Now more than 60 years old, this series remains one of the most cited sources in marine science and oceanography. A book/journal hybrid, it has a strong Impact Factor and a global reputation. Chapters are authored by leading experts from around the world, while an international Editorial Board ensures continued high quality and rigorous peer review of published articles. The ever increasing interest in work in oceanography and marine biology and its relevance to global environmental issues,

especially global climate change and its impacts, creates a demand for authoritative reviews summarizing the results of recent research. Three chapters in the volume are available Open Access. **The Privilege of the Sword** Grove Press Shifting faculty roles in a changing landscape Ernest L. Boyer's landmark book Scholarship Reconsidered: Priorities of the Professoriate challenged the publish-or-perish status quo that dominated the

academic landscape for generations. His powerful and enduring argument for a new approach to faculty roles and rewards continues to play a significant part of the national conversation on scholarship in the academy. Though steeped in tradition, the role of faculty in the academic world has shifted significantly in recent decades. The rise of the non-tenure-track class of professors is well documented. If the historic rule of promotion and tenure is waning, what role can scholarship play in a fragmented, unbundled academy? Boyer offers a still much-needed approach. He calls for a broadened view of scholarship, audaciously refocusing its gaze from the tenure file and to a wider community. This expanded edition offers, in addition to the original text, a critical introduction that explores the impact of Boyer's views, a call to action for applying Boyer's message to the changing nature of faculty work, and a discussion guide to help readers start a new conversation about how Scholarship Reconsidered applies today.

In the new millennium, what secrets lay beyond the far reaches of the universe? What mysteries belie the truths we once held to be self evident? The world of science fiction has long been a porthole into the realities of tomorrow, blurring the line between life and art.

Now, in *The Year's Best Science Fiction: Thirty-First Annual Collection* the very best SF authors explore ideas of a new world in the year's best short stories. This venerable collection brings together award winning authors and masters of the field such as Robert Reed, Alastair Reynolds, Damien Broderick, Elizabeth Bear, Paul McAuley and John Barnes. And with an extensive recommended reading guide and a summation of the year in science fiction, this annual

compilation has become the definitive must-read anthology for all science fiction fans and readers interested in breaking into the genre. James Tiptree, Jr. Award Cumulative List Lulu.com *Managing Ocean Environments in a Changing Climate* summarizes the current state of several threats to the global oceans. What distinguishes this book most from previous works is that this book begins with a holistic, global-scale focus for the first several chapters and

then provides an example of how this approach can be applied on a regional scale, for the Pacific region. Previous works usually have compiled local studies, which are essentially impossible to properly integrate to the global scale. The editors have engaged leading scientists in a number of areas, such as fisheries and marine ecosystems, ocean chemistry, marine biogeochemical cycling, oceans and climate change, and economics, to examine the threats to the oceans both individually and

collectively, provide gross estimates of the economic and societal impacts of these threats, and deliver high-level recommendations.

Nominated for a Katerva Award in 2012 in the Economy category State of the science reviews by known marine experts provide a concise, readable presentation written at a level for managers and students Links environmental and economic aspects of ocean threats and provides an economic analysis of action versus inaction Provides

recommendations for stakeholders to help stimulate the development of policies that would help move toward sustainable use of marine resources and services

This volume is an indispensable addition to the multidisciplinary coverage of the science of the Mediterranean Sea. The editors have gathered leading authorities from the fields of Marine Biology, Ecology, paleoclimatology, Chemical and Physical Oceanography, Zoology,

Botany, Aquatic Photosynthesis, Socioeconomics, Mariculture, Mediterranean History and Science of Humanity. Beginning with the birth of the Mediterranean Sea and its myths. From coral to fish, an introduction is given to its major inhabitants of plants and animals past and present. The chapters illustrate how organisms interact as part of the structure and function of the Sea's main ecosystems. The rise of the Mediterranean as the cradle

of the Western Civilization leads to a discourse on the status of human interaction with the sea. Accelerating global climate change, water warming, ocean acidification and sea level rise, and analyses of their effects on key organisms, entire ecosystems and human socioeconomics are given. Forecasting and predictions are presented taking into account different future scenarios from the IPCC (International Panel on Climate Change). The volume is richly illustrated in

color, with an extensive bibliography. A valuable addition to the limited literature in the field, offering up-to-date broad coverage merging science and humanities.

Ending poverty and stabilizing climate change will be two unprecedented global achievements and two major steps toward sustainable development. But the two objectives cannot be considered in isolation: they need to be jointly tackled through an integrated strategy. This report brings together those two objectives and explores how they can more easily be achieved if considered together. It examines the potential impact of climate

change and climate policies on poverty reduction. It also provides guidance on how to create a “ win-win † ? situation so that climate change policies contribute to poverty reduction and poverty-reduction policies contribute to climate change mitigation and resilience building. The key finding of the report is that climate change represents a significant obstacle to the sustained eradication of poverty, but future impacts on poverty are determined by policy choices: rapid, inclusive, and climate-informed development can prevent most short-term impacts whereas

immediate pro-poor, emissions-reduction policies can drastically limit long-term ones. Sea Change Newnes
Chris Bowen is the star quarterback at his high school and is attracting interest from college scouts. He dreams of playing in the NFL but can be indecisive in crucial moments during a game. After taking a vicious hit to his head, he begins to have hallucinations of a 19th century whaling ship and thinks he's going crazy. Afraid of losing scouting interest and jeopardizing his future, he doesn't tell anyone. His mental state worsens when a ghost, an old mariner named York, arrives. York struggles to convince Chris that he did indeed

have a past life and it is affecting what he does now. Chris's disbelief finally dissolves after a tragedy occurs. Then he begins to trust York and ultimately learns why he sometimes hesitates during a pivotal play. Once he overcomes that hesitation, he's ready to move on to college and adulthood. Sea Change is a gripping novel that consists of intertwined parallel stories, one an adventure that takes place 160 years ago, the other a tale of modern high school student life. Themes of friendship, the call of the sea, academic and athletic excellence, being on the cusp of adulthood, and preparing for the future run throughout the book.

