A twelve-and-a-half-year-old boy who is impoverished and abused has an amazing change in his life after he decides to help a discharged Canadian alcoholic war veteran survive for a few cold months from October to December 1945. The veteran is killed when he is run down by a streetcar. While the boy is spiritually motivated, his parents are infected with the archon disease. You will follow his life from twelve and a half until eighty years of age. This book tells a true story of someone who has, at this date, served forty-seven years in the light. It is not sentimental or is it namby-pamby. It describes what life is, like in the lower levels of a large Canadian city Toronto. It also describes what it is like to make a complete U-turn away from disaster. Hearings, Eighty-ninth Congress, First Session, on S. 370 Rand Corporation

This book is a great resource of IDEAS for common composition topics. And to show how these ideas can link to become a continuous story, a MODEL COMPOSITION on the same topic is

included for reference. The varied topics are written in different styles, intended to present different text types. Each topic begins with ideas in short phrases for the paragraphs in a composition. Interesting words used are printed in bold, and these words are explained in the "Vocabulary" box at the bottom of every IDEA page. A complete composition on the same topic is presented showing how the ideas are linked and how the paragraphs flow. Students can learn how to present their ideas in short descriptive phrases when working on their drafts. The model compositions also show the various techniques and ways of linking ideas and sentences. By reading more, a student will be able to express himself clearly and write better compositions. Students will find this book useful as a learning resource for composition writing.

This scholarly study of the formation of the Irish literary canon in the first half of the twentieth century provides fascinating and often surprising insights into the ways in which different educational institutions responded to the political and historical changes taking place as Ireland moved from colonial to postcolonial status. Dr Wei H. Kao discusses not only what was included on school and university curriculum but also writers who were excluded, in particular women writers who appeared to interrogate a male nationalist agenda for the representation of Ireland.- Emeritus Professor C.L. Innes The writers discussed include Daniel Corkery, J.G. Farrell, Denis Johnston, Mary Lavin, Iris Murdoch, Kate O'Brien, Frank O'Connor, Liam O'Flaherty, and James Plunkett.

Describes the first phase (2001-2004) of Qatar's bold K-12 education reform initiative, Education for a New Era, based on RAND's experiences as part of this ambitious, multi-participant effort. RAND examined the existing Qatari education system, recommended options for building a world-class system, and supported

implementation of the chosen option, which is based on internationally benchmarked curriculum standards and parental choice of schools.

This book discusses the interwoven themes of teacher learning and classroom assessment, highlighting the complexity and intricacy of these processes in a range of very different classroom contexts. The case studies demonstrate how classroom assessment is needed for teachers to learn about teaching and for them to be able to grow professionally and improve student learning. Although this volume is mainly situated in the unique and varied contexts of the Asia-Pacific region, it addresses the key issues of quality teaching, assessment, and accountability in a global context.

The author attempts to answer the question of why ESL classroom talk is the way it is. Basing her answer on a case study of a school in an ESL community, she argues that classroom talk may be linked in important ways to an operative sociocultural structure of ESL pedagogy over and above the classroom at the institutional level.

Assessment is a key area of interest and debate in education. Its increased use by governments as a powerful means of influencing educational practice are now features of the educational scene worldwide. This volume was the first major international review of such developments and it explores the impact of assessment on all areas of education, from teaching skills to policy-making. The contributors take a global perspective to spotlight the common problems facing teachers and students, policy-makers and politicians through the world as they seek to reconcile issues of equity and national development, educational imperatives and finite state resources. The contributions discuss the changing role of assessment and public examinations, and consider such specific issues as the development of a market economy in educational provision, the difficulties of measuring standards in international studies, and accreditation of absolute rather than relative competencies.

The high degree of internet penetration and its social (and linguistic) effects evidently influence how people, and especially the highly susceptible younger generations, use language. The primary aim of the book is not only to identify the characteristic features of the digital language variety (this has already been done by several works) but to examine how digital communication affects the language of other mediums of communication: orality, handwritten texts, digitally created but not digitally perceived, that is printed texts, including in particular advertisements (which quickly respond to linguistic change). Naturally, the book presents the characteristics of the digital language variety (and coins the term digilect) but only to give a framework to the impact analysis. It is important to document changes in progress and thus direct attention to potential outcomes. The current linguistic change is different from previous ones primarily in its speed and form of spreading, and it not only brings innovative grammatical forms and writing/spelling solutions but may also have far-reaching cultural and educational consequences in the long run.

Annie Edith (Hannah Judith) Landau (1873-1945), born in London to immigrant parents and educated as a teacher, moved to Jerusalem in 1899 to teach English at the Anglo-Jewish Association's Evelina de Rothschild School for Girls. A year later she became its principal, a post she held for forty-five years. As a member of Jerusalem's educated elite, Landau had considerable influence on the city's cultural and social life, often hosting parties that included British Mandatory officials, Jewish dignitaries, Arab leaders, and important visitors. Her school, which provided girls of different backgrounds with both a Jewish and a

secular education, was immensely popular and often had to reject candidates, for lack of space. A biography of both an extraordinary woman and a thriving institution, this book offers a lens through which to view the struggles of the nascent Zionist movement, World War I, poverty and unemployment in the Yishuv, and the relations between the religious and secular sectors and between Arabs and Jews, as well as Landau's own dual loyalties to the British and to the evolving Jewish community.
