Engineer Manual

I have no manual

for this alarm and

no test

equipment.....i was

an avionics techie

in the RAF 20 years

ago, and whilst

competent not to
blow myself up i am
hardly current. My
questions are 1:is it
likely to be a dead
battery? 2:if so will i
need engineers
codes when i
replace the battery?
3;if so does
anybody no the
codes and
sequences? Many
thanks in advance

Security & intruder alarm systems - Scantronic | Eaton
Before programming the Control unit, the engineer must program an identification number into the NVM chip on each remote keypad in the system. This is achieved as follows: 1. Set the PROG switch on each keypad to

ON and the TEST switch to OFF. 2. 500r+ Installation and User Guide Enter Engineer Code. The Standby LED flashes. 3. Open the control unit lid. The control unit gives a double bleep, the a LED goes out and the Standby LED glows steadily. The control unit is now in programming mode. Clearing a Control unit For a New User To remove all programming, including detectors and Engineer and User codes (perhaps to reuse the control unit with another user) then, while ...
