Svet ako celok sa vyvíja natoľko dynamicky a často i chaoticky, že kategorizácia a inventarizácia globálnych problémov sa

stávajú stále až šími a ich okruh sa značne rozširuje. Časť z týchto problémov nemožno jednoznačne, presne a jasne definovať, vymedziť ich hranice, vzájomnú hierarchizáciu a mnohotvárnosť prepojenia. Väššina globálnych problémov má bezpochyby základnú ekonomickú dimenziu a bezprostredne ovplyvňuje svetové hospodárstvo. V posledných rokoch saorazastejšie o globálnych problémoch hovorí aj na Slovensku predovšetkým rastom rozdielov ekonomického a sociálneho rozvoja v rámci jednotlivých regiónov. Pojem globalizácia nadobudol ešte väčší rozmer vďaka finančnej kríze, ktorá prerástla do krízy hospodárskej. Slovensko sa na začiatku 21. storočia stalo bezprostrednou súčasťou globalizačných megatrendov súčasnej civilizácie, ktoré predstavujú určujúci exogénny faktor prenikajúci do všetkých podstatných aspektov vývoja slovenskej spoločnosti. Jeho ekonomika však nepôsobí v globalizovanej svetovej ekonomike jednotlivito, ale ako organická súčasť integrácie hospodárstva Európskej únie, ktoré mu poskytuje integrovaný priestor rozvoja. Globalizácia sa pokladá azda za

najvplyvnejší proces určujúci budúcnosť svetovéhospoločenstva. Zároveň argumentácia postojov ku globalizácii vychádza z ekonomických a ekonomicko-sociálnych súvislostí. Aj táto práca sa preto vo svojom úvode sústreďuje na ekonomickú dimenziu globalizácie s prihliadnutím, že nejde o úplne nový jav. Prezentuje výsledky vyhodnotenia vplyvu globalizácie na ekonomiku SR a naratáva z ákladné rámcové adaptívne stratégie SR na tieto tendencie. Americká kríza, ktorá vypukla na sklonku roka 2007 žiaľ, má vplyv aj na európsku ekonomiku a v konečnom dôsledku aj na Slovensko. Situácia, v ktorej sa priemysel SR ocitol, vyžadovala venovať pozornosť iršim súvislostiam a nenechať bez povšimnutia globálne problémy, ktoré prerástli do finančnej a hospodárskej krízy. Prejavom krízy je hlavne stagnácia vo výrobe automobilov. V slovenskej ekonomike sa vplyvom krízy postihnutie dotýka predovšetkým vývozcov z automobilového priemyslu, ich dodávateľov ale aj iných firiem. Cieľom predkladanej štúdie nie je analýza všetkých aspektov globalizačných procesov, ale snaha naratú najdôležitejšie trendy, vplyvy a dopady globálnej krízy na náš priemysel v národnom i regionálnom meradle. Podmienil to plytký a nekomplexný prístup k objasneniu príčin súvislostí, určujúcich prvkov obsahu a foriem prejavu procesu globalizácie. Dôsledky globálnej krízy sú premietnuté do problémov najväčších automobilových koncernov sveta, pretože niektoré z nich sa stali bezprostrednou súčasťou stavu našej ekonomiky. Regionálne dopady sú podrobnejšie analyzované v kapitole priamych zahraničných investícií a priemyselných parkov.

The World's Cities offers instructors and students in higher education an accessible introduction to the three major perspectives influencing city-regions worldwide: City-Regions in a World System; Nested City-Regions; and The City-Region as the Engine of Economic Activity/Growth. The book provides students with helpful essays on each perspective, case studies to illustrate

each major viewpoint, and discussion questions following each reading. The World's Cities concludes with an original essay by the editor that helps students understand how an analysis incorporating a combination of theoretical perspectives and factors can provide a richer appreciation of the world's city dynamics.

How can professional competence be measured? How can competences be detected early in vocational training so that European professional qualifications can be made comparable? The book examines the structure and scope of competences relating to competence requirements of business management. The author develops tools for measuring professional competences which allow for the systematic recording of job activities and argumentations. This is based on a business domain model which can be used for the development of instruments for measuring competences as well as for designing training programs. After an introduction to probabilistic test theory, the book presents psychometric models and procedures of vocational competence measurements in full time school and dual educational systems.

