In his latest book, Terry Eagleton, one of the most celebrated intellectuals of our time, considers the least regarded of the virtues. His compelling meditation on hope begins with a firm rejection of the role of optimism in life's course. Like its close relative, pessimism, it is more a system of rationalization than a reliable lens on reality, reflecting the cast of one's temperament in place of true discernment. Eagleton turns then to hope, probing the meaning of this familiar but elusive word: Is it an emotion? How does it differ from desire? Does it fetishize the future? Finally, Eagleton broaches a new concept of tragic hope, in which this old virtue represents a strength that remains even after devastating loss has been confronted. In a wide-ranging discussion that encompasses Shakespeare's *Lear*, Kierkegaard on despair, Aquinas, Wittgenstein, St. Augustine, Kant, Walter Benjamin's theory of history, and a long consideration of the prominent philosopher of hope, Ernst Bloch, Eagleton displays his masterful and highly creative fluency in literature, philosophy, theology, and political theory. Hope without Optimism is full of the customary wit and lucidity of this writer whose reputation rests not only on his pathbreaking ideas but on his ability to engage the reader in the urgent issues of life. Pope Benedict XVI's second encyclical, *Saved In Hope*, ("Spe Salvi" in Latin) takes its title from St. Paul, who wrote, "In hope we have been saved." In this special deluxe hardcover edition of the work, the Holy Father continues a line of thought he began with his first encyclical, *God is Love*. Love and Hope are closely related in the spiritual life. Love of God involves hope or trust in God. According to the Catechism of the Catholic Church, "The virtue of hope responds to the aspiration to happiness which God has placed in the heart of every man." Hope enables us to look to the next life, but it also inspires and purifies our actions in this life. Pope Benedict considers modern philosophies and the challenges of faith today in light of the virtue of hope. "Confronted by today's changing and complex panorama, the virtue of hope is subject to harsh trials in the community of believers. For this very reason, we must be apostles who are filled with hope and joyful trust in God's promises. In contemporary society, which shows such visible signs of secularism, we must not give in to despair." -- Pope Benedict XVI

Saved by Hope Spiritual Thoughts

Increasingly, the future is becoming a theme for theological reflection. In the background we can detect a growing concern among many people for the future of faith. Does faith have any future at all, and, if so, where in all the confusion of today's

trends will we discover its embryo? But the problem of the future assails not only the believer. In the ever more rapidly advancing process of historical evolution, man is confronted with enormous opportunities, but also with colossal perils. For him, the future is not only hope, but sorrow—a nightmare, indeed. He cannot avoid asking what part faith can play in building tomorrow's world. Joseph Ratzinger, now Pope Benedict XVI, approaches this problem of universal concern from a variety of angles, bringing his deep personal faith and theological brilliance to bear on these serious questions.

A Columbia University physician comes across a popular medieval text on dying well written after the horror of the Black Plague and discovers ancient wisdom for rethinking death and gaining insight today on how we can learn the lost art of dying well in this wise, clear-eyed book that is as compelling and soulful as *Being Mortal*, *When Breath Becomes Air*, and *Smoke Gets in Your Eyes*. As a specialist in both medical ethics and the treatment of older patients, Dr. L. S. Dugdale knows a great deal about the end of life. Far too many of us die poorly, she argues. Our culture has overly medicalized death: dying is often institutional and sterile, prolonged by unnecessary resuscitations and other intrusive interventions. We are not going gently into that good night—our reliance on modern medicine can actually prolong suffering and strip us of our dignity. Yet our lives do not have to end this way. Centuries ago, in the wake of the Black Plague, a text was published offering advice to help the living prepare for a good death. Written during the late Middle Ages, *ars moriendi*—The Art of Dying—made clear that to die well, one first had to live well and described what practices best help us prepare. When Dugdale discovered this Medieval book, it was a revelation. Inspired by its holistic approach to the final stage we must all one day face, she draws from this forgotten work, combining its wisdom with the knowledge she has gleaned from her long medical career. *The Lost Art of Dying* is a twenty-first century *ars moriendi*, filled with much-needed insight and thoughtful guidance that will change our perceptions. By recovering our sense of finitude, confronting our fears, accepting how our bodies age, developing meaningful rituals, and involving our communities in end-of-life care, we can discover what it means to both live and die well. And like the original *ars moriendi*, *The Lost Art of Dying* includes nine black-and-white drawings from artist Michael W. Dugger. Dr. Dugdale offers a hopeful perspective on death and dying as she shows us how to adapt the wisdom from the past to our lives today. *The Lost Art of Dying* is a vital, affecting book that reconsiders death, death culture, and how we can transform how we live each day, including our last.

