The 18th century was a wealth of knowledge, exploration and rapidly growing technology and expanding record-keeping made possible by advances in the printing press. In its determination to preserve the century of revolution, Gale initiated a revolution of its own: digitization of epic proportions to preserve these invaluable works in the largest archive of its kind. Now for the first time these high-quality digital copies of original 18th century manuscripts are available in print, making them highly accessible to libraries, undergraduate students, and independent scholars. Western literary study flows out of eighteenth-century works by Alexander Pope, Daniel Defoe, Henry Fielding, Frances Burney, Denis Diderot, Johann Gottfried Herder, Johann Wolfgang von Goethe, and others. Margaret Bourke-White (1904-1971) is considered one of the first female photojournalists in the history of photography. She was a woman ahead of her time who wanted to break the mould and she achieved objectives that were very difficult for most women and offered the strongest resistance. Bourke-White was the first female photographer on the staff of both Fortune and Life magazines; the first Western photographer allowed to photograph the Soviet Union in 1930 - including both its industries and its people; the first woman photographer to work for the United States Air Force; and the only foreign photographer - male or female - in Moscow when the German bombs began to fall on the city on 19 July. This magnificently illustrated volume offers a fascinating insight into the work of this unique photographer and her "insatiable desire to be on the scene when history was being made."

It is 1989 and a seemingly invincible Prime Minister has sacked Geoffrey Howe, her Foreign Secretary. She apparently had nothing to fear from him: his speaking skills had, famously, been compared to those of a dead sheep. But, a year later, inspired by his wife Elspeth - whose relationship with Thatcher was notoriously frosty - Howe overcame his limitations to destroy Mrs Thatcher with one of the great political speeches. Dead Sheep is a drama tinged with tragedy and comedy. Its themes - loyalty, love, political morality and Britishness - are still uncannily relevant today. .

Whether you tackle it as part of downsizing effort or simply to simplify your life, decluttering an entire home is a big job. The best way to tackle it is in stages - to focus on one room, one space, or even one zone within a room (like your kitchen cabinets), completing the job fully before moving on to the next space. This will also build confidence as you experience visible success at each step.

The reason why government and churches manage us is because they are always using specific knowledge behind the scenes to manipulate us so that we can believe in their agenda and ideals. Manipulation can be negative or positive. When someone uses emotional and communication skills to help you change for better, then such manipulation can be regarded as positive. But when people who flourish in dark traits use manipulation techniques to further their own interests at the expense of others, then that becomes negative manipulation. Today, whether we know it or not, we are being manipulated from all circles. In the workplace, some colleagues try to use dark techniques to further their own interest at our expense. In our relationship, some partners may take advantage of our vulnerability to manipulate us. In the mainstream media, we are being manipulated and influenced by all sorts of advertisements. With everyone trying to reach for us and gain some mileage on us in one way or another, it is good to learn to be on the lookout so that we can be able to sift between those who have good intentions of helping us and those who are out to hurt us. This book covers Basics of dark psychology Dark persuasion methods Narcissism, sadism, machiavellianism, psychopathy Common techniques & tricks used in dark psychology How to use manipulation techniques Characteristic of manipulators Weapons of persuasion Emotional influence & manipulation tactics Mind control and techniques Police manipulation techniques Understanding narcissists' manipulation schemes Difference between persuasion and negotiation Hypnosis Brain washing Toxic people The power of persuasion The importance of body language Sociopathy The levels of consciousness Self-protection Communication skills And much more Usually, people who use deception techniques and controlling attitudes on us have bad intentions. Such a person can be either a psychopath, sociopath, narcissist, or Machiavellian. These are people with dark personalities, and their central agenda is to instill fear, through intimidation so that they can gain control of us and use us as a means to achieve their hidden ends. They have dark traits such as lacking morals, egoism, cynism sadism, lack of empathy, and many more. When you notice such characteristics in your colleague, partner, or friend, then you should exercise caution when they try to use the charming ways or emotional blackmail to corner you. Such people usually use fear and deception to exercise superiority so that they can take advantage of others. Generally, manipulators are full of ego and only thinks of themselves. The hand is quicker than the eye. In many cases, so is digital video. Maintaining image quality in bandwidth- and memory-restricted environments is quickly becoming a reality as thriving research delves ever deeper into perceptual coding techniques, which discard superfluous data that humans cannot process or detect. Surveying the topic from a Human Visual System (HVS)-based approach, Digital Video Image Quality and Perceptual Coding outlines the principles, metrics, and standards associated with perceptual coding, as well as the latest techniques and applications. This book is divided broadly into three parts. First, it introduces the fundamental theory, concepts, principles, and techniques underlying the field, such as the basics of compression, HVS modeling, and coding artifacts associated with current well-known techniques. The next section focuses on picture quality assessment criteria; subjective and objective methods and metrics, including vision model based digital video impairment metrics; testing procedures; and international standards regarding image quality. Finally, practical applications come into focus, including digital image and video coder designs based on the HVS as well as post-filtering, restoration, error correction, and concealment techniques. The permeation of digital images and video throughout the world cannot be understated. Nor can the importance of preserving quality while using minimal storage space, and Digital Video Image Quality and Perceptual Coding provides the tools necessary to accomplish this goal. Instructors and lecturers wishing to make use of this work as a textbook can download a presentation of 786 slides in PDF format organized to augment the text. accompany our book (H.R. Wu and K.R.
