Few Americans and even fewer citizens of other

nations understand the electoral process in the United States. Still fewer understand the role played by political parties in the electoral process or the ironies within the system.  
Participation in elections in the United States is much lower than in the vast majority of mature democracies.  
Perhaps this is because of the lack of competition in a country where only two parties have a true chance of winning, despite the fact that a large number of citizens claim allegiance to

neither and think badly of both. Or perhaps it is because in the U.S. campaign contributions disproportionately favor incumbents in most legislative elections, or that largely unregulated groups such as the now notorious 527s have as much impact on the outcome of a campaign as do the parties or the candidates' campaign organizations.  
These factors offer a very clear picture of the problems that underlay our much trumpeted electoral system.

of this Very Short Introduction introduces the reader to these issues and more. Drawing on updated data and new examples from the 2016 presidential nominations, L. Sandy Maisel provides an insider's view of how the system actually works while shining a light on some of its flaws. He also illustrates the growing impact of campaigning through social media, the changes in campaign financing wrought by the Supreme Court recent

decisions, and the Tea Party's influence on the sub-presidential nominating process. As the United States enters what is sure to be yet another highly contested election year, it is more important than ever that Americans take the time to learn the system that puts so many in power. Identifying Gifted Students Stanford University Press This publication provides directors and coordinators of programs for gifted and talented students with a specific step-by-step plan for developing an identification procedure in a school

or school district. While the sections of this publication are laid out sequentially according to the steps, identification is an ongoing process. The goal of identification is to ensure that every gifted and talented student who needs a program that is different from the general education curriculum receives one that is matched to his or her specific characteristics. Perfect for anyone seeking a concise introduction to the identification of gifted students, this book is designed to offer administrators, teachers, and parents an overview of the critical issues in building effective identification procedures. This book overviews definitions and characteristics of gifted students,

on the version of the "Operational Guidelines for the Implementation of the World Heritage Convention" dated August 2011 and seeks to complement it. In particular, the manual seeks to support States Parties in implementing the World Heritage Convention and to provide guidance and knowledge that will help ensure a credible World Heritage List of well-managed properties of Outstanding Universal Value. it is hoped that the manual will help States Parties to carefully consider the implications of proceeding with World Heritage nominations and take the necessary steps to ensure that the effort is worthwhile for both

The 2020 presidential selection process is already underway. As the political parties finalize their nominating rules and the states jostle for an advantageous contest date, potential challengers are being identified and sized up by party insiders. Once again, media and popular attention will be disproportionately focused on the candidates' performance in the first and earliest of the state nominating contests—and on how quickly the

---

sequence of primaries and caucuses winnows the field and identifies the presumptive nominees. But what are the implications of a sequential and front-loaded nominating calendar that gives some voters outsized influence while leaving many others with a constrained choice—or no choice—in the selection of their party's presidential nominee? Reforming the Presidential Nominating Process: Front-Loading's Consequences and the National Primary Solution critiques the contemporary nominating process from the perspective of voters and their right to effectively participate in their parties' selection of a presidential nominee. Employing

both a common-sense and legal, rights-based framework to invite a constitutionally grounded conversation on the legitimacy of the current presidential nominating process, Lisa K. Parshall argues that timing of participation in the nomination goes hand-in-hand with the right to choose a candidate and the fairest way to restore the promise of meaningful and timely participation for all voters is by adopting a same-day national primary. Viewed from the party membership perspective, this work illuminates the fundamental interests at stake that should be considered in any potential reform of the presidential nominating system.

