New York Times Bestseller: The “miraculous” memoir of an inspiring teacher and the students who changed his life on an impoverished South Carolina island (Newsweek). Though the children of Yamacraw Island live less than two miles from the southern mainland, they can’t name the US president or the ocean that surrounds them. Most can’t read or write. Many of the students are the descendants of slaves, handicapped by poverty and isolation. When Pat Conroy arrives, an eager young

teacher at the height of the civil rights movement, he finds a community still bound by the bitter effects of racism, but he is determined to broaden its members’ horizons and give them a voice. In this poignant memoir, which Newsweek called “an experience of joy,” the New York Times – bestselling author of *The Prince of Tides* plumbs his experiences as a young teacher on an isolated South Carolina island to reveal the shocking inequalities of the American education system.

Mapping the Future of Global Civilization Prabhat Prakashan
From one of the world’s leading economists, a grand narrative of the century that made us richer than ever, yet left us unsatisfied Before 1870, humanity lived in dire poverty, with a slow crawl of invention offset by a growing population. Then came a great shift: invention sprinted forward, doubling our technological capabilities each generation and utterly transforming the economy again and again. Our ancestors would have presumed we would have used such powers to build utopia. But it was not so. When 1870÷2010 ended, the world instead saw global warming; economic depression, uncertainty, and inequality; and broad rejection of the status quo. Economist Brad DeLong’s *Slouching Towards Utopia* tells the story of how this unprecedented explosion of

material wealth occurred, how it transformed the globe—and why it failed to deliver us to utopia. Of remarkable breadth and ambition, it uncovers the last century to have been less a march of progress than a slouch in the right direction.
Men Without Work Broadview Press
Looking up something online is one of the most common applications of the web. Whether with a laptop or smartphone, we search the web from wherever we are, at any given moment. 'Googling' has become so entwined in our daily routines that we rarely question it. However, search engines such as Google or Bing determine what part of the web we get to see, shaping our knowledge and perceptions of the world. But there is a world beyond Google – geographically, culturally, and technologically. The Society of the Query network was founded in 2009 to delve into the larger societal and cultural consequences that are triggered by search technology. In this Reader, which is published after two conferences held in Amsterdam in 2009 and 2013, twenty authors – new media scholars, historians, computer scientists, and artists – try to answer a number of pressing questions about online search.
Twelve Years a Slave Houghton Mifflin
From the visionary bestselling author of *The Second World* and *How to Run the World* comes a bracing and authoritative guide to a future shaped less by national borders than by global supply chains, a world in which the most connected powers—and people—will win. Connectivity is the most revolutionary force of the twenty-first century. Mankind is reengineering the planet, investing up to ten trillion dollars per year in transportation, energy, and

communications infrastructure linking the world's burgeoning megacities together. This has profound consequences for geopolitics, economics, demographics, the environment, and social identity. Connectivity, not geography, is our destiny. In *Connectography*, visionary strategist Parag Khanna travels from Ukraine to Iran, Mongolia to North Korea, Pakistan to Nigeria, and across the Arctic Circle and the South China Sea to explain the rapid and unprecedented changes affecting every part of the planet. He shows how militaries are deployed to protect supply chains as much as borders, and how nations are less at war over territory than engaged in tugs-of-war over pipelines, railways, shipping lanes, and Internet cables. The new arms race is to connect to the most markets—a race China is now winning, having launched a wave of infrastructure investments to unite Eurasia around its new Silk Roads. The United States can only regain ground by fusing with its neighbors into a super-continental North American Union of shared resources and prosperity. *Connectography* offers a unique and hopeful vision for the future. Khanna argues that new energy discoveries and technologies have eliminated the need for resource wars; ambitious transport corridors and power grids are unscrambling Africa's fraught colonial borders; even the Arab world is evolving a more peaceful map as it builds resource and trade routes across its war-torn landscape. At the same time, thriving hubs such as Singapore and Dubai are injecting dynamism into young and heavily populated regions, cyber-communities empower commerce across vast distances, and the world's ballooning financial assets

