Fresh from the Farm 6pk Haynes Manuals N. America, Incorporated Sports Pack brings together three stories of athletes at the top of their game and the men who coach--and love!--them. Golden explores life after the Olympics. Retired gold-medalist Justin believes his best years are behind him. Not only did he lose his reason for being, he lost his coach and lover, Chris. Chris cut ties with Justin, not wanting to hold the ex-swimmer back. When he realizes he's made a mistake, it might be too late to gain Justin's trust again. Making a Splash

finds diving coach Vince Dawson looking to return to the Olympic scene. He discovers Austin Brody at the local pool, making amazing dives without even trying. While Vince is gung ho to take Austin under his wing, Austin isn't sure it's the life he wants. Add in a growing attraction, and they have plenty of obstacles to overcome on the road to the Olympics. In Perfect 10, top gymnast Christopher Allen is determined to compete again, despite a serious injury. Coach Brian Rainings needs someone to believe in, and he admires the spirit and determination driving Chris to succeed. Secrets, hidden dangers, and family troubles plague them, though, and they have to face the fact that Chris might never

compete again.

California Gas Mileage Guide for New Car Buyers Pan Macmillan

This multidisciplinary volume considers the role of both public health and mental health policies and practices in the prevention of mass atrocity, including war crimes, crimes against humanity, and genocide. The authors address atrocity prevention through the framework of primary (pre-conflict), secondary (mid-conflict), and

tertiary (post-conflict) settings. They examine the ways in which public health and mental health scholars and practitioners currently orient their research and interventions and the ways in which we can adapt frameworks, methods, tools, and practice toward a more sophisticated and truly interdisciplinary understanding and application of atrocity prevention. The book brings together diverse fields of study by global north and global south authors in diverse contexts. It culminates in a narrative that demonstrates the state of the current fields on intersecting themes within public health, mental health, and mass atrocity prevention and the future potential directions in which these intersections could go. Such discussions will serve to influence both policy makers and practitioners in these fields toward developing, adapting, and testing frames and tools for atrocity prevention. Multidisciplinary perspectives are represented among editors and authors, including law, political science, international studies, public health, mental health, philosophy, clinical psychology, social psychology, history, and peace studies.

School refusal affects up to 5% of children and is a complex and stressful issue for the child, their family and school. The more time a child is away from school, the more difficult it is for the child to resume normal school life. If school refusal becomes an ongoing issue it can negatively impact the child ' s social and educational development. Psychologist Joanne Garfi spends most of her working life assisting parents, teachers, school counsellors, caseworkers, and community policing officers on how best to deal with school refusal. Now her experiences and expertise are available in this easy-to-read

practical book. *Overcoming School Refusal* helps readers understand this complex issue by explaining exactly what school refusal is and provides them with a range of strategies they can use to assist children in returning to school. Areas covered include:

- types of school refusers
- why children refuse to go to school
- symptoms
- short term and long term consequences
- accurate assessment
- treatment options
- what parents can do
- what schools can do
- dealing with anxious high achievers
- how to help children on the autism spectrum with school refusal

Since the Western world first became aware of the existence of Neanderthals, this Pleistocene

human has been a regular focus of interest among specialists and also among the general public. In fact, we know far more about Neanderthals than we do about any other extinct human population. Furthermore, over the past 150 years no other palaeospecies has been such a constant source of discussion and fierce debate among palaeoanthropologists and archaeologists. This book presents the status of our knowledge as well as the methods and techniques used to study this extinct population and it suggests perspectives for future research.

The Honda Myth: The Genius and His Wake
National Geographic Books

Dreamed up by drivers trying to outdo each other on the mountain passes of Japan, the art of the sideways descent of a switchback-what *Wired* described as "the fishtailing ballet of burning rubber called drifting"-has made it to the United

States in a big way. What began as a new kind of daredevil driving among teens has, over two decades, become a sanctioned sport, making its way across the Pacific through video games and magazines, anime and the Internet, to take root in California's fertile underground racing culture. Drifting tells the story of drifting from its arrival on the West Coast to its emergence as the hottest form of motorsport in the United States. A dramatic visual record of the sport in America that includes over 400 photos, the book also profiles the people, teams, techniques, web sites, publications, videos, and trends that have made drifting the phenomenon that it is today. For the curious newcomer, author Antonio Alvendia's introduction succinctly explains what drifting is, setting the stage for the thrilling automotive drama that then unfolds. For the veteran drifting fan, this book is the first illustrated book on the latest

motorsport to conquer the world.

"A very fun way to learn about where quantum physics comes from and the strange, even astonishing places it has gone." —Peter Galison, Harvard

University, author of Einstein ' s Clocks, Poincar é ' s Maps From multiverses and quantum leaps to Schr ö dinger ' s cat and time travel, quantum mechanics has irreversibly shaped the popular imagination. Entertainers and writers from Lady Gaga to David Foster Wallace take advantage of its associations and nuances. In *The Quantum Moment*, philosopher Robert P. Crease and physicist Alfred Scharff Goldhaber recount the fascinating story of how the quantum jumped from physics into popular culture, with brief explorations of the underlying math and physics concepts and descriptions of the fiery disputes among figures including Einstein, Schr ö dinger, and Niels Bohr. Understanding and appreciating quantum imagery, its uses and abuses, is part of what it means to be an educated person in the twenty-first century. *The Quantum Moment* serves as an indispensable guide.

While square-rigged sailing ships, steamboats

and ferries, and ever-larger cruise and cargo-carrying vessels have made their mark on Puget Sound's maritime history, no other vessels have captured the imagination of shore-bound seafarers like tugboats. Beginning in the 1850s when the first steam-powered tugboats arrived in the Sound from the East Coast via San Francisco, company owners and their crews competed fiercely for business, towing ships, log rafts, and barges. The magnetic attraction of powerful, tough tugs both large and small is unexplainable but enduring. This book, featuring about 200 rare historic images and carefully researched text, tells the colorful story of tug boating on Puget Sound.
