Excerpt from Some Problems of the Peace Conference The purpose of the lectures here published is to give a rapid survey of the principal elements in that territorial settlement of Europe which has been pronounced the most reasonable part of the work of the Conference¹ of Paris. Each problem is placed in its historical setting, while at the same time the effort is made to view it as some thing demanding practical solution in the treaties of peace. The perspective of proceedings as seen at Paris has been kept in mind throughout, although the authors have not felt at liberty to enter into the details of negotiations which may have become known to them in their official capacity. Limits of time and space restrict the treatment to Europe, and to those parts of Europe which came before the Conference for settlement. Hence Russia is necessarily omitted. The lectures are printed substantially as delivered at the Lowell Institute last January, with only incidental revision. In the spelling of place names the official local usage has been followed except where there is a well established English form. The first four chapters were prepared by Mr. Haskins, the last four by Mr. Lord. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Now an industry giant and a legend among American manufacturers, Caterpillar first got its name from Holt Manufacturing Company's remarkable tractor creation of 1905. What followed was the Caterpillar century, an era of engineering revolutions and world-changing earthmovers. Eric Orlemann serves as tour guide through this time of American mechanical know-how and muscle, offering us a rare close-up look at the technology of Caterpillar's most important equipment innovations, then and now. Packed with contemporary photographs, archival images, and information on state-of-the-art equipment design, Caterpillar Century traces the evolution of this icon of industry from its emergence in 1905 to its making of modern day heavy-equipment marvels and development of future design prototypes.

The International Symposium on "Cellular and Molecular Aspects of Biosynthesis and Action of the Plant Hormone Ethylenc", was held in Agen, France from August 31 st and September 4th, 1992. The planning and management of the scientific and social programme of the Conference were carried out jointly by the "Ethylene Research Group" of ENSAII^NP (Toulouse) and Agropole Congres Service (Agen). Since the last meetings in Israel (1984) and in Belgium (1988), ethylene physiology has gone through a period of exciting progress due to new developments in cellular and molecular biology. New methods and tools have been developed to better understand the role and functions of ethylene in fruit ripening, flower senescence, abscission, plant growth, and cell differentiation. Genes involved in ethylene biosynthesis have been characterized and transgenic plants with altered ethylene production have been generated. The feasibility of delaying fruit ripening or flower senescence by genetic manipulation is now demonstrated, thus opening new perspectives for the postharvest handling of plant products. Some progress has also been made on the understanding of ethylene action. However, much remains to be done in this area to elucidate the ethylene signal transduction pathway. Around 140 scientists from 20 countries attended the Symposium. They presented 47 oral reports and 40 poster demonstrations. All of them are published in these proceedings. It has been a pleasure for us to organize this important Symposium and to edit this book.

Vinogradoff, Sir Paul. Villainage in England: Essays in English Mediaeval History. Oxford: At the Clarendon Press, 1892. xii, 464 pp. Reprint available December, 2004 by The Lawbook Exchange, Ltd. ISBN 1-58477-477-0. Cloth. \$95. * This classic study was highly regarded by Maitland and Holdsworth. An unsigned article in the Encyclopaedia Britannica (11th. ed.) said it is "perhaps the most important book written on the peasantry of the feudal age and the village community in England; it can only be compared for value with F.W. Maitland's Domesday Book and Beyond." (28:100). Vinogradoff [1854-1925] argues that the Norman-era villain was the direct descendent of the Anglo-Saxon freeman, so the typical Anglo-Saxon settlement was a free community rather than a manor. An impressive work of original scholarship and synthesis, it "shed a wholly new light on the social and legal aspects of the institution of villainage.": Holdsworth, The Historians of English Law 86.
