Case Studies for Corporate Finance: From A (Anheuser) to Z (Zyys) (In 2 Volumes) provides a distinctive collection of 51 real business cases dealing with corporate finance issues over the period of 1985 – 2014. Written by Harold Bierman Jr, world-renowned author in the field of corporate finance, the book spans over different areas of finance which range from capital structures to leveraged buy-outs to restructuring. While the primary focus of the case studies is the economy of the United States, other parts of the world are also represented. Notable to this comprehensive case studies book are questions to which unique solutions are offered in Volume 2, all of which aim to provide the reader with simulated experience of

In 2011, Sherry Hunt was a vice president and chief underwriter at CitiMortgage headquarters in the United States. For years she had been witnessing fraud, as the company bought billions of dollars in mortgage loans from external lenders that did not meet Citi credit policy and sold them to government-sponsored enterprises (GSEs). This resulted in Citi selling to GSEs such as Fannie Mae and Freddie Mac pools of loans that were considerably defective

and thus likely to default. Citi had also approved hundreds of millions of dollars' worth of defective mortgage files for U.S. Federal Housing Administration insurance. After reporting the mortgage defects in regular reports, notifying and working closely with her direct supervisor (who was subsequently asked to leave Citi after alerting the chairman of the board to these issues) to stop the purchase of defective loans, leaving anonymous tips on the FBI's and the Department of Housing and Urban Development's websites, and receiving threats from two of her superiors who demanded that she change the results of her quality control unit's reports, the shy and conflict-avoidant Hunt had to decide who she should tell about the fraud, and how.

---

The case gives students the opportunity to recommend how Hunt should proceed based on their analysis of the stakeholders involved. To aid instructors, the case includes Kellogg-produced videos of Hunt--the only on-camera interviews she has ever given--explaining what happened after she reported the fraud to Citi HR and, later, the U.S. Department of Justice. Within the case, students are also briefly exposed to legislation and bodies pertinent to whistleblowing in the United States, including the Dodd-Frank Act, the Sarbanes-Oxley Act, and the SEC Office of the Whistleblower. This case won the 2014 competition for Outstanding Case on Anti-Corruption, supported by the Principles for Responsible Management Education (PRME), an

initiative of the UN Global Compact. - Analyze stakeholders' motivations to prepare counter-arguments to the resistance one might encounter when reporting unethical behavior - Write a script for who to tell, how, and why - Discuss how incentive structures, management, and culture play roles in promoting or hindering ethical behavior in organizations - Identify behaviors that help a whistle-blower be effective - Gain experience resolving ethical dilemmas in which two values may conflict, such as professional duty and personal ethics.

engaging volume: venture capital. Venture capitalists provide necessary investment to seed (or startup) companies, but the startup is only the beginning, there is much more to be explored. These savvy investors help guide young entrepreneurs, who likely have little experience, to turn their businesses into the Googles, Facebooks, and Groupons of the world. This book explains the often-complex methods venture capitalists use to value companies and to get the most return on their investments, or ROI. This book is a must-have for any reader interested in the business world.

The string of business scandals that recently engulfed America painted a picture of corporate chieftains lining their pockets by cutting corners, cooking the books, and duping gullible investors. In doing so, greedy CEOs have hijacked what could be one of the most important business innovations in decades: stock options for all employees. Joseph Blasi, Douglas Kruse, and Aaron Bernstein—all leading experts on employee ownership—show how American companies would perform much better if they followed the lead of many high-tech firms and granted options to their entire workforce, rather than to just a tiny corporate elite. Using SEC data in a way never done before, they document the vast wealth

executives have accumulated for themselves. It shows how the abuse of options has taken place not just at scandal-ridden companies such as Enron and WorldCom, but across the entire reach of corporate America. In the *Company of Owners* argues that there's a better way. Broad-employee ownership through stock options offers a new model for U.S. corporations and American capitalism. The authors explain how employees and shareholders alike would benefit if most large companies adopted what they call the partnership capitalism approach—using options to encourage employees to think and act like owners. A searing critique of business as usual in America's executive suites, this book offers a comprehensive vision for how stock options can enrich companies, employees, investors, and the U.S. economy as a whole. With its remarkable new evidence and astute

In The Company Of Owners John Wiley & Sons The SBIR program allocates 2.5 percent of 11 federal agencies' extramural R&D budgets to fund R&D projects by small businesses, providing approximately \$2 billion annually in competitive awards. At the request of Congress the National Academies conducted a comprehensive study of how the SBIR program has stimulated technological innovation and used small businesses to meet federal research and development needs.

Drawing substantially on new data collection, this book examines the SBIR program at the National Institutes of Health and makes recommendations for improvements. Separate reports will assess the SBIR program at DOD, NSF, DOE, and NASA, respectively, along with a comprehensive report on the entire program.

Strategic Management Hoovers Incorporated Case Problems in Finance is a Harvard case course presenting real business situations that pose debatable alternative courses of action. The cases contain problems that can be narrowed but not always settled by the usual techniques of financial analysis. It will teach students to discover ways of thinking that are productive in handling different types of managerial problems intelligently. The cases are grouped by major topics: financial analysis and forecasting, cost of capital, working capital management, capital budgeting, dividend policy, debt policy, financial execution, and mergers and restructuring.