Die Abgrenzung von Märkten ist eine der Grundaufgaben, die im strategischen Marketing zu lösen ist. Denn erst die Unterteilung des Gesamtmarktes in überschaubare und analysierbare Teilmärkte ermöglicht einen umfassenden Einblick in die komplexen Beziehungen zwischen Anbietern, Nachfragern und Produkten. Um die relevanten Marktsegmente und die entsprechenden dominanten Wettbewerber für die eigenen Fahrzeuge zu bestimmen, werden von der Automobilindustrie traditionell technische Kriterien herangezogen. Allerdings erscheint eine Marktabgrenzung, die auf einer einfachen Aufzählung der objektiven Produkteigenschaften basiert und somit die Sichtweise der Konsumenten vollständig vernachlässigt, als Entscheidungs- und Handlungsgrundlage nicht mehr ausreichend. Dies gilt insbesondere unter dem Aspekt, dass die Nachfrager bei ihrer Kaufentscheidung aufgrund der zunehmenden Homogenisierung der Produkte immer seltener objektive, sondern stattdessen vor allem subjektive, intrinsische Produktmerkmale zugrunde legen. Die steigende Individualisierung der Bedürfnisse sowie das wachsende Anspruchsniveau gegenüber den angebotenen Produkten seitens der Nachfrager machen es daher erforderlich, eine Marktabgrenzung aus Konsumentensicht vorzunehmen. Das Ziel der vorliegenden Studie besteht somit darin, einen Ansatz zur Marktabgrenzung zu ermitteln, der eine kundenorientierte Ableitung von Wettbewerbsmärkten erlaubt, um Erkenntnisse über eine angemessene Vorgehensweise zur Marktabgrenzung in der Automobilindustrie zu gewinnen. Als Abgrenzungsvariable wird das Consideration Set der Neuwagenkunden herangezogen. Dieses Vorgehen ist folgendermaßen zu begründen: Auf der

Produktseite steht das Konstrukt 'Consideration Set' für die Substituierbarkeit der Fahrzeuge aus Nachfragersicht und wird daher als geeignet angesehen, aufgrund seiner Zusammensetzung Rückschlüsse auf bestehende

Wettbewerbsbeziehungen im Automobilmarkt zuzulassen. Auf der Nachfragerseite steht das Konstrukt 'Consideration Set

The growing together of the European labour markets proves to be a genuine challenge for education, particularly for VET-systems. VET-systems have to provide future employees with the necessary qualifications that they are well equipped for flexibility, mobility and challenges of international cooperation on the labour market. If today's VET-systems are able to impart these key qualifications is unknown.

Therefore, the German Government (BMWA) initiated a feasibility study on VET - modelled on the basis of PISA research studies. The concept of a PISA for vocational education and training presented in this book was developed by leading international experts in the field. It shows how a measuring of expertise and competence is actually possible. It describes the criteria to be used for the evaluation of training programs, and discusses how the efficiency of different learning places are to be evaluated. This study explores the conditions and processes necessary for an improvement of vocational education and training in the participating countries. It thereby provides a significant contribution for the political debate, but also for the academic discussion, for instance on the establishing of a European system of VET. Managing uncertainty and inconsistency has been extensively explored in - tificial

Intelligence over a number of years. Now with the advent of massive amounts of data and knowledge from distributed heterogeneous, and potentially conflicting, sources, there is interest in developing and applying formalisms for uncertainty and inconsistency widely in systems that need to better manage this data and knowledge. The annual International Conference on Scalable Uncertainty Management (SUM) has grown out of this wide-ranging interest in managing uncertainty and inconsistency in databases, the Web, the Semantic Web, and AI. It aims at bringing together all those interested in the management of large volumes of uncertainty and inconsistency, irrespective of whether they are in databases, the Web, the Semantic Web, or in AI, as well as in other areas such as information retrieval, risk analysis, and computer vision, where significant computational efforts are needed. After a promising First International Conference on Scalable Uncertainty Management was held in Washington DC, USA in 2007, the conference series has been successfully held in Napoli, Italy, in 2008, and again in Washington DC, USA, in 2009.
