"For all the right reasons." "Cars that can."
"What to Drive." "The perfect Car for an
Imperfect World." Only one of these
slogans would be chosen by Subaru of
America to sell its cars in the recession
year of 1991. As six advertising agencies
scrambled for the account and the winner
tried to churn out the Big Idea that would
install Subaru in the collective national
unconscious, Randall Rothenberg was
there, observing every nuance of the
chaos, comedy, creativity, and egotism
that made up an ad campaign. One can
read Rothenberg's book as the behind-the-
scenes chronicle of the brief and very
troubled marriage between a beleaguered
automobile company and Wieden &
Kennedy, an aggressively hip ad agency
whose creative director despised cars.
One can read it as a history of
advertising's journey from the
conventionally upbeat slogan "Helps Build
Strong Bodies 12 Ways" to the supercool
nineties minimalism of "Bo Knows." Either
way, *Where the Suckers Moon* is a face-
paced, insightful, and occasionally
appalling look at an industry whose
obsession with image has affected our
entire culture.

When Lexus launched fifteen
years ago, the idea of a
Japanese brand that would
compete fender to fender with
Mercedes-Benz, BMW, and
Cadillac seemed preposterous.
But Lexus' first sedan
shocked the world. The result
of hundreds of prototypes,
the work of more than 1,000
engineers, and some \$1

billion, the Lexus LS 400 pioneered new ground. Within just a few years, Lexus had transformed itself from an unlikely outsider into one of the industry's leaders as it redefined the idea of the luxury vehicle while also building a dealer network that gave unprecedented attention to service. The Lexus Story describes the brand's rapid ascent—and its travails along the way. The Lexus Story is the first journalistic telling of the history of this extraordinary company. And it is the only account afforded full access to the designers, engineers, dealers, and company leaders who molded the cars and the brand. The Lexus Story takes readers deep inside the making of first-class automobiles, from the creative sparks kindled in Lexus' far-flung design studios to the engineering refinements that translate ideals of performance and luxury into steel, glass, and rubber. Designed to be both readable and visually welcoming with more than 200 full-color photographs, The Lexus Story is a compelling history of a world-class brand.

Dreamed up by drivers trying to outdo each other on the mountain passes of Japan, the art of the sideways descent of a switchback—what *Wired* described as "the fishtailing ballet of burning rubber called drifting"—has made it to the United States in a big way. What began as a new kind of daredevil driving among teens has, over two decades, become a sanctioned sport, making its way across the Pacific through video games and magazines, anime and the Internet, to take root in California's fertile underground racing culture. Drifting tells the story of drifting from its arrival on the West Coast to its emergence as the hottest form of motorsport in the United States. A dramatic visual record of the sport in America

that includes over 400 photos, the book also profiles the people, teams, techniques, web sites, publications, videos, and trends that have made drifting the phenomenon that it is today. For the curious newcomer, author Antonio Alvendia's introduction succinctly explains what drifting is, setting the stage for the thrilling automotive drama that then unfolds. For the veteran drifting fan, this book is the first illustrated book on the latest motorsport to conquer the world.

A behind-the-scenes look at Lexus's surprising twenty-year success story—in a revised new edition In the 1980s, German brands BMW and Mercedes-Benz dominated the luxury car market and had little reason to fear competition from Japan. But in 1989, Toyota entered the market with the Lexus LS 400, a car that could compete with the Germans in every category but price—it was US\$30,000 cheaper. Within two years, Lexus had overtaken Mercedes-Benz in the United States and made a stunning success of Toyota's brave foray into the global luxury market. *Lexus: The Relentless Pursuit* reveals why Toyota decided to take on the German automakers and how the new brand won praise and success for its unparalleled quality, unforgettable advertising, and unprecedented customer service. From the first boardroom planning session to Lexus's entry into the mega-luxury supercar market, this is the complete and compelling story of one of the world's most admired brands. Includes a new Foreword by legendary designer Erwin Lui, an Afterword with updates since the first edition, and a new Coda by leading Japanese automotive journalist Hisao Inoue Covers the racetrack triumph—and tragedy—behind the new US\$375,000 Lexus LFA

The modern traffic system is ecologically unsustainable, emotionally stressful, and poses a physical threat to individuals and communities alike. Traffic is not only an ecological and social problem but also a political one.

Modern traffic reproduces the rule of the state and capital and is closely linked to class society. It is a problem of power. At its core lies the notion of

"automobility," a contradictory ideal of free movement closely linked to a tight web of regulations and control mechanisms. This is the main thesis of the manifesto *The Traffic Power Structure*, penned by the Sweden-based activist network Planka.nu. Planka.nu was founded in 2001 to fight for free public transport. Thanks to creative direct action, witty public interventions, and thought-provoking statements, the network has become a leading voice in Scandinavian debates on traffic. In its manifesto, Planka.nu presents a critique of the automobile society, analyzes the connections between traffic, the environment, and class, and outlines its political vision. The topics explored along the way include Bruce

Springsteen, high-speed trains, nuclear power, the security-industrial complex, happiness research, and volcano eruptions. Planka.nu rejects demands to travel ever-longer distances in order to satisfy our most basic needs while we lose all sense for proximity and community. *The Traffic Power Structure* argues for a different kind of traffic in a different kind of world. The book has received several awards in Sweden and has been hailed by Swedish media as a "manifesto of striking analytical depth, based on profound knowledge and a will to agitation that demands our respect" (Ny Tid).
