offer a highly original account of one of the most important transformations in Western culture: the change brought about by the discovery and development of printing in Europe. Focusing primarily on printed matter other than books, *The Culture of Print* emphasizes the specific and local contexts in which printed materials, such as broadsheets, flysheets, and posters, were used in modern Europe. The authors show that festive, ritual, cultic, civic, and pedagogic uses of print were social activities that involved

deciphering texts in a collective way, with those who knew how to read leading those who did not. Only gradually did these collective forms of appropriation give way to a practice of reading--privately, silently, using the eyes alone--that has become common today. This wide-ranging work opens up new historical and methodological perspectives and will become a focal point of debate for historians and sociologists interested in the cultural transformations that accompanied the rise of

modern societies. Originally published in 1989, *The Princeton Legacy Library* uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of

first edition of The Paris System (TPS) introduced a new model of urinary cytodiagnosis, verification and expansion of initial material and data were anticipated. Based on evolving knowledge and readership requests, the group of highly experienced authors have created a new edition of TPS. This second edition includes areas and issues not originally covered. A new chapter on urine cytology of the upper tract, a rarely addressed topic, has been introduced. Furthermore, the issue of cellular degeneration is discussed in the criteria of all

diagnostic categories. Examples of standardized reports are included in each chapter. Most importantly, a separate chapter presents data defining the risk of malignancy (ROM) for each diagnostic category to inform clinical management. New high quality images augment those of the first edition to better illustrate diagnostic clues and potential pitfalls. In addition to chapters on diagnostic criteria, current concepts of pathogenesis of bladder cancer, specimen adequacy and preparation, and ancillary tests are covered in separate chapters. A bonus to the

volume is a comprehensive history of urine as the earliest diagnostic sample of human disease, richly illustrated with artworks from major museums. Written by internationally recognized authorities, this comprehensive and evidence-based guide to urine cytology is supported by the newest data confirming the original concept and significance of diagnostic criteria defining High Grade Urothelial Carcinoma. Chase Winters was the bane of my existence. But he was also the lifeline of my heart and soul. Literally. Things were steaming up between us, and between the sheets. When his lips weren't locked

with mine, they were spewing verbal crap. Half the time I don't know whether to kiss him or slap him. Our bond was more than just being connected, we were soulbond. The closer we got, the stronger the bond takes hold, and now-a-days it seemed we were inseparable. There was a new addition to our little town, one that has all the Divisa's on guard - a hunter has taken up residency. This hunter was not just another threat, not when their identity hit so close to home. Strife divides

my neighbor's household surrounding this supposed enemy. Could they be friend or foe? Chase's number one priority in all this as always, was to keep me safe. Regardless of what Chase thought, I was not the weak and fragile human they all thought I was. And there was nothing I wouldn't do to keep Chase from harm. He might drive me up a freaking wall, but he was my pain in the ass. I wasn't about to sit back and let some hunter fire an arrow through his heart. Not if I could help it. Then there

was the one question that was on everyone's mind: Will the hunter kill us or save us...

Hunting Angel Springer Nature Loving Angel isn't easy. Actually, it's downright exhausting, but somehow she weaseled her way into my life. She has become my everything—my reason for existing—my reason for breathing. I love the ever-loving crap out of Angel Eyes. There is nothing I wouldn't endure for her—even college. College. Ugh. I hope the frat boys, the jocks, and the nerds are prepared for what is about to embark on their school this fall. Half-demons. Hunters. And um, the Keystone? Yeah, that is going to take getting used

to. We aren't exactly your average freshman. And somehow I find myself stuck with a bunch of troublesome females to look after. Angel. Emma. Lexi. Pretty sure I got the raw end of the stick. But that isn't the worst of it. There is someone lurking in the shadows—spying and stalking my girlfriend. He is a dead man. How many people am I going to have to kill for this girl? A better question would be how many people wouldn't I kill for her? As many as it took. Angel is about to experience betrayal of the worst kind. And this time, it's not entirely my fault—shocker. Redeeming Angel Independently Published Here is a study, by a

recognized master in the field of intellectual history, of the challenge put by Machiavelli to the idea that there is a universal moral law governing human behavior. Should the political leader act according to the maxim of "my country right or wrong," or should elites follow the principle of "let justice be done?" Friederich Meinecke, an acknowledged founder of cultural history as a field, follows the discussion of this theme from Machiavelli through such major figures as Richelieu, Frederick the Great, and Hegel, and presents conclusions of enduring

significance.

Deep Time of the Media Regan Ure  
A quest to find something new by excavating the "deep time" of media's development—not by simply looking at new media's historic forerunners, but by connecting models, machines, technologies, and accidents that have until now remained separated. Deep Time of the Media takes us on an archaeological quest into the hidden layers of media development—dynamic moments of intense activity in media design and construction that have been largely ignored in the historical-media

archaeological record. Siegfried Zielinski argues that the history of the media does not proceed predictably from primitive tools to complex machinery; in Deep Time of the Media, he illuminates turning points of media history—fractures in the predictable—that help us see the new in the old. Drawing on original source materials, Zielinski explores the technology of devices for hearing and seeing through two thousand years of cultural and technological history. He discovers the contributions of "dreamers and modelers" of media worlds, from the ancient

---

Greek philosopher Empedocles and natural philosophers of the Renaissance and Baroque periods to Russian avant-gardists of the early twentieth century. "Media are spaces of action for constructed attempts to connect what is separated," Zielinski writes. He describes models and machines that make this connection: including a theater of mirrors in sixteenth-century Naples, an automaton for musical composition created by the seventeenth-century Jesuit Athanasius Kircher, and the eighteenth-century electrical tele-writing machine of Joseph Mazzolari, among

others. Uncovering these moments in the media-archaeological record, Zielinski says, brings us into a new relationship with present-day moments; these discoveries in the "deep time" media history shed light on today's media landscape and may help us map our expedition to the media future.