are being wisely invested into building an inclusive global society. Beneath the chaos of a world that appears to be falling apart is a new foundation of connectivity pulling it together. Praise for *Connectography* "Incredible . . . With the world rapidly changing and urbanizing, [Khanna's] proposals might be the best way to confront a radically different future."—The Washington Post "Clear and coherent . . . a well-researched account of how companies are weaving ever more complicated supply chains that pull the world together even as they squeeze out inefficiencies. . . . [He] has succeeded in demonstrating that the forces of globalization are winning."—Adrian Woolridge, The Wall Street Journal "Bold . . . With an eye for vivid details, Khanna has . . . produced an engaging geopolitical travelogue."—Foreign Affairs "For those who fear that the world is becoming too inward-looking, *Connectography* is a refreshing, optimistic vision."—The Economist "Connectivity has become a basic human right, and gives everyone on the planet the opportunity to provide for their family and contribute to our shared future. *Connectography* charts the future of this connected world."—Marc Andreessen, general partner, Andreessen Horowitz "Khanna's scholarship and foresight are world-class. A must-read for the next president."—Chuck Hagel, former U.S. secretary of defense This title has complex layouts that may take longer to download. **Connectography** Open Road Media ECPA BESTSELLER • A compelling emotional and spiritual case against hurry and in favor of a slower, simpler way of life "As someone all too familiar with 'hurry sickness,' I desperately needed this book."—Scott Harrison,

New York Times best-selling author of *Thirst* "Who am I becoming?" That was the question nagging pastor and author John Mark Comer. Outwardly, he appeared successful. But inwardly, things weren't pretty. So he turned to a trusted mentor for guidance and heard these words: "Ruthlessly eliminate hurry from your life. Hurry is the great enemy of the spiritual life." It wasn't the response he expected, but it was—and continues to be—the answer he needs. Too often we treat the symptoms of toxicity in our modern world instead of trying to pinpoint the cause. A growing number of voices are pointing at hurry, or busyness, as a root of much evil. Within the pages of this book, you'll find a fascinating roadmap to staying emotionally healthy and spiritually alive in the chaos of the modern world. *America's Invisible Crisis* Crossway A publication devoted to the business and personnel activities of the U.S. Department of Agriculture. *The Water Is Wide* Random House Written by local authors with many years of experience in writing about their community, the *Insiders' Guide* RM series provide newcomers, visitors, and business travelers with a native's perspective of the area. Each guide details hotels, restaurants, annual events, attractions, nightlife, parks and recreation, real estate, and much more. Covering more than 60 cities and areas nationwide, the *Insiders' Guide* RM series offer the best local insights on travel and relocation. Features include: -- Light, easier-to-use 6 x 9 size -- Easy-to-read typeface -- Large photos and maps -- Updated interior graphics -- Thumb tabs for quick reference to specific chapters -- More at-a-glance information in every title -- Expanded, comprehensive indexes -- Easy-to-use geographic organization in regional books Covers historic Charleston and the surrounding beaches, islands and suburbs including Mt. Pleasant, Summerville, Kiawah Island, and more. **Utopia Guide to Indonesia** Amsterdam University Press Statistical physics is a core

component of most undergraduate (and some post-graduate) physics degree courses. It is primarily concerned with the behavior of matter in bulk—from boiling water to the superconductivity of metals. Ultimately, it seeks to uncover the laws governing random processes, such as the snow on your TV screen. This essential new textbook guides the reader quickly and critically through a statistical view of the physical world, including a wide range of physical applications to illustrate the methodology. It moves from basic examples to more advanced topics, such as broken symmetry and the Bose-Einstein equation. To accompany the text, the author, a renowned expert in the field, has written a Solutions Manual/Instructor's Guide, available free of charge to lecturers who adopt this book for their courses. Introduction to Statistical Physics will appeal to students and researchers in physics, applied mathematics and statistics.

