In the late Middle Ages and the Early Modern period, Northern Europe was a crucible of political, maritime and economic activity. Ships from ports all around the Baltic Sea as well as from the Low Countries plied the Baltic waters, triggering market integration, migration flows, nautical innovations and the dissemination of cultural values. This archival guide is an essential research tool for scholars studying these Baltic connections, providing descriptions of almost 1000 archival collections concerning trade, shipping, merchants, commodities,

diplomacy, finances and migration in the years 1450-1800. These rich and varied sources kept at more than 100 repositories in Denmark, Estonia, Finland, Germany, Latvia, Lithuania, the Netherlands, Poland, Russia and Sweden are herewith collected for the first time.

Incidents involving rescue from road vehicles are dramatically increasing in frequency. There are some 3500 deaths on the road each year, with 35,000 serious injuries. Modern motor vehicles are becoming safer for occupants, due to advancement in technology, so persons are more likely to survive high impact speeds, but are also more likely to become entrapped. The Fire and Rescue Service, as the primary rescue service, requires national guidance to ensure a similar standard of response anywhere in the UK. This manual is designed to highlight current best practice with regard to vehicle rescue techniques and first responder trauma care. Each chapter forms an independent reference source, but the publication as a whole forms a complete guide. Chapters cover: vehicle design and construction; dealing

with incidents; safety procedures; operational procedures; extrication equipment; medical considerations and trauma care; Integrated Personal Development System (I.P.D.S.). Appendices cover: Highways Agency/Fire and Rescue Service memorandum of understanding; training and general information; and emergency services personnel (ESP) aide m  moire. The CD-ROM, "Vehicle extrication techniques", is a multi media guide to rescue tool handling and extrication techniques.

In a single, unique volume, Synthetics, Mineral Oils, and Bio-Based Lubricants, Second Edition offers property and performance information of fluids, theoretical and practical background to their current applications, and strong indicators for global market trends that will influence the industry for years to come.

Navy and Marine Corps Awards Manual Petrogav International
A roadmap to consistent, high-quality service for any organization
A service is typically something created to

serve a paying customer, whether internal or external. Some services consist of several processes linked together while others consist of a single process. This book introduces Design for Six Sigma (DFSS), a easy-to-master, yet highly effective data-driven method that prevents defects in any type of service process. The particular focus of this publication is service DFSS, which leads to what the authors term "a whole quality business," one that takes a proactive stance and gets things right the first time. Not only does the whole quality business produce a high-quality product and offer high-quality services, but it also operates at lower cost and higher efficiency, throughout the entire life cycle, than its competitors because all the links in the supply chain are optimized. Following a detailed overview that sets forth the basic premise and key concepts of service DFSS, the authors offer all the information and tools needed to take advantage of service DFSS within their own organizations, including:

- * Clear and in-depth coverage of the philosophical, organizational, and technical aspects of service DFSS
- * Step-by-step roadmap of the entire service DFSS deployment and execution process
- * Full discussions of all the key methods involved in service DFSS, including axiomatic design, design for X, the theory of inventive problem solving (TRIZ), transfer function, design scorecards, and Taguchi's method
- * Practical, illustrative examples that demonstrate how the theory is put into practice
- * Assistance in developing the necessary skills in applying DFSS in organizational settings

Problems and their solutions are provided at the end of each chapter to help readers grasp the key concepts they need to move forward in the text. Acclaro DFSS Light(r), a Java-based software package that implements axiomatic design processes discussed in Chapter Eight, is available for download from an accompanying Wiley ftp site. Acclaro DFSS Light(r) is a software product of

Axiomatic Design Solutions, Inc. This book is ideal as a reference to service DFSS for corporate executives, quality control managers, and process engineers, or as a complete training manual for DFSS teams. It is also a superior textbook for graduate students in management, operations, and quality assurance.

ANTI-SONNETS comprised the creation of one sonnet per day over a year, irrespective of personal circumstance. Each

sonnet's subject matter, and perhaps also the perceived quality of its artistic execution, would reflect the tribulations of daily life. ANTI-SONNETS aimed to challenge assumptions associated with the sonnet form, and to champion the ascendancy of context over content. SAAB SONETTS is part of the extended fall-out.
