This book is about some recent work in a subject usually considered part of "logic" and the "foundations of mathematics", but also having close connections with philosophy and computer science. Namely, the creation and study of "formal systems for constructive mathematics". The general organization of the book is described in the "User's Manual" which follows this introduction, and the contents of the book are described in more detail in the introductions to Part One, Part Two, Part Three, and Part Four. This introduction has a different purpose; it is intended to provide the reader with a general view of the subject. This requires, to begin with, an elucidation of both the concepts mentioned in the phrase, "formal systems for constructive mathematics". "Constructive mathematics" refers to mathematics in which, when you prove that a thing exists (having certain desired properties) you show how to find it. Proof by contradiction is the most common way of proving something exists without showing how to find it - one assumes that nothing exists with the desired properties, and derives a contradiction. It was only in the last two decades of the nineteenth century that mathematicians began to exploit this method of proof in ways that nobody had previously done; that was partly made possible by the creation and development of set theory by Georg Cantor and Richard Dedekind.

This new edition of the best-selling book describes the main types of fishways and fish facilities used around the world to assist the passage of fish over dams and other obstructions to their migration. It also focuses on the protection of fish (mainly young fish) from the hazards encountered in their downstream migrations. The book brings together the type of knowledge and research needed to decide on the facility used as well as its design and operation. It emphasizes the need for both biologists and engineers to collaborate in the design and indicates in what fields such collaboration would benefit fisheries conservation in the future. This is the Second Edition of the only book to bring together all of these topics worldwide under one cover.

A guided tour of the world's best sailboats with an entertaining expert at your side. With over 100,000 copies sold, these volumes have become invaluable reference for sailors and would-be sailors alike. Using 400 magnificent color photographs and black-and-white illustrations per volume, Máté analyzes the designs and construction methods of the 30 best boat-builders in the world, builders who have, over the years, consistently shown the highest quality and most creative innovation. He visited boatyards in Europe, Canada, and the United States, for his scrupulous firsthand survey. While revealing the secrets of the best builders, he lucidly demonstrates what makes these boats the best, furnishing knowledge that can then be applied while choosing any sailboat of whatever make. Besides the perennial classics of Alden, Baltic, Hinckley and Swan, are new entries like the super-fast J-Boats and super luxurious Oysters. The color photographs are benchmarks in nautical publishing, while the writing is thoughtful, hugely informative and always entertaining.

"This practical and helpful volume details how clinicians can work through various and common challenges inherent to psychotherapy, whether within the context of individual, marital, or group settings. Chapters draw upon wisdom gleaned from the author's 48 years as a practicing psychiatrist to address topics such as using countertransference for therapeutic purposes; resistance, especially when it needs to be the focus of the therapy; and a prioritization of exploration over explanation and favor working in the here-and-now. Along with theory and clinical observations, Dr. Gans offers a series of "Clinical Pearls," pithy comments that highlight different interventions to a wide range of clinical challenges. These include patient hostility, the abrupt termination of therapy, treating a couple that's lost compassionate neutrality, and more. In addition to offering advice and strategies for therapists, the book also addresses foundational concerns like the matter of fees in private practice and the virtue of moral courage on the part of the therapist. Written with clarity, heart, and an abundance of clinical wisdom, Challenging Moments in Psychotherapy is essential reading for all clinicians, teachers, and supervisors of psychotherapy"--

Fresh, funny, and fearless, The Middle Finger Project is a point-by-point primer on how to get unstuck, slay imposter syndrome, trust in your own worth and ability, and become a strong, capable, wonderful, weird, brilliant, ballsy, unfuckwithable YOU. "Don't worry, this isn't a book about God, nor is it a book about Ryan Gosling (second in command). But it is a book about authority and becoming your own." --Ash Ambirge After a string of dead-end jobs and a death in the family, Ash Ambirge was down to her last \$26 and sleeping in a Kmart parking lot when she faced the truth: No one was coming to her rescue. It was up to her to appoint herself. That night led to what eventually became a six-figure freelance career as a sought-after marketing and copywriting consultant, all while sipping coffee from her front porch in Costa Rica.

She then launched The Middle Finger Project, a blog and online course hub, which has provided tens of thousands of young "women who disobey" with the tools and mindset to give everyone else's expectations the finger and get on your own path to happiness, wealth, independence, and adventure. In her first book, Ash draws on her unconventional personal story to offer a fun, bracing, and occasionally potty-mouthed manifesto for the transformative power of radical self-reliance. Employing the signature wit and wordsmithing she's used to build an avid following, she offers paradigm-shifting advice along the lines of: • The best feeling in the world is knowing who you are and what you're capable of doing. • Life circumstances are not life sentences. If a Scranton girl who grew up in a trailer park can make it, so can you. • What you believe about yourself will either murder your chances or save your life. So why not believe something good? • You don't need a high-ranking job title to be authorized to contribute. You just need to contribute. • Be your own authority. Authority only works as long as you trust that someone smarter than you is making the rules. • The way you become a force is by being the most radically real version of yourself that you can be. • You only have 12 fucks a day to give, so use them wisely.