This book is a learned essay at the intersection of politics, philosophy, and religion. It is first and foremost a diagnosis and critique of the secular religion of our time, humanitarianism, or the "religion of humanity." It argues that the humanitarian impulse to regard modern man as the measure of all things has begun to corrupt Christianity itself, reducing it to an inordinate concern for "social justice," radical political change, and an increasingly fanatical egalitarianism. Christianity thus loses its transcendental reference points at the same time that it undermines balanced political judgment. Humanitarians, secular or religious, confuse peace with pacifism, equitable social arrangements with socialism, and moral judgment with utopianism and sentimentality. With a foreword by the distinguished political philosopher Pierre Manent, Mahoney's book follows Pope Emeritus Benedict XVI in affirming that Christianity is in no way reducible to a "humanitarian moral message." In a pungent if respectful analysis, it demonstrates that Pope Francis has increasingly confused the Gospel with left-wing humanitarianism and egalitarianism that owes little to classical or Christian wisdom. It takes its bearings from a series of thinkers (Orestes Brownson, Aurel Kolnai, Vladimir Soloviev, and Aleksandr Solzhenitsyn) who have been instructive critics of the "religion of humanity." These thinkers were men of peace who rejected ideological pacifism and never confused Christianity with unthinking sentimentality. The book ends by affirming the power of reason, informed by revealed faith, to provide a humanizing alternative to utopian illusions and nihilistic despair.

John Paul II Our Sunday Visitor

The novel's protagonist is a British Roman Catholic priest, Father Percy Franklin, who looks identical to the mysterious U.S. Senator Julian Felsenburgh of Vermont. The senator appears as a lone and dramatic figure promising world peace in return for blind obedience. No one quite knows who he is or where he comes from, but his voice mesmerizes. Under his leadership, war is abolished. Felsenburgh becomes the President of Europe, then of the world, by popular acclaim. Everyone is fascinated with him, yet still no one knows much about him. People are both riveted and frightened by the way he demands attention. Most follow without question. Having been a close observer of President Felsenburgh's rise, Father Franklin is called to Rome, a Hong Kong-style enclave ruled by Pope John XXVI and raised to the College of Cardinals. Meanwhile, defections among bishops and priests increase. At Cardinal Franklin's instigation, the pope abolishes the Eastern Catholic Churches and forms a new religious order, the Order of Christ Crucified. All its members, including the Pope, vow to die in the name of the faith.

Jesus Our Redeemer examines what it means when Christians call Jesus their 'Redeemer' or 'Saviour'. It tackles such questions as: How can redemptive events in the past (Christ's life, death, and resurrection) bring about saving effects in the present? Why do human beings need redemption, both individually and collectively? What images of God are implied by the saving action of God and by human needs? Gerald O'Collins SJ draws on the scriptures, Christian hymns and texts for worship, literature, the visual arts, and other sources. He examines four major models of how redemption through Christ has been thought to work: theories of deliverance, penal substitution, sacrifice, and transforming love. He concludes by considering the outworking of salvation in the life of the Church, the situation of non-Christians, and the final consummation of human life and the created world at the end of time.
