"It is not simply that [Dos Passos] has a keen eye for people, but that he has a keen eye for so many different kinds of people."—The New York Times Marking the end of "one of the most ambitious projects that an American novelist has ever undertaken" (Time), *The Big Money* brings us back to America after the Great War, a nation on the upswing. Industrialism booms. The stock market surges. Lindbergh takes his solo flight. Henry Ford makes automobiles. From New York to Hollywood, love affairs to business deals, it is a country taking the turns too fast, speeding toward the crash of 1929. Ultimately, whether the novels of John Dos Passos's classic USA Trilogy are read together or separately, they paint a sweeping portrait of collective America—and showcase the brilliance and bravery of one of its most enduring and admired writers. *The Big Money*, focusing on a passionate pilot whose compromises culminate in despair and an actress led astray by her ambitions, completes this "fable of America's materialistic success and moral decline" (American Heritage).

[Surviving and Alcoholic Marriage and Living to Tell About It By: Susan Merrifield](#) *Surviving an Alcoholic Marriage and Living to Tell About It* is a true story. Susan Merrifield details her long, difficult relationship with an alcohol-abusing husband. Through

her journey, Merrifield provides advice to others who might be in a similar situation, hoping they will learn from her experience. This book does not necessarily give us a happy ending or a complete storyline that we so often crave. Instead, Merrifield follows a winding path that refuses to flirt with magical realism. As we learn Merrifield's personality, and the obstacles that stood in her way, we come to respect the everyday triumphs that defined her long, difficult relationship with a man controlled by the bottle.

Modern society has regularly, in recent years, been gripped by a series of headline making "scares" - from mad cow disease to SARS -- which have become one of the most conspicuous and damaging features of our modern world. This book is the first to tell the inside story of each of the major scares of the past two decades, showing how they have followed a remarkably consistent pattern. It analyzes the crucial role played in each case by scientists how have misread or manipulated the evidence; by media and lobbyists who eagerly promote the scare without regard to the facts; and finally by the politicians and officials who come up with an absurdly disproportionate response, leaving us all to pay the price, which may run into billions of dollars. *Scared to Death* culminates in a chillingly detailed account of the story behind what the authors believe has become the greatest scare of them all: the belief that the world faces disaster through manmade global warming. In a final chapter, the authors take on its proponents such as Al Gore in a devastating critique of the consensus on global warming and its consequences.

Inspired by the award-winning poet and actor 's acclaimed one-man play, a powerful coming-of-age memoir that reimagines masculinity for the twenty-first-century male. Award-winning poet, actor, and writer Carlos Andr é s G ó mez is a supremely gifted storyteller with a captivating voice whose power resonates equally on the live stage and on the page. In one of his most moving spoken-word poems, G ó mez recounts a confrontation he once had after accidentally bumping into another man at a club. Just as they were about to fight, G ó mez experienced an unexplainable surge of emotion that made his eyes well up with tears. Everyone at the scene jumped back, as if crying, or showing vulnerability, was the most insane thing that G ó mez could possibly have done. Like many men in our society, G ó mez grew up believing that he had to be ready to fight at all times, treat women as objects, and close off his emotional self. It wasn ' t until he discovered acting that he began to see the true cost of squelching one ' s emotions—and how aggression dominates everything that young males are taught. Statistics on graduation rates, employment, and teen and young-adult suicide make it clear that the young males in our society are at a crisis point, but G ó mez seeks to reverse these ominous trends by sharing the lessons that he has learned. Like Hill Harper ' s Letters to a Young Brother, Man Up will be an agent for positive change, galvanizing men—but also mothers, girlfriends, wives, and sisters—to rethink and reimagine the way all men interact with women, deal with violence, handle fear, and express emotion.

This book adopts an approach based on relational psychoanalysis, developed in the USA in and since the 1990s and guided by the self-psychology championed by Kohut and the Post-Kohutians. How people infected with HIV/AIDS live their lives is a growing concern in China. The book, based on relational psychoanalysis, explores their self-restoration, and more specifically, how adopting an attitude of "dying to live" helps them face tremendous challenges in life. By interviewing selected individuals at a given organization, the author focuses on their life experiences and on corresponding interventional mechanisms. The book ' s three most important features are as follows: 1) its application of self-psychology by Heinz Kohut into the context of psychological intervention; 2) a wealth of qualitative data gathered through in-depth interviews; and 3) the author ' s self-reflection and analysis. The book offers a valuable guide for graduate students, researchers, and policymakers alike. By interviewing selected individuals at a given organization, the book focuses on the life histories of selected individuals after being diagnosed with AIDS (screening HIV positive) and on corresponding interventional mechanisms. Further, it employs the self and self-object as key explanatory terms for the necessary psychotherapeutic interventions, and in order to create guidelines that sufficiently reflect the illness and corresponding interventions. Given its scope and focus, the book offers a valuable guide for graduate students, researchers, and policymakers alike.
