GATE examines the intellectual and technical knowledge of the aspirants over various subjects like Chemistry, Zoology, Food Technology, Microbiology, Biochemistry, and General Aptitude. There are 65 objective and numerical-based questions in GATE Life Sciences. It is a three hours long duration exam that is conducted in the online mode.

General Aptitude & Chemistry are the two compulsory subjects in the GATE Life Sciences exam. Aspirants should have good command over all the subjects that are covered in GATE Life Sciences so that they can crack the exam successfully. EduGorilla has come up with a multitude of GATE Life Sciences mock tests and GATE Life Sciences online test series to help students for the better preparation of GATE. Our GATE Life Sciences mock tests and GATE Life Sciences online

test series are very effective for students for the overall preparation of the exam.

### *Resources in Education SAGE*

In the context of outcomes-based school governance, statewide exit exams are often expected to have a positive effect on student achievements if schools and teachers use the performance feedback from the exams for school, instructional, and professional development.

However, very little is known about whether the exams are used for development at all and how this is affected by factors in the exam system and organizational aspects of schools. In a comparison of Finland, Ireland, and the Netherlands, the study therefore investigates how different exam systems and their functions, the conditions at school level, and the use of the exams for school and classroom development are associated. The study uses expert interviews and a questionnaire survey with principals and teachers. The role statewide exit exams can play in education systems is analyzed from a governance perspective

---

and a school development perspective and discussed with an international comparative view. Esther Dominique Klein, born in 1982, Dr. phil., is research assistant at the Faculty of Educational Sciences of the University of Duisburg-Essen. Her main research interests lie in the areas of school system and school development research and international comparative education.

APS-Army Public School PGT Computer Science Exam Pearson Education South Asia

Based on real-life stories from an international school in Kuwait, which chart the survival of teachers from the thrown-in-at-the-deep-end start to the I-can't-believe-we-made-it finish. Outlandish comedy abounds as the teachers laugh and lose it, through a mine field of barriers to logic, and challenges to plain common sense. The book illuminates the startling excesses of the oil-money rich as they balance a past of poverty with an extreme pot of gold from the end of the rainbow. It shows Kuwait as a microcosm reflecting the

more global issues surrounding waste, ecology, using more than we need, and consumerism gone mad. The stories reveal the pros and cons of teaching on the international circuit and how the teachers adapt to an alien land of dust, sexual and racial inequality and an oppressive political regime, both inside and outside school. Resilience, fortitude and a hefty dose of humour gets the teachers through to the end with a cheer and a wave.

**Papers** Oswal Publishers Assessment, mainly in the form of tests and examinations, plays a critical role in the schooling of Singaporean students. The results are often used to make irrevocable decisions on the students' future education careers. This book is written with school leaders, teachers, and parents in mind, with the view of helping them to better understand the processes and products of assessment via tests and exams. It is written in simple terms, using minimal technical terms, and introduces school leaders, teachers, and parents to

essential concepts and principles of educational measurements which are relevant in the school context in Singapore. While existing books on educational measurement are academically-oriented and meant for formal training courses, this book makes self-study simple by using practical examples couched in layman's language. In addition, this book uses concrete examples and analogies to make the text reader-friendly. Contents:

## Secondary Science

KnowledgeCubs.com

Why do so many pupils in Years 7, 8 and 9 'switch off' and make very little progress in the core subjects such as English and mathematics? What can teachers and schools do to improve pupils' attitudes and motivation? Maurice Galton and his team have collected examples from various schools of what works in re-energising demotivated pupils. This book presents practical advice and strategies for improving lower secondary school classrooms, ranging from reducing class size, to innovative induction programmes emphasising the development of core study skills, and developing effective procedures to train pupils to cooperate rather than confront each other

during lessons. Chapters cover: - Making a Good Start to Secondary Education. - Creating a Cooperative Classroom Climate - Improving Communication between Pupils and Teachers - Why are some classrooms more successful? - How can school structures influence positive relationships? The book is a much-needed resource for all secondary teachers, and is particularly useful for year and subject heads.

### on Practice

This book's structure reflects the different dimensions to learning science. The first section focuses on the importance of talk in the science classroom, while the second explores the key role of

---

practical work. The third section is concerned with the creative, theoretical aspect of science. Section four follows this by considering the communication of ideas and how pupils learn to participate in the discourse of the scientific community. Section five emphasizes the place of science in the broader context, considering its moral and ethical dimensions and its place in a cultural context. Finally, section six explores the complexity of the task faced by science teachers, highlighting the knowledge and skills science teachers must acquire in order to create an environment in which students are motivated to learn science.
