" To be brought up in Leeds in the forties was to learn early on the quite useful lesson that life is generally something that happens elsewhere. In this delightful collection of reminiscences Alan Bennett recalls his early years in a sequence of tales that are funny, touching and written in his unique style. Born in Leeds in 1934, he realises from a young age that his family is not like other families. When war breaks out in 1939, the Bennett family is on a tram heading down Tong Road as Neville Chamberlain addresses the nation. So, not quite partaking in the national mood and, as ever, unbrushed by the wings of history, the precocious Alan yearns to see the places and lead the life he reads about in books, but not even the war

provides the excitement he longs for. This is an ordinary childhood hiking in the Dales on Sundays, trips into town with Mam recalled with wry observation and ironic understatement, which is by turns moving and hilarious. These beautifully rendered snapshots, which include poignant portraits of his parents, confirm Bennett at the forefront of contemporary writing. Presented here as a new edition, *Telling Tales* will delight Bennett fans and enchant General Systems Theory and Psychiatry Little Brown GBR. An anthology of short stories set against the backdrop of rural New England and Texas chronicles the off-center lives of characters whose world is turned upside down by

illness, dying, grief, poverty, or other challenges.

The book brings together the type of knowledge and research needed to decide on the facility

used as well as its design and operation. It emphasizes the need for both biologists and engineers to collaborate in the design and indicates in what fields such collaboration would benefit fisheries conservation in the future. Winning Every Day John Wiley & Sons
Sixty years after Dorothy L. Sayers began her unfinished Lord Peter Wimsey novel, *Thrones Dominations*, Booker Prize finalist Jill Paton Walsh took on the challenge of completing the manuscript---with

extraordinary success. "The transition is seamless," said the San Francisco Chronicle; "you cannot tell where Sayers leaves off and Walsh begins." "Will Paton Walsh do it again?" wondered Ruth Rendell in London's Sunday Times. "We must hope so." Jill Paton Walsh fulfills those hopes in *A Presumption of Death*. Although Sayers never began another Wimsey novel, she did leave clues. Drawing on "The Wimsey Papers," in which Sayers showed various members of the family coping with wartime conditions, Walsh has devised an irresistible story set in 1940, at the start of the Blitz in London. Lord Peter is abroad on secret business for the Foreign Office, while Harriet Vane, now Lady Peter Wimsey, has taken their children to safety in the country. But war has followed them there---glamorous RAF pilots and even more glamorous land-girls scandalize the villagers, and the blackout makes the nighttime lanes as sinister as the back alleys of London. Daily life reminds them of the war so constantly that, when the village's first air-raid practice ends with a real body on the ground, it's almost a shock to hear the doctor declare that it was not enemy action, but plain, old-fashioned murder. Or was it? At the request of the overstretched local police, Harriet reluctantly agrees to investigate. The mystery that unfolds is every bit as literate, ingenious, and compelling as the best of original Lord Peter Wimsey novels.

Telling Tales

2008 Outstanding Academic Title, Choice Magazine From dirt bikes and jet skis to weed wackers and snowblowers, machines powered by small gas engines have become a permanent—and loud—fixture in American

culture. But fifty years of high-speed fun and pristine lawns have not come without cost. In the first comprehensive history of the small-bore engine and the technology it powers, Paul R. Josephson explores the political, environmental, and public health issues surrounding one of America's most dangerous pastimes. Each chapter tells the story of an ecosystem within the United States and the devices that wreak havoc on it—personal watercraft (PWCs) on inland lakes and rivers; all-terrain vehicles (ATVs) in deserts and forests; lawn mowers and leaf blowers in suburbia. In addition to environmental impacts, Josephson discusses the development and promotion of these technologies, the legal and regulatory efforts made to improve their safety and environmental soundness, and the role of owners' clubs in encouraging responsible operation. Synthesizing information from medical journals, recent environmental

research, nongovernmental organizations, and manufacturers, Josephson's compelling history leads to one irrefutable conclusion: these machines cannot be operated without loss of life and loss of habitat.
