Citrus greening, a disease that reduces yield, compromises the flavor, color, and size of citrus fruit and eventually kills the citrus tree, is now present in all 34 Floridian citrus-producing counties. Caused by an insect-spread bacterial infection, the disease reduced citrus production in 2008 by several percent and

continues to spread, threatening the existence of Florida's \$9.3 billion citrus industry. A successful citrus greening response will focus on earlier detection of diseased trees, so that these sources of new infections can be removed more quickly, and on new methods to control the insects that carry the bacteria. In the longer term, technologies such as genomics could be used to develop new citrus strains that are resistant to both the bacteria and the insect.

It is often said that the poet Homer "educated" ancient Greece. Joseph J. Foy and Timothy M. Dale have assembled a team of notable scholars who argue, quite persuasively, that Homer Simpson and his ilk are educating America and offering insights into the social order and the human condition. Following Homer Simpson Goes to Washington (winner of the John G. Cawelti Award for Best Textbook or Primer on American and Popular Culture) and Homer Simpson Marches on Washington, this exceptional volume reveals how books like J. R. R. Tolkien's *The Hobbit* and J. K. Rowling's *Harry Potter*, movies like *Avatar* and *Star Wars*, and television shows like *The Office* and *Firefly* define Americans' perceptions of society. The authors expand the discussion to explore the ways in which political theories play out in popular culture. *Homer Simpson Ponders Politics* includes a foreword by fantasy author Margaret Weis (coauthor/creator of the *Dragonlance* novels and game world) and is divided according to eras and themes in political thought: The first section explores civic virtue, applying the work of Plato and Aristotle to modern media. Part 2 draws on the philosophy of Hobbes, Locke, Rousseau, and Smith as a framework for understanding the role of the state. Part 3 explores the work of theorists such as Kant and Marx, and the final section investigates the ways in which movies and newer forms of electronic

media either support or challenge the underlying assumptions of the democratic order. The result is an engaging read for undergraduate students as well as anyone interested in popular culture.

Medieval Arabic Historiography is concerned with social contexts and narrative structures of pre-modern Islamic historiography written in Arabic in seventh and thirteenth-century Syria and Egypt. Taking up recent theoretical reflections on historical writing in the European Middle Ages, this extraordinary study combines approaches drawn from social sciences and literary studies, with a particular focus on two well-known texts: Abu Shama's *The Book of the Two Gardens*, and Ibn Wasil's *The Dissipater of Anxieties*. These texts describe events during the life of the sultans Nur-al-Din and Salah al-Din, who are primarily known in modern times as the champions of the anti-Crusade movement. Hirschler shows that these two authors were active interpreters of their society and has considerable room for manoeuvre in both their social environment and the shaping of their texts. Through the use of a fresh and original theoretical approach to pre-modern Arabic historiography, Hirschler presents a new understanding of these texts which have before been relatively neglected, thus providing a significant contribution to the burgeoning field of historiographical studies.
