Life of Charlemagne Harvard University Press
Revisiting one of the great puzzles of European political history, Jennifer R. Davis examines how the Frankish king Charlemagne and his men held together the vast new empire he created during the first decades of his reign. Davis explores how Charlemagne overcame the two main problems of ruling an empire, namely how to delegate authority and how to manage diversity. Through a meticulous reconstruction based on primary sources, she demonstrates that rather than imposing a pre-existing model of empire onto conquered regions, Charlemagne and his men learned from them, developing a practice of empire that allowed the emperor to rule on a European scale. As a result, Charlemagne's realm was more flexible and diverse than has long been believed. Telling the story of Charlemagne's rule using sources produced during the reign itself, Davis offers a new interpretation of Charlemagne's political practice, free from the distortions of later legend.

Hitler's Gauls, the first in the Hitler's Legions series on foreign volunteers and their units, is an in-depth examination of one of the least well-known of these divisions, the Charlemagne, recruited entirely from conquered France. Founded late on in the war in the autumn of 1944, the Charlemagne fought hard on the Eastern Front, often motivated by an extreme anti-communist zeal. Hitler's Gauls explores the background to the unit's formation, the men it recruited, the key figures involved in the division, and its organization. It also looks at the formation and training of the Waffen-SS in general and the Charlemagne in particular, and also the uniforms and insignia that members of the Charlemagne division wore. Hitler's Gauls also provides a full combat record of the division during its existence. The book describes the unit's service on the Eastern Front including battles of near annihilation in the snows of Pomerania and the final stand in the ruins of Berlin. Illustrated with rare photographs, and featuring an authoritative text, Hitler's Gauls is a definitive history of one of Hitler's lesser known foreign units of World War II.
Hitler's Gauls ABC-CLIO
Introduces the geography, cities, transportation, economy, and wildlife of Germany.
Experiencing World History Crabtree Publishing Company
An authoritative, up-to-date examination of the national security and defense policies of 50 influential nations and regions across the globe. * Chapters cover defense spending and experiences with conflict for over 50 countries * Forty distinguished contributors from different countries and institutions, including Ivelaw Griffith and John Henderson, who are world experts on the security situations in their areas of interest * Two tables in each essay with basic security data for quick lookup * Bibliographic information included for each entry
An Essay Upon National Character Cambridge University Press
Charles I, often known as Charlemagne, is one of the most extraordinary figures ever to rule an empire. Driven by unremitting physical energy and intellectual curiosity, he was a man of many parts, a warlord and conqueror, a judge who promised 'for each their law and justice', a defender of the Latin Church, a man of flesh-and-blood. In the twelve centuries since his death, warfare, accident, vermin, and the elements have destroyed much of the writing on his rule, but a remarkable amount has survived. Janet Nelson's wonderful new book brings together everything we know about Charles, sifting through the available evidence, literary and material, to paint a vivid portrait of the man and his motives. Charles's legacy lies in his deeds and their continuing resonance, as he shaped counties, countries, and continents, founded and rebuilt towns and monasteries, and consciously set himself up not just as King of the Franks, but as the head of the renewed Roman Empire. His successors--in some ways even up to the present day--have struggled to interpret, misinterpret, copy, or subvert his legacy.

An Economist and Sunday Times Best Book of the Year “ Deserves to be hailed as a magnum opus. ” —Tom Holland, The Telegraph “ Ambitious...seeks to rehabilitate the Holy Roman Empire ’ s reputation by re-examining its place within the larger sweep of European history...Succeeds splendidly in rescuing the empire from its critics. ” —Wall Street Journal Massive, ancient, and powerful, the Holy Roman Empire formed the heart of Europe from its founding by Charlemagne to its destruction by Napoleon a millennium later. An engine for inventions and ideas, with no fixed capital and no common language or culture, it derived its legitimacy from the ideal of a unified Christian civilization—though this did not prevent emperors from clashing with the pope for supremacy. In this strikingly ambitious book, Peter H. Wilson explains how the Holy Roman Empire worked, why it was so important, and how it changed over the course of its existence. The result is a tour de force that raises countless questions about the nature of political and military power and the legacy of its offspring, from Nazi Germany to the European Union. “ Engrossing...Wilson is to be congratulated on writing the only English-language work that deals with the empire from start to finish...A book that is relevant to our own times. ” —Brendan Simms, The Times “ The culmination of a lifetime of research and thought...an astonishing scholarly achievement. ” —The Spectator “ Remarkable...Wilson has set himself a staggering task, but it is one at which he succeeds heroically. ” —Times Literary Supplement

