1. Characteristics of Waves 2. Sound 3. The Electromagnetic Spectrum 4. Light

[Electricity and Magnetism](#) The Rosen Publishing Group, Inc

1. Fresh Water 2. Freshwater Resources 3. Ocean Motions 4. Ocean Zones

Science Explorer Earth Science McGraw-Hill/Glencoe

Students will reach for the stars without having to leave their own backyards when performing astronomy experiments from Janice VanCleave's new crazy, kooky, and quirky collection. They will find the North Star, demonstrate the path of a satellite, and even build their own astronomical tools using household items. Engaging analyses of experiment results will inspire readers to expand their thinking and to understand astronomy from practical, mathematical, and historical angles alike. Featuring color illustrations and safe, simple step-by-step instructions, students will love learning just how much fun science can be with these twenty-four astronomy experiments.

Set of books for classroom use in a middle school science curriculum; all-in-one teaching resources volume includes lesson plans, teacher notes, lab information, worksheets, answer keys and tests.

Science Explorer Pearson Prentice Hall

A spectacular and erotically charged psychological novel from the acclaimed author of *Being There* and *The Painted Bird*. George Levanter is an idea man, a small investor, an international playboy, and a ruthless dealmaker whose life is delivered in a series of scorching encounters, each more incredible than the last. From Moscow to Paris, from a Manhattan skyscraper to a California mass murder, *Blind Date* is a dizzying vision of life among the beautiful people and the thrill-seekers that shows Jerzy Kosinski at the height of his power.

"Kosinski's vitality and inventiveness are as irresistible as ever." —*Time*

Introduction to Mineralogy and Petrology Open Road + Grove/Atlantic

#1 New York Times bestseller A TIME Magazine Best Book of the Year A NPR Best

Book of 2017 A Boston Globe Best Book of 2017 "Moments of human intimacy jostle

with scenes that inspire cosmic awe, and the broad diversity of Jeffers's candy-

colored humans...underscores the twin messages that 'You're never alone on Earth'

and that we're all in this together."--*Publisher's Weekly* (starred review) "A true

work of art."--*BuzzFeed* Oliver Jeffers, arguably the most influential creator of

picture books today, offers a rare personal look inside his own hopes and wishes for

his child--and in doing so gifts children and parents everywhere with a gently sweet

and humorous missive about our world and those who call it home. Insightfully sweet,

with a gentle humor and poignancy, here is Oliver Jeffers' user's guide to life on

Earth. He created it specially for his son, yet with a universality that embraces all

children and their parents. Be it a complex view of our planet's terrain (bumpy, sharp,

wet), a deep look at our place in space (it's big), or a guide to all of humanity (don't

be fooled, we are all people), Oliver's signature wit and humor combine with a value

system of kindness and tolerance to create a must-have book for parents. Praise for

*Here We Are*: "A sweet and tender distillation of what every Earthling needs to

know and might well spend a lifetime striving to achieve. A must-purchase for new

parent shelves"--*School Library Journal* "From the skies to the animal kingdom to the people of the world and lots of other beautifully rendered examples of life on Earth, *Here We Are* carries a simple message: Be kind." --NPR "[An] enchanting gem of a children's book"--NBC's *Today Show* "A must-have book for parents."--*Gambit* "A celebration of people all shapes and sizes, and of the beauty and mystery of our Earth."--*Booklist* "...a beautifully illustrated guide to living on Earth and being a good person."--*Brightly* "[*Here We Are*] is a tour through the land, the sea, the sky, our bodies; dioramas of our wild diversity....[Jeffers] is the master of capturing the joy in our differences."--*New York Times Book Review*
