Oi Amigo! Experience the amazing mighty Amazon! It's the steamy setting for this colourful South American tale of an old family company dealing in jungle medicinal plants. The venerable firm is corrupted by lust, corporate greed, gratuitous affluence, shady characters, and duplicitous transactions. Genetic tinkering and environmental destruction run amuck amidst the grinding subsistence life of the Amazon natives. Rune Erikson is cast as the altruistic hero as he comes to the rescue of a statuesque Brazilian heiress brutally targeted during a medical conference in Victoria. Hiding her aboard the Valhalla, Rune is love-struck. Hitching a ride with her on Dredmann Industries corporate jet, it delivers them unto the evil Dr. Manglar. Bianca Penthesilia Monteiro fights back against Gunther Dredmann, known by his victims as Dr. Death, when her family's business is ruthlessly subjected to a hostile takeover. Fast Eddie, an old buddy of Rune's who has fallen into the bottle, teams up to help with his Grumman Goose flying boat. An ancient family enigma is revealed when a five-hundred-year-old Portuguese leather trunk is opened. A wizened soothsayer casts his cryptic prophecies as a centuries-old Portuguese sword comes scything down in an old Brazilian prison, sparking primeval powers in its possessor. This intriguing fourth novel in a series features the somewhat jaded but dashing Rune Erikson who slogs through the piranha-infested Amazon with his Grumman Goose flying buddy, Fast Eddie, in a torturous survival trek. Rune and his Brazilian heiress babe are caught up in a sinister plot of unimaginable consequences. Coloured by romance and spiced with eroticism, this adventure lures Rune off his sailing ketch, Valhalla, in Victoria's Fisherman's Wharf into the enticing arms of a young, hot-blooded Latin American woman whose powerful matriarchal lineage is unknowingly steeped in the ancient myths and secret sagas of the steamy Amazon.

The descent of the Huygens probe to the frozen surface of Saturn's moon, Titan, in 2005, marks a pinnacle achievement in space exploration - the most distant planetary landing ever made or presently foreseen. The Huygens probe's seven-year voyage through space (past Venus, Earth and Jupiter) attached to the Cassini orbiter, its arrival at Saturn and three-week dormant coast to Saturn's moon, Titan, culminated in Huygens' hypersonic entry into Titan's atmosphere, 2.5-hour parachute descent, and continued operation for 72 minutes on the surface transmitting data back to Earth via the Cassini orbiter. Saturn has 62 confirmed orbiting moons, but Titan (which is larger than the planet Mercury) was chosen as a has two major components of Earth's atmosphere - nitrogen and oxygen - but the oxygen is was thought to be frozen as water ice within the body of the moon. If Titan received more sunlight, its atmosphere might well resemble that of a primitive Earth. The hope is that study of the data gathered about Titan will help us to understand how the Earth evolved, and possibly what led to the evolution of life.