Bernhard Bischoff (1906-1991) was one of the most renowned scholars of medieval palaeography of the twentieth century. His most outstanding contribution to learning was in the field of Carolingian studies, where his work is based on the catalogue of all extant ninth-century manuscripts and fragments. In this book, Michael Gorman has selected and translated seven of his classic essays on aspects of eighth- and

ninth-century culture. They include an investigation of the manuscript evidence and the role of books in the transmission of culture from the sixth to the ninth century, and studies of the court libraries of Charlemagne and Louis the Pious. Bischoff also explores centres of learning outside the court in terms of the writing centres and the libraries associated with major monastic and cathedral schools respectively. This rich collection provides a full, coherent study of Carolingian culture from a number of different yet interdependent aspects, providing insights for scholars and students alike.

Daniel Clay is a mystic and sage who brings a divine message of warning, hope, and love to a world that is desperately in need. He first began his work of prophecy in 1983, forecasting the fall of the Berlin Wall, the uniting of East and West Germany, and the demise of Russia. Divided into two sections, The Prophecies shares Daniel Clay ’ s fascinating foretellings, which were originally delivered in July 1996 from a meditative state. Within the first section, Clay offers prophecies for the global world concerning science, technology, health, climate change, geopolitical affairs, terrorism, The second section contains poetic prophecy directed to specific nations in a style reminiscent of Nostradamus. Included is an addendum that addresses the prophecies that have already been fulfilled. The Prophecies is a powerful collection of predictions originally shared in 1996 by a harbinger of the New Age as a way for humanity to avoid potential disasters and usher in a new epoch of Love and Wisdom.

A “ marvelous history ” * of medieval Europe, from the bubonic plague and the Papal Schism to the Hundred Years ’ War, by the Pulitzer Prize – winning author of The Guns of August *Lawrence Wright, author of The End of October, in The Wall Street Journal The fourteenth century reflects two contradictory images: on the one hand, a glittering age of crusades, cathedrals, and chivalry; on the other, a world plunged into chaos and spiritual agony. In this revelatory work, Barbara W. Tuchman examines not only the great rhythms of history but the grain and texture of domestic life: what childhood was like; what marriage meant; how money, taxes, and war dominated the lives of serf, noble, and clergy alike. Granting her subjects their loyalties, treacheries, and guilty passions, Tuchman re-creates the lives of proud cardinals, university scholars, grocers and clerks, saints and mystics, lawyers and mercenaries, and, dominating all, the knight—in all his valor and “ furious follies, ” a “ terrible worm in an iron cocoon. ” Praise for A Distant Mirror “ Beautifully written, careful and thorough in its scholarship . . . What Ms. Tuchman does superbly is to tell how it was. . . . No one has ever done this better. ” —The New York Review of Books “ A beautiful, extraordinary book . . . Tuchman at the top of her powers . . . She has done nothing finer. ” —The Wall Street Journal “ Wise, witty, and wonderful . . . a great book, in a great historical tradition. ” —Commentary

[Charlemagne's Practice of Empire](#) ABC-CLIO
An incisive and absorbing biography of the legendary emperor who bridged ancient and modern Europe and singlehandedly altered the course of Western history. Charlemagne was an extraordinary figure: an ingenious military strategist, a wise but ruthless leader, a cunning politician, and a devout believer who ensured the survival of Christianity in the West. He also believed himself above the rules of the church, siring bastards across Europe and coldly ordering the execution of 4,500 prisoners. Derek Wilson shows how this complicated, fascinating man married the military might of his army to the spiritual force of the Church in Rome, thereby forging Western Christendom. This is a remarkable portrait of Charlemagne and of the intricate political, religious, and cultural world he dominated.

