Chemistry for grades 9 to 12 is designed to aid in the review and practice of chemistry topics. Chemistry covers topics such as metrics and measurements, matter, atomic structure, bonds, compounds, chemical equations, molarity, and acids and bases. The book includes realistic diagrams and engaging activities to support practice in all areas of chemistry. --The 100+ Series science books span grades 5 to 12. The activities in each book reinforce essential science skill practice in the areas of life science, physical science, and earth science. The books include engaging, grade-appropriate activities and clear thumbnail answer keys. Each book has 128 pages and 100 pages (or more) of reproducible content to help students review and reinforce essential skills in individual science topics. The series will be aligned to current science standards.

HSAP Test Strategy [WWW.MathNotion.com](http://WWW.MathNotion.com)

Building on the success of the Journey Prize-shortlisted title story, the stories of *How Does a Single Blade of Grass Thank the Sun?* present an updated and whimsical new take on what it means to be Canadian. Lau alludes to the personal and political histories of a number of young Asian Canadian characters to explain their unique perspectives of the world, artfully fusing pure delusion and abstract perception with heartbreaking reality. Correspondingly, the book's title refers to an interview with Chinese basketball star Yao Ming, who when asked about the Shanghai Sharks, the team that shaped his formative sporting years, responded, "How does a single blade of grass thank the sun?" Lau's stories feature the children and grandchildren of immigrants, transnational adoptees and multiracial adults who came of age in the 1990s—all struggling to find a place in the Western world and using the only language they know to express their hopes, fears and expectations.
