Water and Peace for the People  
This book proposes practical and objective solutions to the entrenched water conflicts in the Middle East. The author reveals and clarifies the complexity of the water conflicts, drawing on years of experience facilitating and chairing water negotiations in the region. The bottom line is: Unless the countries involved co-operate, the consequences will be devastating. The lack of plentiful and clean water for the people will not only result in severe human suffering, but could also have grave geopolitical consequences. The book covers four critical areas: the Euphrates and Tigris Rivers, where new documentation reveals alarming trends; the politically sensitive Golan Heights, with its water disputed by Israel and Syria; the Hasbani water dispute between Lebanon and Israel; the longstanding water resource dispute between the Israelis and Palestinians

Many inherited diseases are due to enzyme deficiencies located within the subcellular 'organelles'. Such diseases can have devastating effects such as mental impairment, muscle wasting or retarded growth. Early and correct diagnosis is vital so that appropriate care can be given. This book will be the first to provide a comprehensive coverage of these conditions with emphasis both on clinical and laboratory recognition. This unique book provides a compendium of how to recognize organelle diseases and how to confirm their diagnosis using clinical, medical and laboratory procedures. The chapters on basic biology explain the basic function of each organelle and explains how each group of diseases may be caused.