Germany and its capital, Berlin, were the fulcrum of geopolitics in the twentieth century. After the Second World War, Germany was a divided nation. Many German citizens were born and educated and continued to work in eastern Germany (the former German Democratic Republic). This title in the Understanding Modern Nations series seeks to explain contemporary life and traditional culture through thematic encyclopedic entries. Themes in the book cover geography; history; politics and government; economy; religion and thought; social classes and ethnicity; gender, marriage, and sexuality; education; language; etiquette; literature and drama; art and architecture; music and dance; food; leisure and sports; and media and pop culture. Within each theme, short topical entries cover a wide array of key concepts and ideas, from LGBTQ issues in Germany to linguistic dialects to the ever-famous Oktoberfest. Geared specifically toward high school and undergraduate German students, readers interested in history and travel will find this book accessible and engaging.
[Modern Germany](#) Vintage
The European Middle Ages have long attracted popular interest as an era characterised by violence, whether a reflection of societal brutality and lawlessness or part of a romantic vision of chivalry. Violence in Medieval Europe engages with current scholarly debate about the degree to which medieval European society was in fact shaped by such forces. Drawing on a wide variety of primary sources, Warren Brown examines the norms governing violence within medieval societies from the sixth to the fourteenth century, over an area covering the Romance and the Germanic-speaking regions of the continent as well as England. Scholars have often told the story of violence and power in the Middle Ages as one in which 'private' violence threatened and sometimes destroyed 'public' order. Yet academics are now asking to what degree violence that we might call private, in contrast to the violence wielded by a central authority, might have been an effective social tool. Here, Brown looks at how private individuals exercised violence in defence of their rights or in vengeance for wrongs within a set of clearly understood social rules, and how over the course of this period, kings began to claim the exclusive right to regulate the violence of their subjects as part of their duty to uphold God's order on earth. Violence in Medieval Europe provides both an original take on the subject and an illuminating synthesis of recent and classic scholarship. It will be invaluable to students and scholars of history, medieval studies and related areas, for the light it casts not just on violence, but on the evolution of the medieval political order.

Charlemagne, Genghis Khan, and Scipio Africanus: History's Ultimate Trilogy (3 books in 1) Why do we remember some rulers although they lived centuries ago, while others are just footnotes in history? Charlemagne, while subjugating the people he conquered, modernized education, currency, art, music, and leadership to bring stability back to Europe, setting it on the path to thrive for years to come. Europe had been in upheaval, with

threats from every direction, when Charlemagne came to power in the eighth century. The barbarian king worked to unite Germanic people into one kingdom and to spread Catholicism. We remember Genghis Khan for the brutality and bloodshed left in his path as he unified Mongolia and widened the Mongolian Empire. This biography explores his life as both a benevolent unifier and leader and a horrifically violent warlord, beginning with his humble beginnings during a time of political instability. Hill willpower changed the world in sweepingly dramatic ways. The last book in this trilogy focuses on the Roman military genius Publius Cornelius Scipio Africanus the Elder. He learned from Hannibal that a win by trickery is still a win and that honor on the field of battle often results in death. Reviewer Mark Nell says, "I recommend it highly for those like myself who know little or nothing about Scipio Africanus and would like to learn more about the man who, in the opinion of some, was greater than Julius Caesar."

History of the revolt of the United Netherlands Cambridge University Press

Voltaire's description of the Holy Roman Empire as 'neither holy, nor Roman, nor an empire' is often cited to underline its worthlessness. German historians traditionally despised it because it had allegedly impeded German unification. Since 1945 scholars have been more positive but the empire's history and significance is still largely misunderstood. In this Very Short Introduction Joachim Whaley outlines the fascinating thousand-year history of the Holy Roman Empire. Founded in 800 on the basis of Charlemagne's Frankish kingdom, its imperial title went to the German monarchy which became established in the ninth and ten centuries. They claimed Charlemagne's legacy, including his role as protector of the papacy and guardian of the Church. Around 1500 the title Holy Roman Empire of the German Nation was adopted. An elective monarchy, the empire gradually developed from a feudal monarchy into a legal system that pacified the territories and cities of German-speaking Europe. By 1519 it had a supreme court and a regional enforcement system ended feuding. Throughout its lifetime, the empire's growth and history was shaped by the major developments in Europe, from the Reformation, to the Thirty Years War, to the French revolutionary wars, which led to Napoleon destroying the empire in 1806. The sense of a common history over a thousand years and the legal traditions established by the empire have shaped the history of German-speaking Europe ever since. Joachim Whaley analyses the empire's crucial impact and role in the history of European power and politics, and shows that there has never been a more durable political system in German history. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.
