[EPUB] Seat Technic Guide Rear-facing seats should be installed in the back seat of your vehicle. Never place a rear-facing seat in front of an active passenger frontal air bag. The center seating

position is ideal if it can be used, since it is the farthest from any point of impact. The seat should be installed using either the LATCH system or vehicle safety belt, never both. Car Seat Guide | AAA Exchange Page 2/10

The tools are intended for you to use to promote items such as child passenger safety, distracted driving awareness and seat belt safety. Dig in to the free resources and enhance your highway safety efforts with free images, social media graphics and web videos. There is even a car seat safety toolkit: Think Safe, Ride Safe, Be Safe.

Car Seat Recommendations for Children

Seat belts fit properly when the lap belt lays across the upper thighs (not the stomach) and

the shoulder belt lays across the chest (not the neck). Proper seat belt fit usually occurs when children are about 4 feet 9 inches tall and aged 9–12 years. Seat belt fit can vary by vehicle so check fit in all vehicles.

As a CPS technician, you will put your knowledge to work through a variety of activities, including community presentations and/or child safety seat checks where parents and caregivers receive education and hands-on assistance with the proper use of child restraint systems and seat belts. A majority of parents still misuse their child restraints and need help to get it right.