This comprehensive volume brings together a diverse set of scholars to analyse candidate nomination, intra-party democracy, and election violence in Africa. Through a combination of comparative studies and country-specific case studies spanning much of Sub-Saharan Africa, including Kenya, Zambia, and South Africa, the authors shed light on violence during candidate nomination processes within political parties. The book covers

---

several cases that vary significantly in terms of democracy, party dominance and competitiveness, and the institutionalization and inclusiveness of candidate selection processes. The authors investigate how common violence is during candidate nomination processes; whether the drivers of nomination violence are identical to those of general election violence; whether nomination violence can be avoided in high risk cases such as dominant party regimes with fierce intra-party competition for power; and which subnational

locations are most likely to experience nomination violence. Through its focus on violence in nomination processes, this book firmly places the role of political parties at the centre of the analysis of African election violence. While adding to our theoretical and empirical understanding of nomination violence, the book contributes to the literature on conflict, the literature on democratization and democratic consolidation, and the literature on African political parties. This book explores how the lower federal court appointment process became vastly politicized in the modern era. Scherer develops a theory of elite mobilization,

---

positing that lower court appointments have always been used by politicians for electoral purposes, but because of two historic changes to American institutions in the 1950s and 1960s the breakdown of the old party system, and a federal judiciary reception to expanding individuals constitutional rights politicians shifted from an appointment system dominated by patronage to a system dominated by new policy-oriented appointment strategies. The use of these new strategies not only resulted in partisan warfare during the nomination and confirmation stages of the appointment

process, but also led to party-polarized voting in the lower federal courts. Employing exclusive data of judicial decision-making from the New Deal era through the present, Scherer demonstrates that there was little party-polarized voting in the lower federal courts until the late 1960s, and that once politicians began to use elite mobilization strategies, significant party-polarized voting in the lower federal courts resulted. Accordingly, elite mobilization strategies have affected not only politics in Washington, but also the way justice is distributed across the country. An illuminating look at how national political parties nominate presidential candidates This innovative study blends sophisticated statistical analyses, campaign anecdotes, and penetrating political insight to produce a fascinating exploration of one of America's most controversial political institutions—the process by which our major parties nominate candidates for the presidency. Larry Bartels focuses on the nature and impact of "momentum" in the contemporary nominating system. He describes the complex interconnections among primary election results, expectations, and subsequent primary

---

results that have made it possible for candidates like Jimmy Carter, George Bush, and Gary Hart to emerge from relative obscurity into political prominence in nominating campaigns. In the course of his analysis, he addresses questions central to any understanding—or evaluation—of the modern nominating process. How do fundamental political predispositions influence the behavior of primary voters? How quickly does the public learn about new candidates? Under what circumstances will primary success itself generate subsequent primary success? And what are the psychological processes underlying this dynamic

tendency? Bartels examines the likely consequences of some proposed alternatives to the nominating process, including a regional primary system and a one-day national primary. Thus the work will be of interest to political activists, would-be reformers, and interested observers of the American political scene, as well as to students of public opinion, voting behavior, the news media, campaigns, and electoral institutions. *Model Rules of Professional Conduct* Free Spirit Publishing Economic and Social Development in South China brings together

nomination process—the ways in which it is broken and how it might be fixed. The contributors to *Reforming the Presidential Nomination Process* address different facets of the selection process, starting with a brief history of how we got to this point. They analyze the importance—and perceived unfairness—of the earliest primaries and discuss what led to record turnouts in 2008. What roles do media coverage and public endorsements play? William Mayer explains the "superdelegate" phenomenon and the controversy surrounding it; James Gibson and Melanie Springer evaluate public perceptions of the current process as

well as possible reforms. Larry Sabato (*A More Perfect Constitution*) calls for a new nomination system, installed via constitutional amendment, while Tom Mann of Brookings opines on calls for reform that arose in 2008 and Daniel Lowenstein examines the process by which reforms may be adopted—or blocked. *Federal Credit Union Bylaws* PRUFROCK PRESS INC. What is the dominant force in presidential nomination campaigns? Are nomination outcomes decided largely by the political party or by the candidates and their activities? In Strategic Decision-Making in Presidential Nominations,

Kenny J. Whitby aims to provide some answers to these important questions, focusing on the closely contested 2008 race between Senators Hillary Clinton and Barack Obama. It was this race that spotlighted the role played by super delegates, the unpledged party elites who were added to the nomination process in the 1980s. Whitby's central argument is that superdelegates are strategic actors and their endorsements are a response to a variety of

---

demographic,  
institutional, and  
campaign factors.  
While some weigh  
in early with an  
endorsement,  
many adopt a wait-
