The global shift toward delivering services online requires organizations to evolve from using traditional paper files and storage to more modern electronic methods. There has however been very little information on just how to navigate this change-until now. Implementing Electronic Document and Record Management Systems explains how to efficiently store and access electronic documents and records in a manner that allows quick and efficient access to information so an organization may meet the needs of its clients. The book addresses a host of issues related to electronic document and records management systems (EDRMS).

From starting the project to systems administration, it details every aspect in relation to implementation and management processes. The text also explains managing cultural changes and business process re-engineering that organizations undergo as they switch from paper-based records to electronic documents. It offers case studies that examine how various organizations across the globe have implemented EDRMS. While the task of creating and employing an EDRMS may seem daunting at best, Implementing Electronic Document and Record Management Systems is the resource that can provide you with the direction and guidance you need to make the transition as

seamless as possible.

or part time agent. Professional Real Estate Agents and Real Estate Brokers face a tough challenge every day. Negotiating an offer written on behalf of a buyer; Professional Realtors stand out from the general public as experts in their field. Whether it's a matter of disclosure requirements, ethics or simply due diligence on behalf of a transaction, it's important to seek the advice and representation of a true full time professionally licensed Realtor in every real estate transaction regardless of what side you may be on. "Finding New Neighbors" takes the reader into the trenches of buying real estate. If the buyer

is looking to purchase a residential home, vacant land or a commercial investment property, this book will cover many of the specialized elements that they will encounter along the way. No single publication makes up an entire library of information. As this book reflects the buyers side of real estate, my next book "Echoes in the Hall" will represent the seller's side of the industry. In my last book; "Guide to New Custom Home Ownership", the reader learned about the process of new construction. Additional publications will be added along the way. "It is my intent to supply the reader an easy to

understand publication that they can use as they proceed in searching for their new home or additional property for their family, future and investments." This book is designed with sections dedicated to writing notes and outlines so the reader can share their thoughts and ideas with their chosen agent or lender.
