* Our summary is short, simple and pragmatic. It allows you to have the essential ideas of a big book in less than 30 minutes. By reading this

summary, you will discover how to learn everything you want to know in less than 20 hours. You will also discover : how to avoid the frustration of the beginning; why school learning is not suitable; techniques for learning more effectively; how to simplify everything that seems too complex; how to be more efficient and productive than ever. You never find time to learn meditation, paragliding or a foreign language? Why aren't you motivated when it's important to you? In reality, you are not a unique case. Most people don't either, for one simple reason: learning takes time and effort. The more you feel that your project

requires time and investment, the less energy you find to carry it out. But this difficulty is easily overcome: you don't have to become an expert to enjoy your new activity.

Whatever discipline you are attracted to, you can acquire a correct level very quickly - in less than 20 hours - by following the advice of "The First 20 Hours". You will no longer have excuses for not accessing the knowledge you've always dreamed of!

An informative and insightful source of knowledge, analysis, and the latest data on internationalization of the Indian higher education system. Offering an in-depth analysis of internationalization of higher education in India, this book explains how the phenomenon plays itself out, how to put it into practice on the home turf, and to do it in a way that it is available to all instead of catering to a select few. It applies relevant theoretical contexts, presents an extensive range of facts and figures as substantiating

evidence, and stacks up this knowledge against ground reality. With a sharp commentary on the state of affairs, the book argues that internationalization is the only way forward for India and policymakers, educationists, and academics must look towards other countries such as China and Brazil which have made a fruitful commitment to scale the global value chain by making internationalization of higher education a top agenda item.

When *The Playboy of the Western World* was first performed in Ireland in 1907, the play prompted a series of riots in response to its treatment of the Irish working class and the controversial glorification of the morally questionable main character, Christy Mahon, who stumbles into a bar in a remote Irish coastal village, claiming that he's just murdered his father.
A Revised Framework

The Floating Press
The Future of Industrial Man is the only book by Peter Drucker in which he systematically develops a basic social theory. He presents the requirements for any society to be functioning and legitimate, and then applies these general concepts to the special case of the industrial society. In his new introduction, Drucker

explains that his reference to mercantilism in *The Future of Industrial Man* can today be called neoconservatism, which, he asserts, denies rather than affirms the reality of industrial and postindustrial society. Drucker outlines the major shifts of previous centuries. He describes the move from an agrarian to an industrial

economy, illustrates the structure and dynamics of this new industrial order, and warns of the abuses inherent in the system if attempts are made to maintain it under anachronistic social conventions. He emphasizes the fact that the new industrial order must operate under a "legitimate" system of political power supported by social authority. He discusses the particular roles of the owners, the workers, the managers—the corporation itself—as he pinpoints the problem that he considers the most central and the most critical: how to maintain the continuing freedom of the individual in an increasingly intricate, bureaucratized world. Following the initial publication of this work, Jacques Barzun wrote in *The New Republic*, "Here is a book which is so perfectly planned and so transparently written as to read with almost indecent ease. . . . Each page is the fruit of much learning and long reflection. It should accordingly be studied, pondered over, analyzed word by word." According to W. H. Chamberlain of *The Atlantic Monthly*, "[Drucker]

possesses a fund of historical and economic knowledge." The Future of Industrial Man is a landmark study by a noted analyst of the modern corporation. It is of continuing importance to economists, industrial studies scholars, and professional The Fifth Discipline Fieldbook Americans can't get a good education

The first historically and internationally

comprehensive collection of its kind, *Essayists on the Essay* is a path-breaking work that is nothing less than a richly varied sourcebook for anyone interested in the theory, practice, and art of the essay. This unique work includes a selection of fifty distinctive pieces by American, Canadian, English,

European, and South American essayists from Montaigne to the present—many of which have not previously been anthologized or translated—as well as a detailed bibliographical and thematic guide to hundreds of additional works about the essay. From a buoyant introduction that provides a sweeping historical and

analytic overview of form. This collection provides essayists' thinking about their genre—a collective poetics of the essay—to the detailed headnotes offering pointed information about both the essayists themselves and the anthologized selections, to the richly detailed bibliographic sections, Essayists on the Essay is essential to anyone who cares about the

teachers, scholars, essayists, and readers with the materials they need to take a fresh look at this important but often overlooked form that has for too long been relegated to the role of service genre—used primarily to write about other more "literary" genres or to teach young

people how to write. Here, in a single celebratory volume, are four centuries of commentary and theory reminding us of the essay's storied history, its international appeal, and its relationship not just with poetry and fiction but also with radio, film, video, and new media.
