This chart is designed to help you be more consistent in disciplining your children. When children disobey, this chart helps parents know what to do and helps children know what to expect. The first column lists common areas of misbehavior (arguing, complaining, hitting, defiance, etc.), each illustrated with a simple cartoon. The center column gives a Bible verse relating to each sin. The third column is blank, for you to complete with the agreed-upon consequences for each misbehavior. The instructions offer suggestions, but you choose your own disciplinary actions. You can cut out the pre-lettered consequences and glue them onto the chart, or write in your own.

Saxon math programs produce confident students who are not only able to correctly compute, but also to apply concepts to new situations. These materials gently develop concepts, and the practice of those concepts is extended over a considerable period of time. This is called "incremental development and continual review." Material is introduced in easily understandable pieces (increments), allowing students to grasp one facet of a concept before the next one is introduced. Both facets are then practiced together until another one is introduced. This feature is combined with continual review in every lesson throughout the year. Topics are never dropped but are increased in complexity and practiced every day, providing the time required for concepts to become totally familiar. Algebra 1, third edition is made up of five instructional components: Introduction of the New Increment, Examples with Complete Solutions, Practice of the Increment, Daily Problem Set, and Cumulative Tests. Algebra 1 covers topics typically treated in a first-year algebra course. This set contains a student text, answer key, and test forms. A solutions manual is available separately. Grade 9.
