Publishing is one of the oldest and most influential businesses in the world. It remains an essential creative and knowledge industry, worth over \$140 billion a year, which continues to shape our education and culture. Two trends make this a particularly exciting time. The first is the revolution in communications technology that has transformed what it means to publish; far from resting on their laurels and retreating into tradition, publishers are doing as they always have - staying on the cutting edge. The second is the growing body of academic work that studies publishing in its many forms. Both mean that there has never been a more important time to examine this essential practice and the current state of knowledge. The Oxford Handbook of Publishing marks the coming of age of the scholarship in publishing studies with a comprehensive exploration of current research, featuring contributions from both industry professionals and internationally renowned scholars on subjects such as copyright, corporate social responsibility, globalizing markets, and changing technology. This authoritative volume looks at the relationship of the book publishing industry with other media, and how intellectual property underpins what publishers do. It outlines the complex and risky economics of the industry and examines how marketing, publicity, and sales have become ever more central aspects of business practice, while also exploring different sectors in depth and giving full treatment to the transformational and much discussed impact of digital publishing. This Handbook is essential reading for anyone interested in publishing, literature, and the business of media, entertainment, culture, communication, and information.

The Rough Guide to Great Britain Macmillan

On the 18th September 2014, a mere 700-and-a-bit years after the Battle of Bannockburn, the struggle for power between Scotland and England will reach another milestone - this time probably without the swords, horses and armour. It is, without question, the most serious subject of the year, but there is a funny side too. Now Ian Black, master of the witty remark, king of the one-liner and enthusiastic unfurler of the Saltire sets his mind to the lighter side of Independence. With more pro-Independence and anti-No-voter jokes and tales than you can shake a stick at, Scotland vs England is the antidote to a very serious year. This book explains that the new Scots currency will be the Dreichma, perfect if our usual weather combines with Greek-style financial meltdown anytime in the future, or possibly the Punt, though apparently all of the punts are in the south-east of England. Mr Black also explains that occasional mutterings of "dirty English bastards" north of the border refer not to the great majority of English folk but to the filthy goings-on in Westminster. And there are answers to some of the great questions, like: "What goes 'putt' and what goes 'putt, putt, putt, putt'", to which the answer is: a Scottish golfer and an English golfer on the Old Course at St Andrews. Scotland vs England may not help you make up your mind about which way to vote, but in the serious months ahead when all will seem lost and there will be no escape from politicians, it will be very welcome.

In *The Soul of the World*, renowned philosopher Roger Scruton defends the experience of the sacred against today's fashionable forms of atheism. He argues that our personal relationships, moral intuitions, and aesthetic judgments hint at a transcendent dimension that cannot be understood through the lens of science alone. To be fully alive—and to understand what we are—is to acknowledge the reality of sacred things. Rather than an argument for the existence of God, or a defense of the truth of religion, the book is an extended reflection on why a sense of the sacred is essential to human life—and what the final loss of the sacred would mean. In short, the book addresses the most important question of modernity: what is left of our aspirations after science has delivered its verdict about what we are? Drawing on art, architecture, music, and literature, Scruton suggests that

the highest forms of human experience and expression tell the story of our religious need, and of our quest for the being who might answer it, and that this search for the sacred endows the world with a soul. Evolution cannot explain our conception of the sacred; neuroscience is irrelevant to our interpersonal relationships, which provide a model for our posture toward God; and scientific understanding has nothing to say about the experience of beauty, which provides a God's-eye perspective on reality. Ultimately, a world without the sacred would be a completely different world—one in which we humans are not truly at home. Yet despite the shrinking place for the sacred in today's world, Scruton says, the paths to transcendence remain open.

The news is everywhere. We can't stop constantly checking it on our computer screens, but what is this doing to our minds? We are never really taught how to make sense of the torrent of news we face every day, writes Alain de Botton (author of the best-selling *The Architecture of Happiness*), but this has a huge impact on our sense of what matters and of how we should lead our lives. In his dazzling new book, de Botton takes twenty-five archetypal news stories—including an airplane crash, a murder, a celebrity interview and a political scandal—and submits them to unusually intense analysis with a view to helping us navigate our news-soaked age. He raises such questions as Why are disaster stories often so uplifting? What makes the love lives of celebrities so interesting? Why do we enjoy watching politicians being brought down? Why are upheavals in far-off lands often so boring? In *The News: A User's Manual*, de Botton has written the ultimate guide for our frenzied era, certain to bring calm, understanding and a measure of sanity to our daily (perhaps even hourly) interactions with the news machine. (With black-and-white illustrations throughout.)

