Headstart Science series consists of eight well-written textbooks for classes 1 – 8. The series, as the name suggests, aims to provide a head start to the learners for developing a scientific outlook. The books have been formulated as per the Continuous and Comprehensive Evaluation (CCE) pattern of Central Board of Secondary Education (CBSE). The authors have put in their best efforts while writing the books keeping in mind the psychological requirements of the learners as well as the pedagogical aspirations of the teachers. The ebook version does not contain CD.

Headstart Science - 4 McGraw-Hill Education

Includes the complete student's text with answers provided in an easy to read second colour. To assist teachers in the implementation of this material, state syllabus references have been provided, as a guide only, for Victoria (CSFII), NSW and Queensland.

Cambridge Primary Science Skills Builder 6 Vikas Publishing House

This textbook focuses on a set of skills-based learning outcomes common among undergraduate environmental programs. It covers critical scientific skills and ways of thinking that bridge the gap between the knowledge-based content of introductory environmental textbooks and the professional skills students of the environment need to succeed in both their academic programs and professional careers. This emphasis on skills is gaining more traction among academic programs across the country as they shift focus from knowledge delivery to learning outcomes and professional competencies. The book features clear methodological frameworks, engaging practice exercises, and a range of assessment case studies suitable for use across academic levels. For introductory levels, this text uses guided practice exercises to expose students to the skills they will need to master. At the capstone level, this text allows students to apply the knowledge they have gained to real-world issues and to evaluate their competency in key programmatic learning outcomes. A detailed answer key with rubrics customized for specific questions and sample answers at various competency levels is available to verified course instructors. Access to these answer key resources can be obtained by contacting the

Critical Skills for Environmental Professionals Vikas Publishing House

Developing Early Science Skills Outdoors provides practitioners with practical planning for how to develop and enhance the outdoor area to facilitate science learning. The activities throughout the book are low cost and easy to set up, aiming to reassure practitioners and give them confidence to plan more scientific learning experiences outdoors. This is further supported with planning guidance and resource ideas, as well as advice on observation and assessment, including suggestions for how to reduce the paperwork burden and a useful observation template. The book includes an introduction to each method, explaining why it is important and outlining the fundamental skills and concepts that underpin it; ideas for adult-led and adult-initiated activities that aim to develop children's early knowledge, skills and understanding; suggestions for how to enhance continuous outdoor provision so that it promotes the use of each method of scientific enquiry; pointers and tips about teaching science in the early years and ideas for how to involve parents and carers.
