The Routledge Handbook of Taxation and Philanthropy ventures into a territory that is still widely unexplored. It contains 30 academic contributions that aim to provide a better understanding of whether, why, and how philanthropic initiatives, understood as voluntary contributions for the common good, can and should be fostered by states through tax incentives. The topic has been addressed from a multidisciplinary and multicultural perspective – covering neuroeconomics, sociology, political science, psychology, affective sciences, philosophy, behavioral

economy, and law – because of its global and multifaceted nature. It also contains the OECD report on Taxation and Philanthropy released in November 2020, which was prepared in this context as a result of a collaboration with the Geneva Centre for Philanthropy of the University of Geneva. The book is divided into four sections, exploring, respectively, the justification of tax incentives for philanthropy, theoretical and empirical insights about taxes, efficiency and donor behavior in that context, and tax incentives for cross-border philanthropy and for hybrid entities and social entrepreneurship. It is believed that this

volume will be a landmark yet only the beginning of a journey in which a lot remains to be studied, learned, and said.

OECD Economic Outlook,

Volume 2000 Catalog of Sears, Roebuck and

CompanySearsGhost of Empire Blends history and memoir in an account that in alternating chapters explores the author's quest to understand the impact of his brothers on his life and the complex relationships between iconic brothers, including the Thoreaus, the Van Goghs, and the Marxes.

Routledge

In A Guide to the New Ruins of Great Britain, Owen Hatherley skewered New Labour's architectural legacy in all its witless swagger. Now, in the year of the Diamond Jubilee and the London Olympics, he sets out to describe what the Coalition's altogether different approach to economic mismanagement and civic irresponsibility is doing to

the places where the British live.

In a journey that begins and ends in the capital, Hatherley takes us from Plymouth and Brighton to Belfast and Aberdeen, by way of the eerie urbanism of the Welsh valleys and the much-mocked splendour of modernist Coventry. Everywhere outside the unreal Southeast, the building has stopped in towns and cities, which languish as they wait for the next bout of self-defeating austerity. Hatherley writes with unrivalled aggression about the disarray of modern Britain, and yet this remains a book about possibilities remembered, about unlikely successes in the midst of seemingly inexorable failure. For as well as trash, ancient and modern, Hatherley finds signs of the hopeful country Britain once was and hints of what it might become.

Sears University of Chicago Press

Between 1948 and 1955, nearly two-thirds of all American families bought a television set—and a revolution in social life and popular culture was launched. In this fascinating book, Lynn Spigel chronicles the enormous impact of television in the formative years of the new medium: how, over the course of a single decade, television became an intimate part of everyday life. What did Americans expect from it? What effects did the new daily ritual of watching television have on children? Was television welcomed as an unprecedented "window on the world," or as a "one-

eyed monster" that would disrupt households and corrupt children? Drawing on an ambitious array of unconventional sources, from sitcom scripts to articles and advertisements in women's magazines, Spigel offers the fullest available account of the popular response to television in the postwar years. She chronicles the role of television as a focus for evolving debates on issues ranging from the ideal of the perfect family and changes in women's role within the household to new uses of domestic space. The arrival of television did more than turn the living room into a private theater: it offered a national stage on which to play out and resolve conflicts about the way Americans should live. Spigel chronicles this lively and contentious debate as it took place in the popular media. Of particular interest is her treatment of

the way in which the phenomenon of television itself was constantly deliberated—from how programs should be watched to where the set was placed to whether Mom, Dad, or kids should control the dial. *Make Room for TV* combines a powerful analysis of the growth of electronic culture with a nuanced social history of family life in postwar America, offering a provocative glimpse of the way television became the mirror of so many of America's hopes and fears and dreams.

Books

There are three basic themes in Ralph Borsodi's *This Ugly Civilization* a critique of modern industrial civilization, achieving personal economic independence, and maximizing individual potential. Borsodi advocates a lifestyle of self-reliance and decentralized power, and outlines how it can be realized either by one man or by all. The logical steps are given for moving beyond a "victory garden" so that each of us may cultivate a human-scale existence compatible with nature and the pursuit of the good life. Received with great interest upon release in 1929, *This Ugly Civilization* offered a course of action for those who were soon

