
decades. This latest edition expands on that
reliability by including technical hotline
feedback and research from professional labor
experts. The labor times reflect actual vehicle
conditions found in the aftermarket, including
rust, wear and grime. Available in both
hardcover and CD-ROM, this completely
revised manual provides thousands of labor

times for 1981 through current year domestic
and imported vehicles. All times reflect
technicians' use of aftermarket tools and
training.

Seeing the Deep Sky Pebble
A legend in the car industry reveals
the philosophy that's starting to turn
General Motors around. In 2001,
General Motors hired Bob Lutz out of
retirement with a mandate to save the
company by making great cars again.
He launched a war against penny
pinching, office politics, turf wars, and
risk avoidance. After declaring
bankruptcy during the recession of
2008, GM is back on track thanks to
its embrace of Lutz's philosophy.
When Lutz got into the auto business
in the early sixties, CEOs knew that if
you captured the public's imagination
with great cars, the money would
follow. The car guys held sway, and
GM dominated with bold, creative
leadership and iconic brands like
Cadillac, Buick, Pontiac, Oldsmobile,
GMC, and Chevrolet. But then GM's
leadership began to put their faith in
analysis, determined to eliminate the
"waste" and "personality worship" of
the bygone creative leaders.
Management got too smart for its own
good. With the bean counters firmly in
charge, carmakers (and much of
American industry) lost their single-
minded focus on product excellence.
Decline followed. Lutz's commonsense
lessons (with a generous helping of
fascinating anecdotes) will inspire
readers at any company facing the
bean counter analysis-paralysis
menace.
