Sports Pack brings together three stories of athletes at the top of their game and the men who coach--and love!--them. Golden explores life after the Olympics. Retired gold-medalist Justin believes his best years are behind him. Not only did he lose his reason for being, he lost his coach and lover, Chris. Chris cut ties with Justin, not wanting to hold the ex-swimmer back. When he realizes he's made a mistake, it might be too late to gain Justin's trust again. Making a Splash finds diving coach Vince Dawson looking to return to the Olympic scene. He discovers Austin Brody at the local pool, making amazing dives without even trying. While Vince is gung ho to take Austin under his wing, Austin isn't sure it's the life he wants. Add in a growing attraction, and they have plenty of obstacles to overcome on the road to the Olympics. In Perfect 10, top gymnast Christopher Allen is determined to compete again, despite a serious injury. Coach Brian Rainings needs someone to believe in, and he admires the spirit and determination driving Chris to succeed. Secrets, hidden dangers, and family troubles plague them, though, and they have to face the fact that Chris might never compete again.

Attract Mode: The Rise and Fall of Coin-Op Arcade Games Houghton Mifflin Harcourt

From their haunts in the shadowy corner of a bar, front and center at a convenience store, or reigning over a massive mall installation bursting with light, sound, and action, arcade games have been thrilling and addicting quarter-bearers of all ages ever since Pong first lit up its paddles. Whether you wanted a few minutes’ quick-twitch exhilaration or the taste of three-initial immortality that came with topping the high score screen, you could get it from the diverse range of space shooters, dot-eating extravaganzas, quirky beat-’em-ups, and more that have helped define pop culture for more than four decades. In Attract Mode: The Rise and Fall of Coin-Op Arcade Games, author Jamie Lendino celebrates both the biggest blockbusters (Pac-Man, Star Wars: The Arcade Game) and the forgotten gems (Phoenix, Star Castle) of the Golden Age of coin-op gaming, and pulls back the curtain on the personalities and the groundbreaking technologies that brought them to glitzy, color-drenched life in the U.S., Japan, and all over the world. You’ll start your journey exploring the electromechanical attractions and pinball games of the early 20th century. Next, you’ll meet the earliest innovators, who used college computers and untested electronics to outline the possibilities of the emerging form, and discover the surprising history behind the towering megahits from Nintendo, Sega, and others that still inform gaming today. Then you’ll witness the devastating crash that almost ended it all—and the rebirth no one expected. Whether you prefer the white-knuckle gameplay of Robotron: 2084, the barrel-jumping whimsy of Donkey Kong, or the stunning graphics and animation of Dragon’s Lair, Attract Mode will transport you back to the heyday of arcade games and let you relive—or experience for the first time—the unique magic that transformed entertainment forever.

Since the Western world first became aware of the existence of Neanderthals, this Pleistocene human has been a regular focus of interest among specialists and also among the general public. In fact, we know far more about Neanderthals than we do about any other extinct human population. Furthermore, over the past 150 years no other palaeospecies has been such a constant source of discussion and fierce debate among palaeoanthropologists and archaeologists. This book presents the status of our knowledge as well as the methods and techniques used to study this extinct population and it suggests perspectives for future research.

School refusal affects up to 5% of children and is a complex and stressful issue for the child, their family and school. The more time a child is away from school, the more difficult it is for the child to resume normal school life. If school refusal becomes an ongoing issue it can negatively impact the child ’ s social and educational development. Psychologist Joanne Garfield spends most of her working life assisting parents, teachers, school counsellors, caseworkers, and community policing officers on how best to deal with school refusal. Now her experiences and expertise are available in this easy-to-read practical book. Overcoming School Refusal helps readers understand this complex issue by explaining exactly what school refusal is and provides them with a range of strategies they can use to assist children in returning to school. Areas covered include: • types of school refusers • why children refuse to go to school • symptoms • short term and long term consequences • accurate assessment • treatment options • what parents can do • what schools can do • dealing with anxious high achievers • how to help children on the autism spectrum with school refusal

California Gas Mileage Guide for New Car Buyers National Geographic Books

A surprisingly little-known marque today, Elcar once ranked among the finest vehicles on American roads. Built to exacting standards in Elkhart, Indiana, an Elcar could compete head-to-head on the basis of performance, quality, or price with the products of much larger manufacturers. Ultimately done in by weak distribution and the ravages of the Depression, Elcar today stands as an example of an ambitious company that transformed itself, successfully if temporarily, from a maker of buggies and harnesses into a respected car manufacturer in the early days of the automotive age. This remarkably exhaustive history, researched over several decades from all available sources, including interviews with former Elcar employees, details all Elcar models and the Pratt vehicles that preceded them, as well as the personalities behind the cars. Extensive appendices provide a complete model history, with specifications; a full corporate chronology; an illustrated accounting of all Elcars and Pratts known to survive whole or in part today; a roster of company employees; a descriptive list of all ads and brochures ever produced by the company; and a wealth of other data that can be found nowhere else. Lavishly illustrated and surpassingly thorough, this book is a well of information on a significant but forgotten line of automobiles.

Dreamed up by drivers trying to outdo each other on the mountain passes of Japan, the art of the sideways descent of a switchback-what Wired described as "the fishtailing ballet of burning rubber called drifting"-has made it to the United States in a big way. What began as a new kind of daredevil driving among teens has, over two decades, become a sanctioned sport, making its way across the Pacific through video games and magazines, anime and the Internet, to take root in California's fertile underground racing culture. Drifting tells the story of drifting from its arrival on the West Coast to its emergence as the hottest form of motorsport in the United States. A dramatic visual record of the sport in America that includes over 400 photos, the book also profiles the people, teams, techniques, web sites, publications, videos, and trends that have made drifting the phenomenon that it is today. For the curious newcomer, author Antonio Alvendia's introduction succinctly explains what drifting is, setting the stage for the thrilling automotive drama that then unfolds. For the veteran drifting fan, this book is the first illustrated book on the latest motorsport to conquer the world.

Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Nortup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US,on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

"A very fun way to learn about where quantum physics comes from and the strange, even astonishing places it has gone." —Peter Galison, Harvard University, author of Einstein’s Clocks, Poincaré’s Maps From multiverses and quantum leaps to Schrödinger’s cat and time travel, quantum mechanics has irreversibly shaped the popular imagination. Entertainers and writers from Lady Gaga to David Foster Wallace take advantage of its associations and nuances. In The Quantum Moment, philosopher Robert P. Crease and physicist Alfred Scharff Goldhaber recount the fascinating story of how the quantum jumped from physics into popular culture, with brief explorations of the underlying math and physics concepts and descriptions of the fiery disputes among figures including Einstein, Schrödinger, and Niels Bohr. Understanding and appreciating quantum imagery, its uses and abuses, is part of what it means to be an educated person in the twenty-first century. The Quantum Moment serves as an indispensable guide.
