The harrowing adventure-at-sea memoir recounting the heroic search-and-rescue mission for lost Montauk fisherman John Aldridge, which Daniel James Brown calls "A terrific read." I am floating in the middle of the night, and nobody in the world even knows I am missing. Nobody is looking for me. You can't get more alone than that. You can't be more lost. I've got too many people who love me. There's no way I'm dying like this. In the dead of night on July 24, 2013, John Aldridge was thrown off the back of the *Anna Mary* while his fishing partner, Anthony Sosinski, slept below. As desperate hours ticked by, Sosinski, the families, the local fishing community, and the U.S. Coast Guard in three states

mobilized in an unprecedented search effort that culminated in a rare and exhilarating success. A tale of survival, perseverance, and community, *A Speck in the Sea* tells of one man's struggle to survive as friends and strangers work to bring him home. Aldridge's wrenching first-person account intertwines with the narrative of the massive, constantly evolving rescue operation designed to save him.

Nicholas Perrot was a French-Canadian explorer who played a key role in the history of Wisconsin. This book provides a detailed biography of Perrot and examines his interactions with Native American tribes in the region, as well as his involvement in the fur trade.

Stickney's analysis sheds light on the complex cultural and economic forces that shaped Wisconsin in the seventeenth and eighteenth centuries. This is a valuable resource for students and scholars of American colonial history and Native American studies. This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work is in the "public domain in the United States of America, and possibly other nations. This new edition of the best-selling book describes the main types of fishways and fish facilities used around the world to assist the passage of fish over dams and other obstructions to their migration. It also focuses on the protection of fish (mainly young fish) from the hazards encountered in their downstream migrations. The book brings together the type of knowledge and research needed to decide on the facility used as well as its design and operation. It emphasizes the need for both biologists and engineers to collaborate in the design and indicates in what fields such collaboration would benefit fisheries conservation in the future.

This is the Second Edition of the only book to bring together all of these topics worldwide under one cover.
