The Law Library presents the complete text of the Smaller Reporting Company Regulatory Relief and Simplification (US Securities and Exchange Commission Regulation) (SEC) (2018 Edition). Updated as of May 29, 2018 The Securities and Exchange Commission is adopting amendments to its disclosure and reporting requirements under the Securities Act of 1933 and the Securities Exchange Act of 1934 to expand the number of companies that qualify for its scaled disclosure requirements for smaller reporting companies. Companies that have less than \$75 million in public equity float will qualify for the scaled disclosure requirements under the amendments. Companies without a calculable public equity float will qualify if their revenues were below \$50 million in the previous year. To streamline and simplify regulation, the amendments move the scaled disclosure requirements from Regulation S-B into Regulation S-K. Regulation of Securities: SEC Answer Book, 5th

Edition Kluwer Law International B.V.

"This book focuses on a very timely and important subject that merits comprehensive analysis: "rethinking" the securities laws, with particular emphasis on the Securities Act and Securities Exchange Act. The system of securities regulation that prevails today in the United States is one that has been formed through piecemeal federal legislation, Securities and Exchange Commission (SEC) invocation of its administrative authority, and self-regulatory episodic action. As a consequence, the presence of consistent and logical regulation all too often is lacking. In both transactional and litigation settings, with frequency, mandates apply that are erratic and antithetical to sound public policy. Over four decades ago, the American Law Institute (ALI) adopted the ALI Federal Securities Code. The Code has not been enacted by Congress and its prospects are dim. Since that time, no treatise, monograph, or other source comprehensively has focused on this meritorious subject. The objective of this book is to identify the deficiencies that exist under the current regimen, address their failings, provide recommendations for rectifying these deficiencies, and set forth a thorough analysis for remediation in order to prescribe a consistent and sound securities law framework. By undertaking this challenge, the book provides an original and valuable resource for effectuating necessary law reform that should prove beneficial to the integrity of the U.S. capital markets, effective and fair government and private enforcement, and the enhancement of investor protection"--

Effective corporate reporting and disclosure are critical in financial markets to promote vigorous competition, optimal performance, and transparency. This book examines whether existing disclosure frameworks in eight countries with the world's most significant securities exchanges achieve these objectives, and then, drawing on extensive empirical findings, identifies the policies and practices that contribute most to improving the overall quality of listed company reporting and communication. Contending that public disclosure of listed company information is an essential precondition to the long-term efficient operation of financial markets, the book provides analysis of such issues and topics as the following: - arguments for and against mandatory disclosure regimes; - key principles of periodic and continuous disclosure regulation; - tensions between direct and indirect investment in financial markets; - assumptions concerning the need to maintain a privileged role for financial intermediaries; - intermediary, analyst, and research incentives; - protection of individual investors; - selective disclosure; - disclosure of bad news; - the role of accounting standards; - public access to company briefings; - long term performance reporting and analysis; and - company reporting developments. A significant portion of the book provides an overview of disclosure regulation and practice in the United States, Canada, Germany, the United Kingdom, Japan, Hong Kong, Australia, and Singapore. A highly informative survey looks at company reports, disclosures, and websites of large listed companies, including Microsoft, Citigroup, Teck Resources, Deutsche Bank, BP, Sony, PetroChina Company, BHP Billiton, and Singapore Telecommunications. The book discusses common disclosure issues that arise across jurisdictions, provides valuable insights on the efficacy of existing disclosure regulation and practice, and highlights the important principles,

processes, and practices that underpin best practice company disclosure frameworks. It will be welcomed by company boards and executives and their counsel, as well as by policymakers and scholars in the areas of corporate, securities, banking and financial law, accounting, economics and finance.

For decades, the world's governments have struggled to move from talk to action on climate. Many now hope that growing public concern will lead to greater policy ambition, but the most widely promoted strategy to address the climate crisis — the use of market-based programs — hasn't been working and isn't ready to scale. Danny Cullenward and David Victor show how the politics of creating and maintaining market-based policies render them ineffective nearly everywhere they have been applied. Reforms can help around the margins, but markets' problems are structural and won't disappear with increasing

demand for climate solutions. Facing that reality requires relying more heavily on smart regulation and industrial policy – government-led strategies – to catalyze the transformation that markets promise, but rarely deliver.

The Securities and Exchange Commission (SEC) is being buffeted by diametrically opposing forces with regard to disclosure policy rulemaking. The Dodd-Frank Act of 2010 required the SEC to pass rules to compel public companies to make disclosures about conflict minerals, mine safety and certain payments to foreign governments, all for the purpose of advancing societal goals. Proponents of sustainability metrics have been urging the SEC to adopt standards relating to environmental and other similar matters, and a petition on disclosure of corporate contributions and lobbying expenses by public companies would involve the SEC in another political quagmire. Yet, the SEC is also being pressured by forces that would deregulate disclosure mandates and some such deregulatory measures were included in the JOBS Act of 2012. Also, the SEC has embarked on its own initiative for streamlining disclosure obligations. This article discusses these conflicting disclosure initiatives and some of the current academic papers and theories with regard to SEC disclosure policy. I suggest a few possible ways for the SEC to move forward, including scaled and tiered disclosure.
