Digitize your documents while reducing incoming and outgoing paper! Updated 03/21/2017 Join Joe Kissell as he helps you clear the chaos of an office overflowing with paper. With Joe's guidance you can develop a personal clean-up strategy and choose your Mac-compatible tools—a scanner and the software you need to perform OCR (optical character recognition)—plus devices and services for storing your digitized documents and tools to categorize, locate, and view your digital document collections. Once you have your gear in hand, Joe shows you how to convert your paper documents to digitized files and gives you ideas for how to organize your office workflow, explaining how to develop day-to-day techniques that reduce the amount of time you spend pressing buttons, launching software, and managing documents. Bonus! The book also comes with downloadable “folder action” AppleScripts that simplify the process of OCR-ing PDFs in Adobe Acrobat, ABBYY FineReader Express, PDFpen/PDFpenPro, and Readiris. Save or move a PDF in the appropriate folder, and the script does the rest! You'll master these paper-reducing skills:

- Scanning or photographing documents you find while out and about—business cards, receipts, menus, flyers, and more—so you keep only digitized versions. Joe discusses a variety of mobile scanning options, with an emphasis on using a camera-equipped iOS device, but with mention of a few options for Android smartphones.
- Creating a digitized image of your signature so you can sign and share documents digitally, rather than printing them for the sole purpose of signing them with a pen.
- Setting up your computer to send and receive faxes so you can avoid using a physical fax machine with paper input and output. Joe describes online fax services and using a fax modem (note that fax modem support is not available in macOS 10.12 Sierra). Joe also discusses standard techniques for reducing paper—paperless billing, online bank statements, reducing unwanted catalogs and junk mail, and more, as well as less common practices, such as paperless postal mail services and check depositing services. You'll find answers to numerous questions, including:

- What is a searchable PDF, and why is it key to a paperless office?
- What differentiates document scanners from other types of scanners?
- What's a book scanner?
- What if I need a mobile, portable scanner?
- What does TWAIN stand for, and should my scanner support it?
- Why do I need OCR software, and what features should I look for?
- What scanners and OCR products does Joe recommend?
- How can I automate my workflow for scanning documents?
- How should I name and file my digitized documents?
- What paper documents should I keep in physical form?
- How do I use common tools to add a signature to a PDF?
- How can I access my digital documents remotely?
- How should I back up my important digital documents?

Have you been searching for help as you try to teach a struggling learner? This is the book you have been looking for! Judi Munday draws from what she has learned in 30 years of teaching exceptional students and shares that practical knowledge with you in Teaching a Child with Special Needs at Home and at School: Strategies and Tools that Really Work! This is a highly readable and helpful guide for anyone who teaches a child with learning disabilities or high-functioning autism or Asperger's. Judi has packed it full of easy-to-use instructional strategies and advice about "what works" - for both parents who homeschool and for teachers who work with students with special needs. Since it is always difficult to find enough time to individualize, Judi makes sure that her teaching recommendations require little extra work or advance planning. She shows you how easy it is to modify or adapt textbooks and instructional materials. You will also learn about evidence-based instructional tools - such as graphic organizers and rubrics. Chapter topics include high-functioning autism/Asperger's and specific learning disabilities, along with a generous supply of specific

teaching strategies that apply to them. You can also learn more about effective instruction, assistive technology, and student education plans. Judi has the heart to share her wisdom to educate, encourage, and equip you to be a more effective teacher of your special learner.
