Organisations are communities. Increasingly the leaders of those communities are drawing on the services of psychologists to help them realise the potential of their “human capital”. What do these business psychologists do to assist

in the identification, motivation and development of the talent that employees bring into their communities? The authors, all Principal Members of the Association of Business Psychologists, are experienced and qualified professionals who candidly share their experiences and learning derived from those experiences. They provide case studies and examples from real interventions, they ask provocative questions about conventional thinking and practice and they explain the models that help them make sense of the complex organisations in which they operate. Business Psychology in Practice takes us on an excursion behind the scenes in organisations. This book will be of interest to consultants, those who commission their services and anybody wrestling with

'people issues'.

Psychometric Testing John Wiley & Sons

This engaging text takes an evenhanded approach to major theoretical paradigms in evaluation and builds a bridge from them to evaluation practice. Featuring helpful checklists, procedural steps, provocative questions that invite readers to explore their own theoretical assumptions, and practical exercises, the book provides concrete guidance for conducting large- and small-scale evaluations. Numerous sample

studies—many with reflective commentary from the evaluators—reveal the process through which an evaluator incorporates a paradigm into an actual research project. The book shows how theory informs methodological choices (the specifics of planning, implementing, and using evaluations). It offers balanced coverage of quantitative, qualitative, and mixed methods approaches. Useful pedagogical features include: *Examples of large- and small-scale evaluations from multiple disciplines. *Beginning-of-chapter reflection questions that set the stage for the material covered. *"Extending your thinking" questions and practical activities that help readers apply particular theoretical paradigms in their own evaluation projects. *Relevant Web links,

including pathways to more details about sampling, data collection, and analysis.

*Boxes offering a closer look at key evaluation concepts and additional studies.

*Checklists for readers to determine if they have followed recommended practice.
