portrait of a family
shaken by events
from decades ago and
worlds away. On a
rainy day in London
the dark secrets and
troubled past of
Maryam Mazar
surface violently, with
tragic consequences
for her daughter,
Sara, and her newly
orphaned nephew.
Maryam leaves her
English husband and
family and returns to
the remote Iranian
village where her
story began. In a
quest to piece their

life back together, Sara
follows her mother
and finally learns the
terrible price Maryam
once had to pay for
her freedom, and of
the love she left
behind. Set against

Few launch vehicles are as iconic and distinctive as NASA's behemoth rocket, the Saturn V, and none left such a lasting impression on those who watched it ascend.

Developed with the specific brief to send humans to the Moon, it pushed rocketry to new scales. Its greatest triumph is that it achieved its goal repeatedly with an enviable record of mission success. Haynes' Saturn V Manual tells the story of this magnificent and hugely powerful machine.

It explains how each of the vehicle's three stages worked; Boeing's S-IC first stage with a power output as great as the UK's peak electricity consumption, North American Aviation's S-II troubled second stage, Douglas's workhorse S-IVB third stage with its instrument unit brain - as much a spacecraft as a rocket. From the decision to build it to the operation of its engines' valves and pumps, this lavishly illustrated and deeply informative book offers a deeper

appreciation of the amazing Saturn V.
