As Toyota skids into an ocean of problems and uncertainty continues in the U.S. automotive industry, *Lemon-Aid Used Cars and Trucks 2011/2012* shows buyers how to pick the cheapest and most reliable vehicles from the past 30 years. *Lemon-Aid* guides are unlike any other car and truck books on the market. Phil Edmonston, Canada's automotive Dr. Phil for 40 years, pulls no punches. Like five books in one, *Lemon-Aid Used Cars and Trucks* is an exposé of car scams and gas consumption lies; a do-it-yourself service manual; an independent guide that covers beaters, lemons, and

collectibles; an archive of secret service bulletins granting free repairs; and a legal primer that even lawyers can't beat! Phil delivers the goods on free fixes for Chrysler, Ford, and GM engine, transmission, brake, and paint defects; lets you know about Corvette and Mustang tops that fly off; gives the lowdown on Honda, Hyundai, and Toyota engines and transmissions; and provides the latest information on computer module glitches. Their Culture, Environment, and Use PAR This book could be called "The Intelligent Person's Guide to Economics." The title expresses Duncan Foley's belief that economics at its most abstract and interesting level is a speculative

philosophical discourse, not a deductive or inductive science. Adam's fallacy is the attempt to separate the economic sphere of life, in which the pursuit of self-interest is led by the invisible hand of the market to a socially beneficial outcome, from the rest of social life, in which the pursuit of self-interest is morally problematic and has to be weighed against other ends.

"This is the first serious biography of the exuberant man who transformed the Sears, Roebuck company into the country's most important retailer. He was also one of the early 20th century's notable philanthropists.... The richness of primary evidence continually delights." -- Judith

Sealand, author of *Private Wealth and Public Life* "[No] mere philanthropist [but a] subtle, stinging critic of our racial democracy." -- W. E. B. DuBois on Julius Rosenwald In this richly revealing biography of a major, but little-known, American businessman and philanthropist, Peter Ascoli brings to life a portrait of Julius Rosenwald, the man and his work. The son of first-generation German Jewish immigrants, Julius Rosenwald, known to his friends as "JR," apprenticed for his uncles, who were major clothing manufacturers in New York City. It would be as a men's clothing salesperson that JR would make his fateful encounter with Sears, Roebuck and Company, which he eventually fashioned into the greatest mail order firm in the world. He also founded Chicago's Museum of Science and Industry. And in the American South Rosenwald helped support the building of the more than 5,300 schools that bore his name. Yet the charitable fund he created during World War I went out of

existence in 1948 at his expressed wish. Ascoli provides a fascinating account of Rosenwald's meteoric rise in American business, but he also portrays a man devoted to family and with a desire to help his community that led to a lifelong devotion to philanthropy. He tells about Rosenwald's important philanthropic activities, especially those connected with the Rosenwald schools and Booker T. Washington, and later through the Rosenwald Fund. Ascoli's account of Rosenwald is an inspiring

story of hard work and success, and of giving back to the nation in which he prospered.