The astonishing untold history of the million and a half women who surrendered children for adoption due to enormous family and social pressure in the decades before *Roe v. Wade*. “ It would take a heart of stone not to be moved by the oral histories of these women and by the courage and candor with which they express themselves. ” —The Washington Post “ A remarkably well-researched and accomplished book. ” —The New York Times Book Review “ A wrenching, riveting book. ” —Chicago Tribune In this deeply moving and myth-shattering work, Ann Fessler brings out into the open for the first time the hidden social history of adoption before *Roe v.*

Wade - and its lasting legacy. An adoptee who was herself surrendered during those years and recently made contact with her mother, Ann Fessler brilliantly brings to life the voices of more than a hundred women, as well as the spirit of those times, allowing the women to tell their stories in gripping and intimate detail. *Sea Change* of A. L. Saskatoon : Thistledown Press “ *Outlander meets Camelot* ” (Kirsty Logan, author of *The Gracekeepers*) in the first book of an exciting historical trilogy that reveals the untold story of Languoreth—a powerful and, until now, tragically forgotten queen of sixth-century Scotland—twin sister of the man

who inspired the legendary character of Merlin. Intelligent, passionate, rebellious, and brave, Languoreth is the unforgettable heroine of *The Lost Queen*, a tale of conflicted loves and survival set against the cinematic backdrop of ancient Scotland, a magical land of myths and superstition inspired by the beauty of the natural world. One of the most powerful early medieval queens in British history, Languoreth ruled at a time of enormous disruption and bloodshed, when the burgeoning forces of Christianity threatened to obliterate the ancient pagan beliefs and change her way of life forever. Together with her twin brother Lailoken, a warrior and druid known to history as Merlin,

Languoreth is catapulted into a world of danger and violence. When a war brings the hero Emrys Pendragon, to their door, Languoreth collides with the handsome warrior Maelgwn. Their passionate connection is forged by enchantment, but Languoreth is promised in marriage to Rhydderch, son of the High King who is sympathetic to the followers of Christianity. As Rhydderch's wife, Languoreth must assume her duty to fight for the preservation of the Old Way, her kingdom, and all she holds dear. “ Moving, thrilling, and ultimately spellbinding ” (BookPage), *The Lost Queen* brings this remarkable woman to life—rescuing her from obscurity,

and reaffirming her place at the center of the most enduring legends of all time. “ Moving, thrilling, and ultimately spellbinding, *The Lost Queen* is perfect for readers of historical fiction like *The Clan of the Cave Bear* and *Wolf Hall*, and for lovers of fantasy like *Outlander* and *The Mists of Avalon* ” (BookPage). *The Ruin of Kings* Center Point Pub This book presents the major findings and selected highlights from *Climate Change Impacts in the United States*, the third National Climate Assessment. The National Climate Assessment assesses the science of climate change and its impacts across the United States, now and

throughout this century. It documents climate change related impacts and responses for various sectors and regions, with the goal of better informing public and private decision-making at all levels. A team of more than 300 experts, guided by a 60-member National Climate Assessment and Development Advisory Committee, produced the full report. The assessment draws from a large body of scientific peer-reviewed research, technical input reports, and other publicly available sources; all sources meet the standards of the Information Quality Act. The report was extensively reviewed by the public and experts, including a panel of the National Academy of

Sciences, the 13 Federal agencies of the U.S. Global Change Research Program, and the Federal Committee on Environment, Natural Resources, and Sustainability.

Climate change poses one of the biggest challenges facing humankind. The European Union (EU) has developed into a leader in international climate change politics although it was originally set up as a ' leaderless Europe ' in which decision-making powers are spread amongst EU institutional, member state and societal actors.

The central aim of this book, which is written by leading experts in the field, is to explain what kind of leadership has been offered by EU institutional, member state and societal actors. Although leadership is the overarching theme of the book, all chapters also address ecological modernisation, policy instruments, and multi-level governance as additional main themes. The book chapters focus on the Commission, European Parliament, European Council and Council of Ministers as well as member states (Britain, Germany, France, the Netherlands, Poland and Spain) and societal actors (businesses and environmental NGOs). Additional chapters

analyse the EU as a global actor and the climate change policies of America and China and how they have responded to the EU ' s ambitions. This book will be of interest to students and scholars of environmental politics, EU politics, comparative politics and international relations as well as to practitioners who deal with EU and/or climate change issues.

"Everything epic fantasy should be: rich, cruel, gorgeous, brilliant, enthralling and deeply, deeply satisfying. I loved it."—Lev Grossman, author of *The Magicians* When destiny calls, there's no fighting back. Kihrin grew up in the slums of Quur, a thief and a minstrel's son raised on tales of long-lost princes and

magnificent quests. When he is claimed against his will as the missing son of a treasonous prince, Kihrin finds himself at the mercy of his new family's ruthless power plays and political ambitions. Practically a prisoner, Kihrin discovers that being a long-lost prince is nothing like what the storybooks promised. The storybooks have lied about a lot of other things, too: dragons, demons, gods, prophecies, and how the hero always wins. Then again, maybe he isn't the hero after all. For Kihrin is not destined to save the world. He's destined to destroy it. Jenn Lyons begins the *Chorus of Dragons* series with *The Ruin of Kings*, an epic fantasy novel about a man who

discovers his fate is tied to the future of an empire.
