Christopher Hitchens, described in the London Observer as “one of the most prolific, as well as brilliant, journalists of our time” takes on his biggest subject yet – the increasingly dangerous role of religion in the world. In the tradition of Bertrand Russell’s Why I Am Not a Christian and Sam Harris’s recent bestseller, The End Of Faith, Christopher Hitchens makes the ultimate case against religion. With a close and erudite reading of the major religious texts, he documents the ways in which religion is a man-made wish, a cause of dangerous sexual repression, and a distortion of our origins in the cosmos. With eloquent clarity, Hitchens frames the argument for a more secular life based on science and reason, in which hell is replaced by the Hubble Telescope’s awesome view of the universe, and Moses and the burning bush give way to the beauty and symmetry of the double helix.

“A book that should be read . . . Smith brings an alchemic talent to describing physical labor.” —The New York Times Book Review “Beautiful, funny, and harrowing.” – Sarah Smarsh, The Atlantic “Remarkable . . . this is the book that Hillbilly Elegy should have been.” —Kirkus Reviews A vivid window into the world of working class men set during the Bakken fracking boom in North Dakota Like thousands of restless men left unmoored in the wake of the 2008 economic crash, Michael Patrick Smith arrived in the fracking boomtown of Williston, North Dakota five years later homeless, unemployed, and desperate for a job. Renting a mattress on a dirty flophouse floor, he slept boot to beard with migrant men who came from all across America and as far away as Jamaica, Africa and the Philippines. They ate together, drank together, argued like crows and searched for jobs they couldn't get back home. Smith's goal was to find the hardest work he could do--to find out if he could do it. He hired on in the oil patch where he toiled fourteen hour shifts from summer's 100 degree dog days to deep into winter's bracing whiteouts, all the while wrestling with the demons of a turbulent past, his broken relationships with women, and the haunted memories of a family riven by violence. The Good Hand is a saga of fear, danger, exhaustion, suffering, loneliness, and grit that explores the struggles of America's marginalized boomtown workers—the rough-hewn, castoff, seemingly disposable men who do an indispensable job that few would exalt: oil field hands who, in the age of climate change, put the gas in our tanks and the food in our homes. Smith, who had pursued theater and played guitar in New York, observes this world with a critical eye; yet he comes to love his coworkers, forming close bonds with Huck, a goofy giant of a young man whose lead foot and quick fists get him into trouble with the law, and The Wildebeest, a foul-mouthed, dip-spitting truck driver who torments him but also trains him up, and helps Smith "make a hand." The Good Hand is ultimately a book about transformation--a classic American story of one man's attempt to burn himself clean through hard work, to reconcile himself to himself, to find community, and to become whole.

Hank was a dying breed on the space station Belvaille. The criminal gangs that had once made their homes there were forced out by the corporations that had taken over since the facility became an Independent Protectorate. Instead of the gentlemanly gang wars that had once dominated the scene, and made Hank's services prized as a negotiator, the city was now plagued by the clash of corporate armies using heavy weapons. Even tanks roamed the streets regularly. Most everyone from the olden days had either fled the station or was killed due to the organizational changes. Changes that Hank personally brought about when he had negotiated Belvaille's status with the Navy. As Hank contemplates whether he can survive in this increasingly hostile environment, he realizes that things aren't as bad as they seem--they are quite a bit worse. The constant power plays among corporations might have further reach than just the alleys of a backwater space station at the edge of the galaxy.
