The aim of this volume is to record the resurgent influence of Language Learning in Translation Studies and the various contemporary ways in which translation is used in the fields of Language Teaching and Assessment. It examines the possibilities and limitations of the interplay between the two disciplines in attempting to investigate the degree to which recent calls for reinstating translation in language learning have borne fruit. The volume accommodates high-quality original submissions that address a variety of issues from a theoretical as well as an empirical point of view. The chapters of the volume raise important questions and demonstrate the beginning of a new era of conscious epistemological traffic between the two aforementioned disciplines. The contributors to the volume are academics, researchers and professionals in the fields of Translation Studies and Language Teaching and Assessment from various countries and educational contexts, including the USA, Canada, Taiwan R.O.C., and European countries such as Belgium, Germany, Greece, Slovenia and Sweden, and various professional and instructional settings, such as school sector and graduate, undergraduate and certificate programs. The contributions approach the interplay between the two disciplines from various angles, including functional approaches to translation, contemporary types of translation, and the discursive interaction between teachers and students.

Languages for Specific Purposes in Theory and Practice is a collection of essays which will appeal to teachers of modern languages no matter the level of instruction. The essays highlight the latest developments of Foreign Language Teaching in the Balkan countries, Eastern and Western Europe and the Middle East. The field of Language for Specific Purposes (LSP) is one of the richest areas of second language research and practice because increasing globalization and changing technologies spawn new modes of intercultural connection and new occasions for second language use. *Languages for Specific Purposes in Theory and Practice* compasses this burgeoning field by presenting new research and commentary from some of the field's leading practitioners. This book surveys the approaches and methods in foreign language teaching, such as grammar translation, language evaluation, communication competence, critical thinking skills, communicative language teaching, and the natural approach. Teachers and teachers-in-training will discover in this book a comprehensive survey and analysis of the major and minor teaching methods used around the world. It is addressed to a wide audience that includes Language for Specific Purposes teachers and researchers, although the contents will also be relevant to applied linguists working in other fields. This book contains research studies as well as educational experiences and

proposals, presented from different perspectives and backgrounds (both geographical and cultural), all of which are theoretically grounded and with a clear and sound rationale. Readers will find a variety of educational projects and research studies situated in specific educational contexts and in particular geographical locations.

The Atlas of North American English provides the first overall view of the pronunciation and vowel systems of the dialects of the U.S. and Canada. The Atlas re-defines the regional dialects of American English on the basis of sound changes active in the 1990s and draws new boundaries reflecting those changes. It is based on a telephone survey of 762 local speakers, representing all the urbanized areas of North America. It has been developed by Bill Labov, one of the leading sociolinguists of the world, together with his colleagues Sharon Ash and Charles Boberg. The Atlas consists of a printed volume accompanied by an interactive CD-ROM. The print and multimedia content is also available online. Combined Edition: Book and Multimedia CD-ROM The book contains 23 chapters that re-define the geographic boundaries of North American dialects and trace the influence of gender, age, education, and city size on the progress of sound change; findings that show a dramatic and increasing divergence of English in North America; 139 four color maps that illustrate the regional distribution of phonological and phonetic variables across the North American continent; 120 four color vowel charts of individual speakers. The multimedia CD-ROM supplements the articles and maps by providing a data base with measurements of more than 100,000 vowels and mean values for 439 speakers; the Plotnik program for mapping each of the individual vowel systems; extended sound samples of all North American dialects; multimedia applications to enhance classroom presentations. Online Version: Book and CD-ROM content plus additional data The online version comprises the contents of the book and the multimedia CD-ROM along with additional data. It presents a wider selection of data, maps, and audio

samples that will be recurrently updated; proffers simultaneous access to the information contained in the book and on the multimedia CD-ROM to all users in the university/library network; provides students with easy access to research material for classroom assignments.
