The Atlas of North American English University of Ottawa Press Languages for Specific Purposes in Theory and Practice is a collection of essays which will appeal to teachers of modern languages no matter the level of instruction. The essays highlight the latest developments of Foreign Language Teaching in the Balkan countries,

Eastern and Western Europe and the Middle East. The field of Language for Specific Purposes (LSP) is one of the richest areas of second language research and practice because increasing globalization and changing technologies spawn new modes of intercultural connection and new occasions for second language use. Languages for Specific Purposes in Theory and Practice compasses this burgeoning field by presenting new research and commentary from some of the field's leading practitioners. This book surveys the approaches and methods in foreign language teaching, such as grammar translation, language evaluation, communication competence, critical thinking skills, communicative language teaching, and the natural approach. Teachers and teachers-in-training will discover in this book a comprehensive survey and analysis of the major and minor teaching methods used around the world. It is

addressed to a wide audience that includes Language for Specific Purposes teachers and researchers, although the contents will also be relevant to applied linguists working in other fields. This book contains research studies as well as educational experiences and proposals, presented from different perspectives and backgrounds (both geographical and cultural), all of which are theoretically grounded and with a clear and sound rationale. Readers will find a variety of educational projects and research studies situated in specific educational contexts and in particular geographical locations.

Given the global demographic shift towards an aging population, there is a pressing need to understand how aging affects cognition. This collection of articles, from across the globe, represents some of the diverse aspects of cognitive aging. These articles investigate the fundamental processes and mechanisms underlying the neural and cognitive changes associated with normal and pathological aging. They describe the many facets of cognition, memory, language and thinking that are affected by the aging process. The articles will hopefully fascinate readers, and entice them to learn more about how such research is conducted, as well as

serving as avenues for exploration to compensate for deficits in cognitive function. The studies are cutting edge and offer insight into the development of the theories that best account for the changes in brain and behaviour that affect us all.

The Atlas of North American English provides the first overall view of the pronunciation and vowel systems of the dialects of the U.S. and Canada. The Atlas re-defines the regional dialects of American English on the basis of sound changes active in the 1990s and draws

new boundaries reflecting those changes. It is based on a telephone survey of 762 local speakers, representing all the urbanized areas of North America. It has been developed by Bill Labov, one of the leading sociolinguists of the world, together with his colleagues Sharon Ash and Charles Boberg. The Atlas consists of a printed volume accompanied by an interactive CD-ROM. The print and multimedia content is also available online.
Combined Edition: Book and Multimedia CD-ROM
The book contains 23 chapters that re-define the geographic boundaries of North American dialects and trace the influence of gender, age, education, and city size on the progress of sound change; findings that show a dramatic and increasing divergence of English in North America; 139 four color maps that illustrate the regional distribution of phonological and phonetic variables across the North

American continent; 120 four color vowel charts of individual speakers. The multimedia CD-ROM supplements the articles and maps by providing a data base with measurements of more than 100,000 vowels and mean values for 439 speakers; the Plotnik program for mapping each of the individual vowel systems; extended sound samples of all North American dialects; multimedia applications to enhance classroom presentations. Online Version: Book and CD-ROM content plus additional data The online version comprises the contents of the book and the multimedia CD-ROM along with additional data. It presents a wider selection of data, maps, and audio samples that will be recurrently updated; proffers simultaneous access to the information contained in the book and on the multimedia CD-ROM to all users in the university/library network; provides

120 students with easy access to research material for classroom assignments. For more information, please contact Mouton de Gruyter: customerservice@degruyter.com

The beautiful and haunting novel that launched David Almond as one of the best children's writers of today When a move to a new house coincides with his baby sister's illness, Michael's world seems

suddenly lonely and uncertain. Then, one Sunday afternoon, he stumbles into the old, ramshackle garage of his new home, and finds something magical. A strange creature - part owl, part angel, a being who needs Michael's help if he is to survive. With his new friend Mina, Michael nourishes Skellig back to health, while his baby sister languishes in the hospital. But Skellig is far more than he at first appears, and as he helps Michael breathe life into his tiny sister, Michael's world changes for ever . . . Skellig won the Carnegie Medal and the Whitbread Children's Book Award and is now a major Sky1 feature film, starring Tim Roth and John Simm. David Almond is also winner of the 2010 Hans Christian Andersen award. Powerful and moving - The Guardian This newly jacketed edition celebrates 15 years of this multi-award-winning novel.

The aim of this volume is to record the resurgent influence of Language Learning in Translation Studies and the various contemporary ways in which translation is used in the fields of Language Teaching and Assessment. It examines the

possibilities and limitations of the interplay between the two disciplines in attempting to investigate the degree to which recent calls for reinstating translation in language learning have borne fruit. The volume accommodates high-quality original submissions that address a variety of issues from a theoretical as well as an empirical point of view. The chapters of the volume raise important questions and demonstrate the beginning of a new era of conscious epistemological traffic between the two aforementioned disciplines. The contributors to the volume are academics, researchers and professionals in the fields of Translation Studies and Language Teaching and Assessment from various countries and educational contexts, including the USA, Canada, Taiwan R.O.C., and European countries such as Belgium, Germany, Greece,

Slovenia and Sweden, and various professional I), and instructional settings, such as school sector and graduate, undergraduate and certificate programs. The contributions approach the interplay between the two disciplines from various angles, including functional approaches to translation, contemporary types of translation, and the discursive interaction between teachers and students.