Reflections on Web Search CRC Press

Academic Writing, Real World Topics fills a void in the writing-across-the-curriculum textbook market. It draws together articles and essays of actual academic prose as opposed to journalism; it arranges material topically as opposed to by discipline or academic division; and it approaches topics from multiple disciplinary and critical perspectives. With extensive introductions, rhetorical instruction, and suggested additional resources accompanying each chapter, Academic Writing, Real World Topics introduces students to the kinds of research and writing that they will be expected to undertake throughout their college careers and beyond. Readings are drawn from various disciplines across the major

divisions of the university and focus on issues of real import to students today, including such topics as living in a digital culture, learning from games, learning in a digital age, living in a global culture, our post-human future, surviving economic crisis, and assessing armed global conflict. The book provides students with an introduction to the diversity, complexity and connectedness of writing in higher education today. Part I, a short Guide to Academic Writing, teaches rhetorical strategies and approaches to academic writing within and across the major divisions of the academy. For each writing strategy or essay element treated in the Guide, the authors provide examples from the reader, or from one of many resources included in each chapter's Suggested Additional Resources. Part II, Real World Topics, also refers extensively to the Guide. Thus, the Guide shows student writers how to employ scholarly writing practices as demonstrated by the readings, while the readings invite students to engage with scholarly content. *The Ruthless Elimination of Hurry* Routledge

SELECTED AS A 2008 BEST BUSINESS BOOK OF THE YEAR BY THE ECONOMIST The Net Generation Has Arrived. Are you ready for it? Chances are you know a person between the ages of 11 and 30. You've seen them doing five things at once: texting friends, downloading music, uploading videos, watching a movie on a two-inch screen, and doing who-knows-what on Facebook or MySpace. They're the first generation to have literally grown up digital--and they're part of a global cultural phenomenon that's here to stay. The bottom line is this: If you understand the Net Generation, you will understand the future. If you're a Baby Boomer or Gen-Xer: This is your field guide. A fascinating inside look at the Net Generation, *Grown Up Digital* is inspired by a \$4 million private research study. New York Times bestselling author Don Tapscott has

surveyed more than 11,000 young people. Instead of a bunch of spoiled "screenagers" with short attention spans and zero social skills, he discovered a remarkably bright community which has developed revolutionary new ways of thinking, interacting, working, and socializing. *Grown Up Digital* reveals: How the brain of the Net Generation processes information Seven ways to attract and engage young talent in the workforce Seven guidelines for educators to tap the Net Gen potential Parenting 2.0: There's no place like the new home Citizen Net: How young people and the Internet are transforming democracy Today's young people are using technology in ways you could never imagine. Instead of passively watching television, the "Net Geners" are actively participating in the distribution of entertainment and information. For the first time in history, youth are the authorities on something really important. And they're changing every aspect of our society—from the workplace to the marketplace, from the classroom to the living room, from the voting booth to the Oval Office. The Digital Age is here. The Net Generation has arrived. Meet the future.

With a New Chapter and Updated Epilogue on Coronavirus
A Financial Times Best Health Book of 2019 and a New York Times Book Review Editors' Choice
"Honigsbaum does a superb job covering a century's worth of pandemics and the fears they invariably unleash." —Howard Markel, MD, PhD, director of the Center for the History of Medicine, University of Michigan
How can we understand the COVID-19 pandemic? Ever since the 1918 Spanish influenza pandemic, scientists have dreamed of preventing such catastrophic outbreaks of infectious disease. Yet despite a century of medical progress, viral and bacterial

disasters continue to take us by surprise, inciting panic and dominating news cycles. In *The Pandemic Century*, a lively account of scares both infamous and less known, medical historian Mark Honigsbaum combines reportage with the history of science and medical sociology to artfully reconstruct epidemiological mysteries and the ecology of infectious diseases. We meet dedicated disease detectives, obstructive or incompetent public health officials, and brilliant scientists often blinded by their own knowledge of bacteria and viruses—and see how fear of disease often exacerbates racial, religious, and ethnic tensions. Now updated with a new chapter and epilogue.

Timeless Wisdom for Leading without Authority

HarperCollins
"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public."
