The Educational Times, and Journal of the College of Preceptors Pascal Press

Excel Test Skills - General Ability Tests Year 3 is the first in a four-book series for Years 3-6 which help students with the skills they need to excel in general ability tests. General ability testing covers areas such as logic, general knowledge and reasoning, and forms part of many primary school tests used throughout Australia. The book contains: sample questions covering all the main question types found in Year 3 general ability tests a section of practice questions with hints on how to answer each different type of question twelve practice tests to measure progress helpful advice for sitting general ability tests answers to all questions, plus explanations when required An amount of mystery surrounds general ability testing. This is probably because it is not an actual subject such as Science or Mathematics. General ability testing is based upon the student's ability to think and reason, but most of the questions are based on normal classroom subject matter. This practice book is intended to demystify GA tests, thereby giving the student the confidence to respond positively to the test and maximise his/her score.

This book is open access under a CC BY-NC 2.5 license. This book describes the extensive contributions made toward the advancement of human assessment by scientists from one of the world's leading research institutions, Educational Testing Service. The book's four major sections detail research and development in measurement and statistics, education policy analysis and evaluation, scientific psychology, and validity. Many of the developments presented have become de-facto standards in educational and psychological measurement, including in item response theory (IRT), linking and equating, differential item functioning (DIF), and educational surveys like the National Assessment of Educational Progress (NAEP), the Programme of international Student Assessment (PISA), the Progress of International Reading Literacy Study (PIRLS) and the Trends in Mathematics and Science Study (TIMSS). In addition to its comprehensive coverage of contributions to the theory and methodology of educational and psychological measurement and statistics, the book gives significant attention to ETS work in cognitive, personality, developmental, and social psychology, and to education policy analysis and program evaluation. The chapter authors are long-standing experts who provide broad coverage and thoughtful insights that build upon decades of experience in research and best practices for measurement, evaluation, scientific psychology, and education policy analysis. Opening with a chapter on the genesis of ETS and closing with a synthesis of the enormously diverse set of contributions made over its 70-year history, the book is a useful resource for all interested in the improvement of human assessment.

Circular ACER Press

Scholarship and selection tests aim to identify the very best students for elite schools and accelerated learning programs. Many outstanding students sit these tests, but there are relatively few scholarship and select-entry places offered. As a result, preparing, applying and sitting for a scholarship or selection test can be a challenging process for students and parents - but this experience can also provide an opportunity for students to develop their academic skills and abilities in valuable ways. Scholarship and Selection Tests: A guide for students and parents aims to help students and parents to better understand scholarship and selection tests, so that students can develop their full potential and parents can assist their children to do their best when it counts. This second edition contains updated advice on preparing for scholarship and selection tests, including all-new: 1. Information on dealing with gifted and talented students 2. Resources on select-entry accelerated, high-achievement and gifted and talented programs 3. Details on specific scholarship and selection tests 4. Case studies and insights from participating schools It also includes a limited number of example questions and sample answers with detailed explanations; strategies and approaches; suggestions on how students can develop the skills and abilities that the tests target; as well as guidance on how to manage expectations and better understand results.

A guide for students and parents Pascal Press

Most parents dream of giving their children the best possible education. However an education – primary, secondary and tertiary – costs money. Parents of a child born in 2006 can pay approximately \$250K for a child's lifetime education according to the latest research from the Australian Scholarships Group. And costs are constantly on the rise. Investing in Your Child's Future is aimed at parents and future parents, grandparents and other family members, and covers children's education from pre-school to tertiary studies. It is designed to show readers how they can secure and contribute to their children's future and can benefit from a higher education at the institution of their choice, without sacrificing their lifestyle or financial security, and regardless of their income. Investing in Your Child's Future shows readers how they can finance all, or some, of their children's education by planning ahead, implementing simple strategies and saving money as early and as regularly as possible. When your children are young, it's easy to delay funding their education as it is not an immediate expense. However, education is a major expense, regardless of whether you choose a private or public education, and the sooner you start saving, the more money you will accumulate, and the sooner you can stop worrying about your child's future.

Skills and Strategies Years 5-6 Pascal Press
