Physics is equally appropriate for average and gifted students. The entire program is based on introducing a topic to a student and then allowing them to build upon that concept as they learn new ones. Topics are gradually increased in complexity and practiced every day, providing the time required for concepts to become totally familiar. Includes:

Algebra 1 covers all the topics  
in a first-year algebra course  
and builds the algebraic  
foundation essential for all  
students to solve increasingly  
complex problems. Higher  
order thinking skills use real-  
world applications, reasoning  
and justification to make  
connections to math strands.

Algebra 1 focuses on algebraic

Saxon math programs  
produce confident  
students who are not only  
able to correctly compute,  
but also to apply concepts  
to new situations. These

---

materials gently develop concepts, and the practice of those concepts is extended over a considerable period of time. This is called "incremental development and continual review." Material is introduced in easily understandable pieces (increments), allowing students to grasp one facet of a concept before the next one is introduced. Both facets are then practiced together until another one is introduced. This feature

is combined with continual review in every lesson throughout the year. Topics are never dropped but are increased in complexity and practiced every day, providing the time required for concepts to become totally familiar. Algebra 1, third edition is made up of five instructional components: Introduction of the New Increment, Examples with Complete Solutions, Practice of the Increment, Daily Problem Set, and Cumulative Tests. Algebra

1 covers topics typically treated in a first-year algebra course. This set contains a student text, answer key, and test forms. A solutions manual is available separately. Grade 9.