The experience of being a Muslim in Scotland today is shaped by the global and national post-9/11 shift in public attitudes towards Muslims, and is infused by the particular social, cultural and political Scottish ways of dealing with minorities, diversity and integration. This book explores the settlement and development of Muslim communities in Scotland, highlighting the ongoing changes in their structure and the move towards a Scottish experience of being Muslim. This experience combines a sense of civic and social belonging to Scotland with a strong religious and ideological commitment to Islam.

This book offers comprehensive coverage of current energy policy in Scotland focussing on non-fossil fuel energy options: renewables, nuclear power and energy efficiency. Covering issues of policy and practice, planning, legislation and regulation of a range of sustainable energy technologies in the context of devolved government, key experts explore these issues in terms of the ongoing Scottish independence debate, Brexit and further devolution in this vitally important and timely book. The book emphasises two further distinctive areas: constitutional change and the role of sub-national authorities in renewable and low carbon energy policy and practice. The clear focus on renewable and low carbon energy policy and practice and sub-national authority level of governance of energy means that it will be of particular relevance as a case study for those countries either in the process of deploying renewable and/or low carbon energy technologies or looking to do so. The authors discuss the many lessons to be learnt from the Scottish and UK experience. By providing a critical analysis of Scottish renewable and low carbon energy policy and practice, this book is invaluable to students, practitioners and decision-makers interested in renewable and low carbon energy transitions, energy planning and policy.

"Mercia Murray is a woman of fifty-two years who has been left." Abandoned by her partner in Scotland, where she has been living for twenty-five years, Mercia returns to her homeland of South Africa to find her family overwhelmed by alcoholism and secrets. Poised between her life in Scotland and her life in South Africa, she recollects the past with a keen sense of irony as she searches for some idea of home. In Scotland, her life feels unfamiliar; her apartment sits empty. In South Africa, her only brother is a shell of his former self, pushing her away. And yet in both places she is needed, if only she could understand what for. Plumbing the emotional limbo of a woman who is isolated and torn from her roots, *October* is a stark and utterly compelling novel about the contemporary experience of an intelligent immigrant, adrift among her memories and facing an uncertain middle age. With this pitch-perfect story, the "writer of rare brilliance" (The Scotsman) Zoë Wicomb—who received one of the first Donald Windham – Sandy M. Campbell Literature Prizes for lifetime achievement—stands to claim her rightful place as one of the preeminent contemporary voices in international fiction.

The Places in Between Princeton University Press

This volume studies the relationships between government and the popular music industries, comparing three Anglophone nations: Scotland, New Zealand and Australia. At a time when issues of globalization and locality are seldom out of the news, musicians, fans, governments, and industries are forced to reconsider older certainties about popular music activity and their roles in production and consumption circuits. The decline of multinational recording companies, and the accompanying rise of promotion firms such as Live Nation, exemplifies global shifts in infrastructure, profits and power. Popular music provides a focus for many of these topics—and popular music policy a lens through which to view them. The book has four central themes: the (changing) role of states and industries in popular music activity; assessment of the central challenges facing smaller nations competing within larger, global music-media markets; comparative analysis of music policies and debates between nations (and also between organizations and popular music sectors); analysis of where and why the state intervenes in popular music activity; and how (and whether) music fits within the 'turn to culture' in policy-making over the last twenty years. Where appropriate, brief nation-specific case studies are highlighted as a means of illuminating broader global debates.

