inherent in the subject. With this objective in mind, the content of this textbook has been developed and arranged to provide a logical progression from fundamental to more advanced concepts, building upon what students have already learned and emphasizing connections between topics and between theory and applications. The goal of each section is to enable students not just to recognize concepts, but to work with them in ways that will be useful in later courses and future

careers. The organization and pedagogical features were developed and vetted with feedback from science educators dedicated to the project. VOLUME I

*Consumers Index to Product Evaluations and Information Sources* Seloc's Bombardier Sea-Doo Personal Watercraft Since 1958 the Maritime Administration has continuously

conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed.

---

The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. Robert J. Blackwell, Assistant Secretary for Maritime Affairs, **Boating** Pearson Higher Ed. An award-winning scientist offers his unorthodox approach to childrearing:

"Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research

---

to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only

because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.

The time has come to chronicle a photo archival book of Drag Boats of the 1960s aptly named "The Rebel Decade." This was the birth of "whip-start"

---

dragsters which led to today's organized drag boat racing. Recognized and featured are those racing legends like Larry Schwabenland, Ray Caselli, Gary Gabelich, Dwight Bale, hot boat builders like Rich Hallett, "Sanger Jack" Davidson, Rudy Raymos, engine builders Keith Black, Dave Zeuschel, Ed Pink, Louis Unser and many others who reigned in their heyday. These mavericks dared to mix unleashed speed-on-the-water with smoke and fire, thunderous nitro or powerful blown gas while avoiding the moment when their boat could take a deadly spin, nose dive or flight—many failed. Drag Boats of the 1960s Photo Archive is a team effort by many of those who were

there; only they could have created this riveting history on the fastest, most exciting and dangerous era in water sports. Mariner 2-220 HP OB 1976-1989 Taylor Pub This book opens with a maintenance survey to help identify likely problems and to guide the reader to the appropriate sepcialized sections. A chapter devoted to tools and techniques precedes the coverage of hull types.

For Harley-Davidson aficionados, the very name Sportster conjures an image of a fire-breathing mechanical beast scorching the

---

world's tarmacan image the Sportster itself often does not live up to. Straight from the factory, in its standard form, the Sportster routinely proves an entry-level motorcycle providing a relatively tame ride. This book aims to change all that and to show every Sportster rider how to free the beast in his or her bike. With expert, detailed advice on the proper mechanical massaging and plenty of helpful diagrams and photos this updated, third edition of Buzz Buzzelli's best-

selling handbook shows how the Sportster can be transformed into the superbike of old. Including a history of the Sportster from its birth in 1957 to the recent introduction of a new engine (only the third in its long life), this book has everything it takes to open up the gates of hell and give the Sportster its head. *Explorer Repair Manual* Enthusiast Books
