Saxon math programs produce confident students who are not only able to correctly compute, but also to apply concepts to new situations. These materials gently develop concepts, and the practice of those concepts is extended over a considerable period of time. This is called "incremental development and continual review." Material is introduced in easily understandable pieces (increments), allowing students to grasp one facet of a concept before the next one is introduced. Both facets are then practiced together until another one is introduced. This feature is combined with continual review in every lesson throughout the year. Topics are never dropped but are increased in complexity and practiced every day, providing the time required for concepts to become totally familiar. Each grade level has its own consumable meeting

book, which is used during The Meeting at the beginning of each day. This first edition meeting book is for Grade 2.

Comprehensive coverage of all essential kindergarten math topics in one easy-to-use bundle! Math educator Kate Snow gives parents the tools

they need to teach math with confidence. This scripted, open-and-go program leads parents ' step-by-step through teaching all the concepts a kindergartner needs to master: counting to 100, writing numbers, beginning addition and subtraction, shapes and patterns, coins, time, and measurement. Short, lively lessons will hold a child ' s attention by incorporating movement, games, and everyday household objects. Simple, colorful worksheets prepare kindergartners for pencil-and-paperwork that they ' ll encounter in first grade. Snow demystifies math by including recommendations for wonderful math picture books to enjoy together, plus specific ways to help children apply math to real life throughout the week. Beyond just telling parents what to do, Kindergarten Math With Confidence also helps them understand why the lessons are designed the way they are, giving them the knowledge and confidence to help their children learn. Using Kindergarten Math With Confidence will allow parents to build a strong math foundation for their children.

Horizons Math Kindergarten builds the foundation for the method of study that is used all the way through the Horizons Math program. Every concept follows a deliberate pattern of introduction and gradual development. Each lesson begins with a new concept or an expansion of a previously covered concept. This introduction starts a cycle of repetition and review that students will experience as they work through the lessons. Horizons Math Kindergarten lays a foundation for order and exactness. The daily practice in the student books teaches the recognition and printing of the numerals 0 to 100. Simple addition and subtraction from 0 to 10 are taught. the addition-subtraction concept is extended through 99 with the aid of counters and the number line. Counting through 100 is presented by 1's, 10's, 5's, 2's, 3's, and 4's. Principles of place value, measurement, calendar use, telling time, graphing, comparisons, and money concepts are also introduced.