Innate instincts A Scotsman likes to feel that, almost by instinct, he could guddle a trout (palm it out of the water) or gralloch a deer (disembowel it with his knife), even if he spends his day driving a bus or designing software. A Kilty cover-up If the Scots were to shed their seriousness, they would be noisier than the Neapolitans and wilder than the dancing Dervishes. Their reserve is not a defense against the rest of the world: it is a protective cover, like the lid of a nuclear reactor. Rob joy Calvinism is still deeply ingrained in the Scottish soul. A Scottish poet, overcome by the joy of sunshine and blue sky, once cried out what a fine day it was. The woman to whom he spoke replied, "We'll pay for it, we'll pay for it." Cunning and clever The Scots respect cleverness and like to feel that they possess plenty of it themselves. In Scotland there is nothing wrong with being clever, so long as you show it by words or actions, rather than by bragging. You don't have to hide it. To say of someone that "he has a good conceit of himself" is neither praise nor blame, just a statement of fact.

The winner of the Man Booker Prize, this "expertly written, perfectly constructed" bestseller (The Guardian) is now a Starz miniseries. It is 1866, and Walter Moody has come to stake his claim in New Zealand's booming gold rush. On the stormy night of his arrival, he stumbles across a tense gathering of 12 local men who have met in secret to discuss a series of unexplained events: a wealthy man has vanished, a prostitute has tried to end her life, and an enormous cache of gold has been discovered in the home of a luckless drunk. Moody is soon drawn into a network of fates and fortunes that is as complex and exquisitely ornate as the night sky. Richly evoking a mid-nineteenth-century world of shipping, banking, and gold rush boom and bust, The Luminaries is at once a fiendishly clever ghost story, a gripping page-turner, and a thrilling novelistic achievement. It richly confirms that Eleanor Catton is one of the brightest stars in the international literary firmament.

An exciting account of the origins of the modern world Who formed the first literate society? Who invented our modern ideas of democracy and free market capitalism? The Scots. As historian and author Arthur Herman reveals, in the eighteenth and nineteenth centuries Scotland made crucial contributions to science, philosophy, literature, education, medicine, commerce, and politics—contributions that have formed and nurtured the modern West ever since. Herman has charted a fascinating journey across the centuries of Scottish history. Here is the untold story of how John Knox and the Church of Scotland laid the foundation for our modern idea of democracy; how the Scottish Enlightenment helped to inspire both the American Revolution and the U.S. Constitution; and how thousands of Scottish immigrants left their homes to create the American frontier, the Australian outback, and the British Empire in India and Hong Kong. How the Scots Invented the Modern World reveals how Scottish genius for creating the basic ideas and institutions of modern life stamped the lives of a series of remarkable historical figures, from James Watt and Adam Smith to Andrew Carnegie and Arthur Conan Doyle, and how Scottish heroes continue to inspire our contemporary culture, from William “ Braveheart ” Wallace to James Bond. And no one who takes this incredible historical trek will ever view the Scots—or the modern West—in the same way again.

Winner of the 2014 Dean Batchelor Award, Motor Press Guild "Book of the Year" Before noon on May 30th, 1964, the Indy 500 was stopped for the first time in history by an accident. Seven cars had crashed in a fiery wreck, killing two drivers, and threatening the very future of the 500. Black Noon chronicles one of the darkest and most important days in auto-racing history. As rookie Dave MacDonald came out of the fourth turn and onto the front stretch at the end of the second lap, he found his rear-engine car lifted by the turbulence kicked up from two cars he was attempting to pass. With limited steering input, MacDonald lost control of his car and careened off the inside wall of the track, exploding into a huge fireball and sliding back into oncoming traffic. Closing fast was affable fan favorite Eddie Sachs. "The Clown Prince of Racing" hit MacDonald's sliding car broadside, setting off a second explosion that killed Sachs instantly. MacDonald, pulled from the wreckage, died two hours later. After the track was cleared and the race restarted, it was legend A. J. Foyt who raced to a decisive, if hollow, victory. Torn between elation and horror, Foyt, along with others, championed stricter safety regulations, including mandatory pit stops, limiting the amount a fuel a car could carry, and minimum-weight standards. In this tight, fast-paced narrative, Art Garner brings to life the bygone era when drivers lived hard, raced hard, and at times died hard. Drawing from interviews, Garner expertly reconstructs the fateful events and decisions leading up to the sport's blackest day, and the incriminating aftermath that forever altered the sport. Black Noon remembers the race that changed everything and the men that paved the way for the Golden Age of Indy car racing.
