100 Things for Every Gearhead to Do Before They Die Motorbooks

This is the car that launched the muscle car era and gave the Baby Boomers high-speed wings. Trivia freaks might know that Pontiac's "GTO" means "Gran Turismo Omologato," but muscle car fans know it earned its nickname "The Great One" at a time when America built the greatest cars on earth. It wasn't the fastest, the most powerful, or the most outrageous muscle car, but Pontiac's GTO resides at the very top of the pantheon because it was the first. Pontiac GTO 50 Years: The Original Muscle Car follows the rise of this iconic vehicle from the day in 1963 when Chief Engineer John Z. DeLorean bolted a 389-cubic-inch GTO engine into a prototype Tempest coupe through the final GTO rendition in 2006. Wedding that massive V-8 to a mid-size GM chassis created one of the fastest production cars of the time but also made it a car just about anyone with a job could afford. It started as an option package that was supposed to be limited to 5,000 units. Instead, word of mouth pushed sales to more than six times that many in its first year. Hundreds of photographs round out this thoroughly researched history and offer insight into the vehicle that, through redesigns, repackages, and relaunches, came of age with the Baby Boomer generation. From classic 1960s models to the GTO's revival in 2004, the exhilarating story of the outlaw that should never have been "The Great One" and will never be again "The Great One" will thrill any auto enthusiast.

A one-time murderer and many-time thief, Richard Lee McNair is the only person ever to break out jail, state penitentiary and federal penitentiary. Three escapes. McNair, a former US Air Force Sergeant, was 47 when he shipped himself out a Louisiana prison on the 5th of April, 2006. His escape came to within a whisker of failing when he was confronted on railroad tracks by a policeman, an event recorded by the officer's dashcam. The encounter became a famous crime video clip on YouTube. Month after month, McNair was featured on America's Most Wanted and led newspaper and television newscasts in the United States and Canada. Through more than 350 letters and 3,500 hand-written pages from his solitary-confinement cell at the 'Supermax' in Colorado, Richard McNair provides the never-before-known details on how he pulled off his three escapes, his encounters with police, and what can be best described as a semi-paranoid life on the lam. His Houdini-like escape in 2006 was the first from a federal prison in 13 years, and there hasn't been one since. Is Richard Lee McNair the world's greatest escape artist? The reader can decide.

"This pioneering study of United States direct investment in Japan will interest academic specialists, business managers, and government policymakers in America, Japan, and elsewhere. Drawing on rich historical materials from both sides of the Pacific, including corporate records and government documents never before made public, Mason examines the development of both Japanese policy towards foreign investment and the strategic responses of American corporations. This history is related in part through original case studies of Coca-Cola, Dow Chemical, Ford, General Motors, International Business Machines, Motorola, Otis Elevator, Texas Instruments, Western Electric, and Victor Talking Machine. The book seeks to explain why a little foreign direct investment has entered modern Japan. In contrast to the widely held view that emphasizes an alleged lack of effort on the part of foreign corporations, this study finds that Japanese restrictions merit greater attention. Many analysts of the modern Japanese political economy identify the Japanese government as the key actor in initiating such restrictions. Mason finds that the influence of Japanese business has often proved more potent than these analysts suggest. This book offers fresh insights into both the operation of the modern Japanese political economy and of its relations with the world economy."
