NEW YORK TIMES BESTSELLER • What if everything we think we know about how the world works—our ideas of love, education, spirituality, work, happiness,

This book teaches you to think like some of the greatest non-conformist minds of our era, to question, challenge, hack, and create new rules for YOUR life so you can define success on your own terms. The Code of the Extraordinary Mind is a blueprint of laws to break us free from the shackles of an ordinary life. And thus, most people live their lives based on limiting rules and outdated beliefs about pretty much everything—love, work, money, parenting, sex, health, and more—which they inherit and pass on from generation to

generation. But what if you could remove these outdated ideas and start anew? What would your life look like if you could forget the rules of the past, and redefine what happiness, purpose, and success mean for you? Not Just a Book, but a Movement

The inspirational bestseller that ignited a movement and asked us to find our WHY. Discover the book that is captivating millions on TikTok and that served as the basis for one of the most popular TED Talks of all time—with more than 56 million views and counting. Over a decade ago, Simon Sinek started a movement that inspired millions to demand purpose at work, to ask what was the WHY of their organization. Since then, millions have been touched by the power of his ideas, and these ideas remain as relevant and timely as ever. **START WITH WHY** asks (and answers) the questions: why are some people and organizations more innovative, more influential, and more

profitable than others? Why do some command greater loyalty from customers and employees alike? Even among the successful, why are so few able to repeat their success over and over? People like Martin Luther King Jr., Steve Jobs, and the Wright Brothers had little in common, but they all started with WHY. They realized that people won't truly buy into a product, service, movement, or idea until they understand the WHY behind it. **START WITH WHY** shows that the leaders who have had the greatest influence in the world all think, act and communicate the same way—and it's the opposite of what everyone else does. Sinek calls this powerful idea The Golden Circle, and it provides a framework upon which organizations can be built, movements can be led, and people

can be inspired. And it all starts with WHY.

HOW TO BE HAPPIER AND MORE SUCCESSFUL BY SIMPLE CHANGES IN MENTAL ATTITUDE This is the sixth book Vash Young has written to share with others the philosophy responsible for the success and happiness he has enjoyed. His other books were bestsellers, and FORTUNES FOR ALL is undoubtedly his most important work.

First published in 1959, it written during Vash Young's active retirement at the age of 70, when he was able to look back over his amazing life and career and speak with the voice of one who conquered the obstacles of fear, inhibition, and failure to become the successful salesman of \$80 million worth of life insurance and lead a full, rich life by applying his philosophy for happiness. "I know I have a good key to happiness because I have used it personally with almost unbelievable results." "This state of mind has not grown old and useless. It is more potent within me today than back in the depression years when I was changing the thinking of thousands of distressed individuals." "...we can see the human body, which has a chemical value of approximately 97 cents. But we do not see the thinking which motivates a human body. This thinking may be worth \$500,000." "All of the scientific advances being made are of very little

use to the individual and his personal problems....Self-help is what he needs most of all, and that is what I am trying to supply in this book.” FORTUNES FOR ALL seeks to bring together the background, philosophy and methods that had secured Vash Young’s fortune as a handbook for generations to follow.

Winner of the Hugo Award! In A Psalm for the Wild-Built, bestselling Becky Chambers's delightful new Monk and Robot series, gives us hope for the future. It's been centuries since the robots of Panga gained self-awareness and laid down their tools; centuries since they wandered, en masse, into the wilderness, never to be seen again; centuries since they faded into myth and urban legend. One day, the life of a tea monk is upended by the arrival of a robot, there to honor the old promise of checking in. The robot cannot go back until the

question of "what do people need?" is answered. But the answer to that question depends on who you ask, and how. They're going to need to ask it a lot. Becky Chambers's new series asks: in a world where people have what they want, does having more matter?