facing the Great Depression. The book again found an audience during the rationing and instability of World War II. *This Ugly Civilization* and Borsodi's subsequent *Flight from the City* (1933) became "bibles" to many in the successive "back-to-the-land" movements that occur every generation. His ideas gained further momentum among young people looking for answers in the 1960s and 70s. The indefatigable Mildred Loomis, the greatest advocate of Borsodi's work, even garnered the nickname "grandmother of the counterculture." Within another decade, the punk-inspired DIY movement would rail against centralizing authority and encourage the creation of a new culture of self-

determination-although such radical ideas were hardly new, as Borsodi's book shows. This Ugly Civilization rejects the reign of quantity over quality in both man and machine, along with the concomitant rise of consumerism and groupthink. Above and beyond mere self-sufficiency, Barsodi champions an appreciation of beauty, uniqueness and craftsmanship over the factory conformity being imposed in every sector of life. He has written a pragmatic, poetic and philosophical work that will speak to every thoughtful nonconformist. It represents an early seed of the Green Revolution that continues to promote health, comfort and independence. It is about

living a whole, organic life and developing the potential of the individual, the family and the surrounding community. Detroit Suburban West-Northwest Area Telephone Directories Sophia Institute for Teachers This book describes the living-room artifacts, clothing styles, and intellectual proclivities of American classes from top to bottom Digital Minimalism Artisan Advertising expenditure data across ten media: consumer magazines, Sunday magazines, newspapers, outdoor, network television, spot television, syndicated television, cable television, network radio, and national spot radio.

Lists brands alphabetically and shows total ten media expenditures, media used, parent company and PIB classification for each brand. Also included in this report are industry class totals and rankings of the top 100 companies of the ten media.

TV Guide Springer Nature

Over the concluding decades of the twentieth century, the historic preservation community increasingly turned its attention to modern buildings, including bungalows from the 1930s, gas stations and diners from the 1940s, and office buildings and architectural homes from the 1950s.

Conservation efforts,

however, were often hampered by a lack of technical information about the products used in these structures, and to fill this gap Twentieth-Century Building Materials was developed by the U.S. Department of the Interior ' s National Park Service and first published in 1995. Now, this invaluable guide is being reissued—with a new preface by the book ' s original editor. With more than 250 illustrations, including a full-color photographic essay, the volume remains an indispensable reference on the history and conservation of modern building materials.

Thirty-seven essays

written by leading experts offer insights into the history, manufacturing processes, and uses of a wide range of materials, including glass block, aluminum, plywood, linoleum, and gypsum board. Readers will also learn about how these materials perform over time and discover valuable conservation and repair techniques.

Bibliographies and sources for further research complete the volume. The book is intended for a wide range of conservation professionals including architects, engineers, conservators, and material scientists engaged in the conservation of modern

buildings, as well as scholars in related disciplines.

"Newport is making a bid to be the Marie Kondo of technology: someone with an actual plan for helping you realize the digital pursuits that do, and don't, bring value to your life."--Ezra Klein,

Vox Minimalism is the art of knowing how much is just enough. Digital minimalism applies this idea to our personal technology. It's the key to living a focused life in an increasingly noisy world. In this timely and enlightening book, the bestselling author of Deep Work introduces a philosophy for

technology use that has saturated world. Common already improved sense tips, like turning countless lives. Digital off notifications, or minimalists are all around occasional rituals like us. They're the calm, observing a digital happy people who can sabbath, don't go far hold long conversations enough in helping us take without furtive glances at back control of our their phones. They can technological lives, and get lost in a good book, a attempts to unplug woodworking project, or completely are a leisurely morning run. complicated by the demands of family, friends and family, friends and work. What without the obsessive we need instead is a urge to document the thoughtful method to experience. They stay decide what tools to use, informed about the news for what purposes, and of the day, but don't feel under what conditions. overwhelmed by it. They Drawing on a diverse don't experience "fear of array of real-life missing out" because examples, from Amish they already know which farmers to harried activities provide them parents to Silicon Valley meaning and satisfaction. programmers, Newport identifies the common Now, Newport gives us a practices of digital name for this quiet minimalists and the ideas movement, and makes a that underpin them. He persuasive case for its shows how digital urgency in our tech-

minimalists are rethinking their relationship to social media, rediscovering the pleasures of the offline world, and reconnecting with their inner selves through regular periods of solitude. He then shares strategies for integrating these practices into your life, starting with a thirty-day "digital declutter" process that has already helped thousands feel less overwhelmed and more in control.

Technology is intrinsically neither good nor bad. The key is using it to support your goals and values, rather than letting it use you. This book shows the way.
